ACTION: EXPLORING THE FOREST

When: during the walk

Type of action: object search

With whom: in groups of two to three people

Materials: list of elements and images of species to be identified; it can be on your digital device or on a printed sheet.

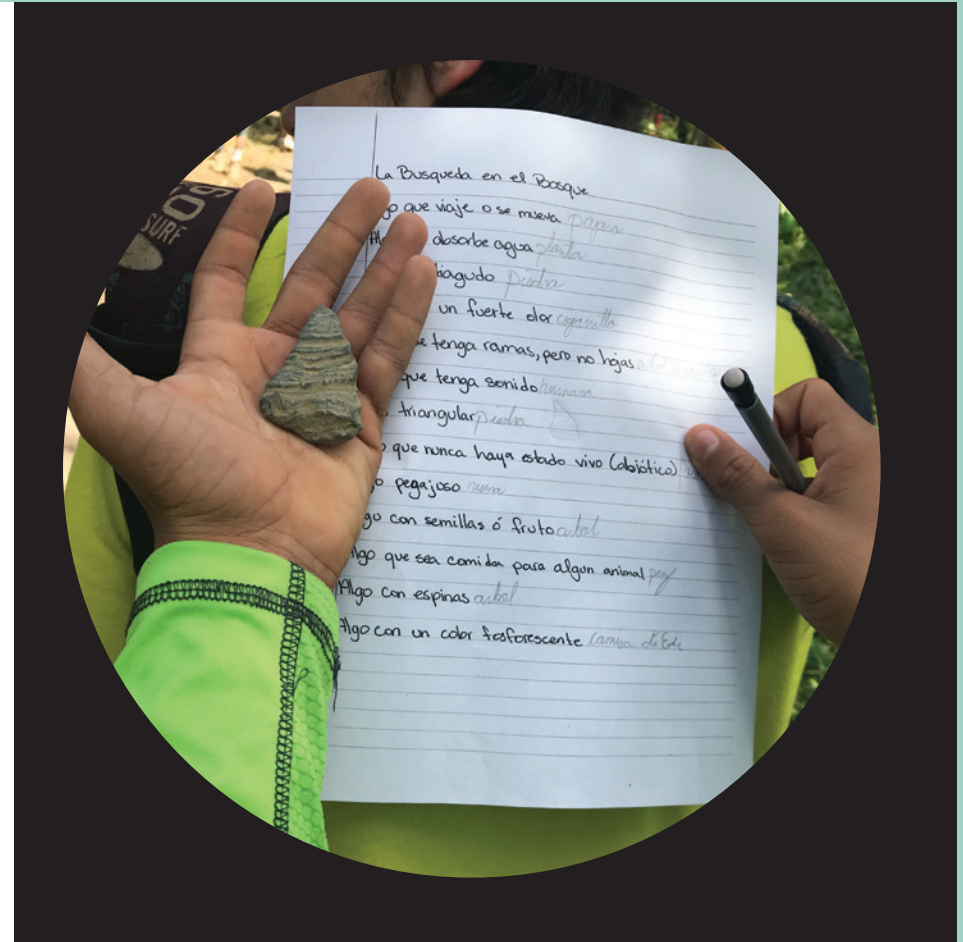

Objective: to explore, search, and find diverse elements

Topic: Biodiversity

Do you think you can find the following elements without repeating any? Remember to look in all directions. To your right, to your left, up, down, in front of you, behind you, here, and there!

Draw or write the name of what you find in the square next to the description. Remember to leave all the elements in their place to maintain a beautiful natural order.

1. Something that travels or moves
2. Something that absorbs water

3. Something pointy
4. Something with a strong smell
5. Something that has branches but no leaves
6. Something that makes a sound
7. Something triangular
8. Something that's never been alive (abiotic)
