

METADATA
Bitterroot National Forest Fire Protection
(BNF_FireProtection)

Summary (Purpose): The purpose of the BNF_FireProtection dataset is to display the Bitterroot National Forest's Designated Wildland Fire Protection Areas.

Description (Abstract): This layer depicts the Bitterroot National Forest Fire Protection boundary. The data was extracted from a state-wide layer maintained by the Montana Department of Natural Resource and Conservation (DNRC) in the spring of 2014.

Attributes:

PROTAGENCY: Name of the fire protection agency, i.e., "Federal – Bitterroot NF".

ACRES: Area for which the BNF has fire protection responsibility, in acres.

Coordinate System:

Type: Projected

Geographic Coordinate Reference: GCS North American 1983

Datum: D_North_America_1983

Projection: NAD_1983_UTM_Zone_11N

Unit: Meters

Use Limitation: The Forest Service uses the most current and complete data available. GIS data and product accuracy may vary. They may be developed from sources of differing accuracy; accurate only at certain scales; based on modeling or interpretation; incomplete while being created or revised; etc. Using GIS products for purposes other than those for which they were created, may yield inaccurate or misleading results. The Forest Service reserves the right to correct, update, modify or replace GIS products without notification.
