

A Message from Colville National Forest Supervisor - Rodney Smoldon

Welcome to the Colville National Forest! To better serve the public and inform visitors to the Colville National Forest, we have created a new Forest User's Map that will help you more easily find what you need. This map combines information from our Motor Vehicle Use Maps (MVUM) and a former Standalone Firewood Cutting map. Our goal is to provide a single map that includes the necessary information you will need to navigate the forest for recreation, firewood cutting, and other adventures.

This map will help all users and visitors to the Colville National Forest continue to care for and enjoy their public lands now and into the future. To get firewood for personal use, you must obtain a firewood permit and follow all requirements noted on the permit. Permits can be obtained at any Colville National Forest Office, or at <https://www.fs.usda.gov/main/colville/permits-forests-products#firewood>.

Please ensure that you have your map and, if gathering firewood, your harvesting permit available to help us all conserve resources for our communities and future generations who depend on them. Information about motor vehicle use is included on the back of this map. Your cooperation and compliance to all Forest regulations is appreciated and helps make the Colville National Forest's firewood, recreation, and other programs a success.

Thank you for letting us serve you! We hope you have a safe and enjoyable visit.

A disclaimer with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies. The USDA, its agencies, offices, employees, and contractors participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA in all areas open to the public. Recipients of USDA programs and services may also be prohibited from discriminating on basis of race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, and disability. Inquiries about the above information may be directed to the USDA's Civil Rights Office at (202) 734-3191 and TDD at (202) 734-3192. USDA is an equal opportunity provider and employer.

When cutting or gathering firewood, you must:

- Obtain a firewood permit
- Keep your vehicle on open, existing roads, and do not block traffic
- Pay for or repair damage to the national forest resulting from your activities
- Remove branches, bark, and other debris from roads and ditches and scatter them across the landscape
- Remove all trash and litter
- Comply with all fire requirements and fire precaution levels
- If using a power saw between April 1 and October 15, have an exhaust system in good repair with a spark arrestor of 0.023 inches or less, a pressurized fire extinguisher of more than eight ounce capacity by weight, and a long-handled shovel with an 8 inch (size 0) blade
- Cut trees so the stump is less than 12 inches high
- Cut logs shorter than 7 1/2 feet long, unless pre-approved by the district ranger
- Have entire permit and firewood maps in your possession at all times
- Follow all General Conditions and Other Conditions found on the back of your permit

Within 200 feet of a road that is shown as open to firewood cutting, and on any unpaired county road within the national forest, you may cut any dead standing or down tree year-round unless:

- It is marked as a wildlife tree or a transect tree
- It has any green leaves or needles
- It is a standing western red cedar. Down western red cedar can be cut into lengths less than 16 inches
- It is within 300 feet of fish-bearing streams, natural lakes or natural ponds
- It is within 150 feet of other streams, wetlands, constructed ponds or reservoirs
- It is within 100 feet of a dry stream channel
- It is in a log deck. Some log decks are open to firewood cutting, but must be signed
- It is in an administrative site

Representatives of the Forest Service are available to help you determine where you can safely and legally cut your firewood. If you have problems or concerns about the program, or need assistance finding firewood, please call us, toll free, at **1-877-727-8704** or visit us online at www.fs.usda.gov/colville.

Respect Private Land

Colville National Forest firewood cutting permits, issued by the Forest Service, are not valid on private land. Private landowners use a variety of signs to post their property boundaries, and not all private property lines are posted.

It is your responsibility to determine where you are cutting. Always be alert for property boundary signs. Forest Service maps are a good general source of information regarding national forest, private land and other land ownerships and may be purchased at all Forest Service offices.

For daily updated fire information call 1-800-527-3305 or visit www.fs.usda.gov/colville

Fire Prevention

- Carry gasoline in an approved container equipped with a spout, or use a funnel so that gasoline does not spill on the saw or ground.
- Before starting the saw, move at least 10 feet from the place where you refueled.
- Clear brush and dry material from the cutting area. When you put the saw down, put it on bare ground or rock.
- Do not operate the saw if it overheats or backfires.
- Remove oily rags, used oil filters, garbage and other debris when you leave the site.
- Never smoke while working. Any smoking should be done inside a closed vehicle or while sitting in an area cleared of flammable materials.
- After cutting, remain in the area for one hour to be sure that a fire has not started.

Fire Prevention Tips

Adjust firewood activity to reflect the current Industrial Fire Precaution Level (IFPL) Precautions and Restrictions. The Forest is broken down into multiple Fire Precautionary Zones (FPZ) and each FPZ may have its own IFPL.

Industrial Fire Precaution Level Precautions and Restrictions

Level	I	II	III	IV	Precautions / Restrictions
	•	•			Carry Required Safety Equipment listed above
	•	•			Stay in area for one hour after power saw is shut off to watch for fire starts
		•			Shut down power saws at 1:00 p.m.
			•	•	All woodcutting activity prohibited

Snags and Wildlife

When cutting firewood, be on the lookout for telltale signs of animal life in the trees before you cut. Wildlife needs dead hollows or fallen trees for food and family homes. In many managed forests, certain kinds of trees - both dead and alive - are reserved as homes for many species of birds, mammals, amphibians and reptiles. Nearly all wildlife species benefit from "animal inns" for food, nesting or shelter. Please don't cut trees with paint marks, wildlife signs, broken tops, trunk holes or visible nests, or any other trees prohibited by the permit.

Wildlife Trees....

Many kinds of wildlife depend on snags as well as healthy, living trees, defective trees, and logs both on the ground and in the streams.

A standing dead tree is called a "snag". Snags are used by wildlife for:

- Courting
- Nesting
- Raising young
- Feeding
- Sleeping
- Hibernating
- Hiding
- Hunting
- Roosting
- Storing Food

The Best Firewood

Some trees burn hotter than others.

This chart shows common types of trees in our area and their heat values in BTUs (British Thermal Units).

A higher value indicates more heat.

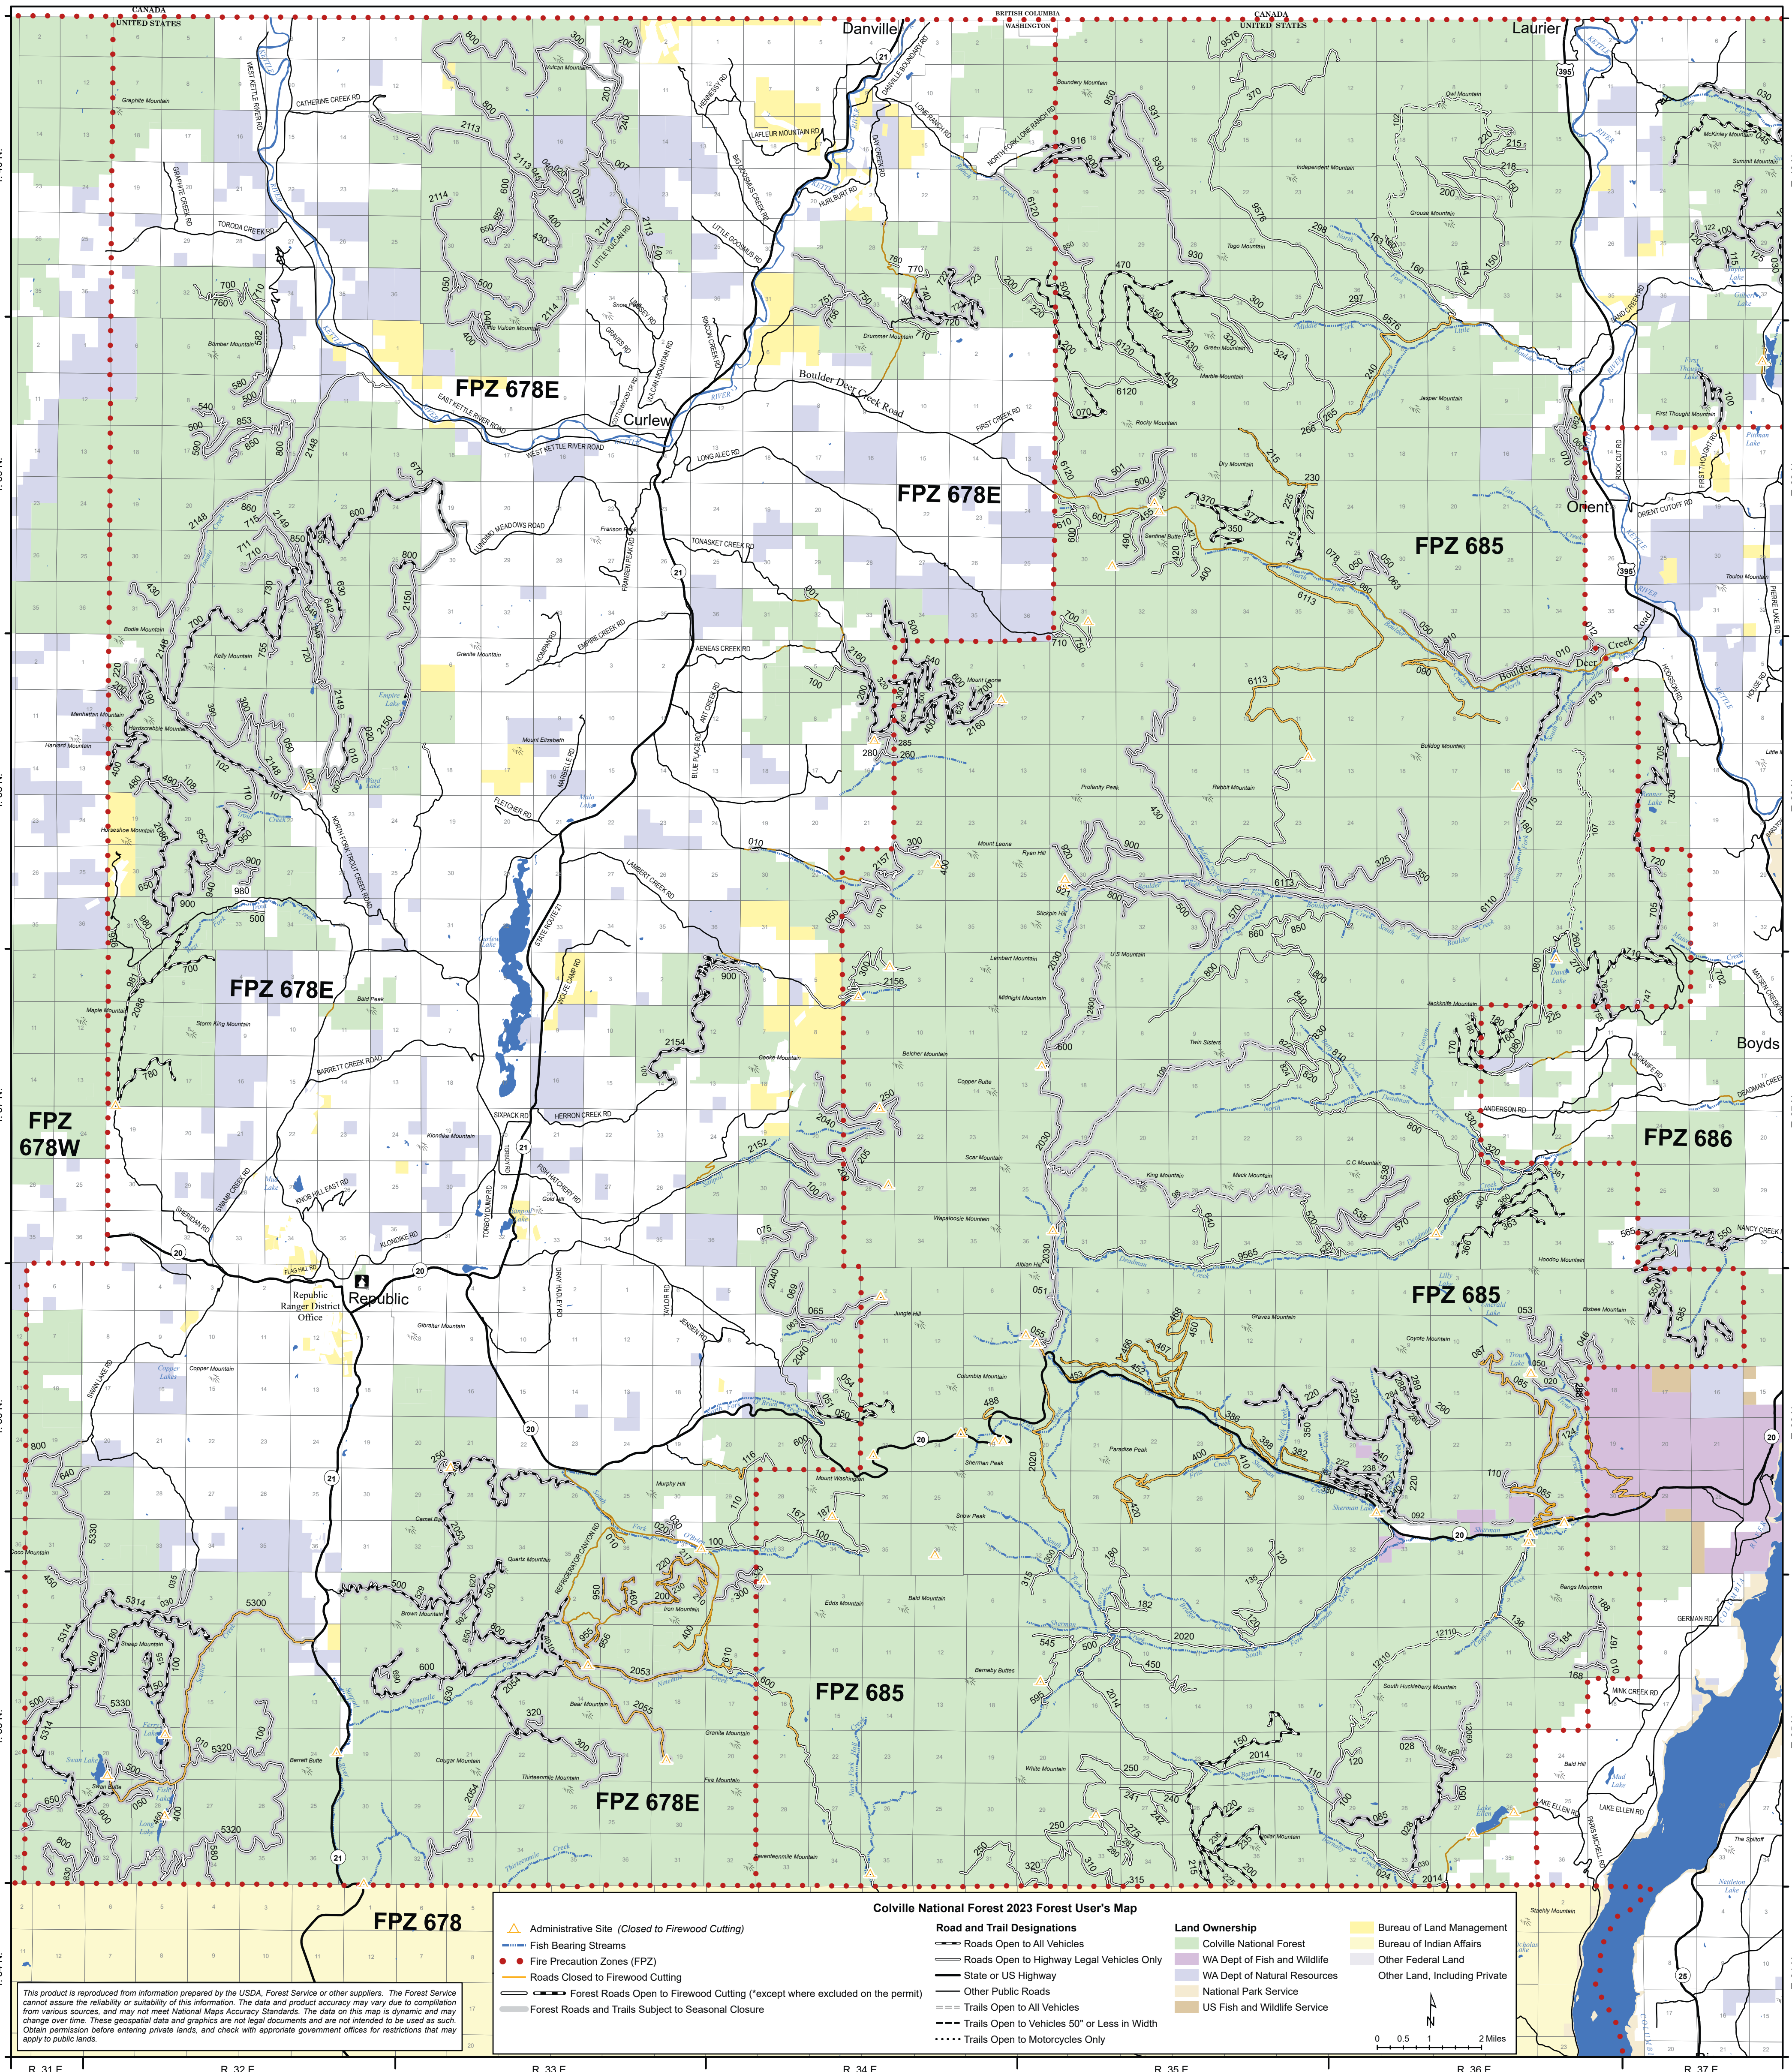

Kind of Wood	Heat BTU's	Weight (lbs./cord)	Resin Content
Lodgepole Pine	17.5	2,610	Low
Western Larch	22.3	3,330	Low
Douglas Fir	20.6	2,970	Medium
Ponderosa Pine	17.1	2,240	High
Subalpine Fir	13.6	2,730	Medium

1 Cord

A standard, full cord of wood has a volume of 128 cubic feet, measures as a pile 8 feet long, 4 feet high, and 4 feet wide. A full cord can weigh up to 5,000 pounds.
