

<b>Task 1. Recommendations</b>			
<b>Part A - 5 Year Plan, years 1 -5</b>			
FY	<b>Suitable Lands</b> Ponderosa Pine Sawtimber (CCF)	<b>Suitable Lands</b> Additional NEPA Projects that may produce forest products	<b>Unsuitable Lands</b> Additional Projects that may produce forest products
2020	120,000		
2021	Input program level & supporting NEPA	Input recommended project by year (Decision and start of implementation)	Input recommended project by year (Decision and start of implementation)
2022			
2023			
2024			
Total			
<b>Considerations for narrative, years 1-5</b>			
	1. Based on recommended mortality rate(s) and growth rate(s).	1. Recommend priority projects for the forest to consider for initiating planning efforts.	1. Recommend priority projects for the forest to consider for initiating planning efforts.
	2. Provide rationale for rates based on draft GTR, inventory references cited in Draft GTR, and other applicable references.	2. Consider timing of Record of Decision and implementation - what year is implementation likely?	2. Consider timing of Record of Decision and implementation - what year is implementation likely?
	3. Program level can vary on an annual basis but the total 5 year program level must = total 5 year net growth per recommended scenario(s).	3. Provide by priority and potential project goals (what, where, and why).	3. Provide by priority and potential project goals (what, where, and why).
	4. Discuss supporting NEPA including the BHRL project (an estimated 435,000 CCF following implementation of the 2020 program).	4. Volume estimates are not necessary but may be provided assuming reliable information is available (estimates for actual material removed)	
<b>Part B - Other Considerations</b>			
1. Narrative format, not by year			
2. Program consideration for years 6-10: what projects would support the forest timber program and impacts on program level.			
3. Consider Forest Plan Revision or Amendment recommendation timing in this section.
