

Tahoe National Forest 2024 SUMMER INTERPRETIVE PROGRAMS

Have you ever wondered which constellations decorate the sky above the Tahoe National Forest? Are you curious about the cultural or natural history of our region? Experience the forest in a new way during our **FREE** interpretive summer programs!

Campground programs are designed for visitors of all ages and abilities who come eager to learn and excited to experience their public lands.

Pop-up tables will be stationed across the forest with general information and friendly staff available to answer questions.

Discovery hikes are excursions for visitors interested in exploring areas of the forest they may not explore otherwise. These hikes are generally less than five miles, with steep and uneven terrain.

Interpretive walks are for all ages, though participants should be able to walk up to two miles on mostly flat, uneven terrain.
