

This photo shows the camp as it looked in 1937. The walking trail will take you through the camp. There are stops at several of the building foundations. Signs at these stops describe the building function.

# Camp Wolf River

Camp Wolf River was in operation between 1935 and 1942 by Company 3642. The camp was landscaped and contained wood and cement structures. The men at this camp worked on reforestation, fire prevention, disease and rodent control, and the creation of fish and game preserves.

The men were paid \$30 a month plus food, clothing and shelter. All but \$5 was sent directly to their families.

The Army ran the camp and kept strict discipline. The Forest Service was responsible for assigning work duties and supervising the men.

Even after a hard day's work, the men formed baseball, basketball, archery and swimming teams. Competition with nearby camps and the local community was common.

The men kept the camp and their personal space clean and neat. The Army made frequent inspections.

# CIVILIAN CONSERVATION CORPS

By 1933, the Great Depression had a stranglehold on our nation. Fourteen million men and women lost their jobs. President Franklin Delano Roosevelt developed programs such as the Civilian Conservation Corps (CCC) to put America back to work.

This peacetime army worked hard to revitalize  
out land,  
water and  
air.

CCC workers reforestation, take  
and plant trees to replace the cut of  
the war.

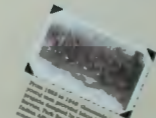

Light work

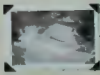

The CCC 'rig' placed here.

Clearer air, healthy forests,  
improved game habits, better  
wildlife, increased development  
and the enjoyment of an  
environmentally safe are the  
goals of their labor

Work done on land, conservation of  
the forest, the protection of  
the water, the work of the  
CCC is to put the  
country back to work.

And stepped off ground.

Working hard-  
work in the ground.

Men joined the organization through a  
voluntary system. The  
Civilian Conservation Corps  
was established in 1933.

Other conservation efforts  
include National Wildlife  
Refuges, National Forest  
System, National Park System,  
and the National  
System of Public Lands.

STOP 4  
LATRINE

Eight seats, no waiting!
