

Harvest Trends on National Forest System Lands

The following data set displays acres of National Forest System lands (NFS) where commercial timber sales were accomplished. The figures presented are from available records beginning with Fiscal Year 1984 to Fiscal Year 2018. The information represents the acres harvested by Forest Service region by different harvest methods. This data is from "Table 20 -Regeneration and Intermediate Harvest of the Annual Reforestation and Timber Stand Improvement Report." The information from Fiscal Year 1984 to 2004 was generated using the SILVA portion of the Forest Service Timber Activity Control System (TRACS) computer application. Thereafter, the figures are produced using the Forest Service Activity Tracking System (FACTS), which replaced SILVA in FY 2005.
