

## Chapter 5 - List of Preparers

---

Primary responsibility for the preparation of the proposed Forest Plan and EIS was held by the Land Management Planning Group and Interdisciplinary Team (ID Team). In addition, the Forest's Line and Staff Officers, consisting of the Forest Supervisor, Deputy Forest Supervisor, Forest Staff Officers and District Rangers, provided additional input to the planning process from a managerial viewpoint. They were also substantially involved in the review of these documents throughout the planning period.

Throughout the preparation of these documents, many individuals assisted in a variety of ways. Without their expertise, ideas and opinions, the writing of these documents would not have been possible.
