Good Evening Allen,

We continue to monitor Beaver Creek weekly. Watergap is up and the gate is closed. No cows or cow sign present.

Jack has gathered the cows that found their way down river after this year's fire and burn scar flooding. The lower watergap by the culvert has been rebuilt for a second time. This should prevent more from finding their way down river. The upper water gap in River pasture has also been rebuilt. We are completely out of fencing materials at this point. Any further repairs will require more minerals.

Cows have been moved to their winter pasture.

Thank you for your understanding during these difficult times.

Kim

Good Afternoon,

I am sure you are aware of the challenges we continue to face as a result of the Black Fire and subsequent flooding. With that said, we are still making efforts to maintain compliance best we can as safety will allow. Please also keep in mind that we have limited supplies and hauling in more supplies is difficult at best due to road conditions. Listed below are some of our recent efforts to maintain compliance:

8/6 Chad Fowler flew river, saw no cows.

9/5 Rebuilt water gap at Beaver Creek. (See attached photo)

9/6 Rebuilt water gap at culvert. (See attached photo)

9/7 Jack gathered Beaver Creek and removed cows.

9/8 Jack rode down the river from the house. Saw no tracks or cow sign. Please note conditions on the river are still unsafe.

In addition to the list above daily monitoring of the washed-out water gap at the culvert to keep cows from going down the river.

Please let us know if you have any questions.

Best,

Jack Crumbley

Good Morning Allen,

Here is the requested weekly report.

2/17/2022 Checked upper Taylor Creek, no fresh cattle sign for over a year. Area appears to be cattle free.

2/18/2022 Checked Minnow 1 and Minnow 2, no cows. Beaver Creek had two cows. Fixed water gap in Beaver Creek and removed cows. Spoke with Allen Graves via telephone and reported monitoring.

Thank you,

Jack Crumbley

Permittee present: No	Others present: No

Livestock Presence/Absence

Were livestock present? **No**

There is a lot of trampling near the two open gates, just downriver from the Sanctuary Trail entrance. There's a tank that appears to have been bulldozed . The sign tapers off farther downstream where there are closed gates.
