Acreage Calculation

Land Areas of the National Forest System (LAR) table data are generated from the Forest Service electronic Land Status Record System (LSRS) geodatabase. Spatial feature data are stored in the geodatabase in geographic coordinates (decimal degrees). LSRS data layers are overlaid in various combinations to generate data for the 28 LAR tables. Acreage values are projected and calculated from the geometries of the overlay features. Geographic coordinates are projected using the Alaska Albers Equal Area Conic projection for Region 10 (Alaska) and the North American Albers Equal Area Conic projection for the other 8 Forest Service regions.

Spatial data in the LSRS are captured and processed using very small precision and tolerance parameters. However, LAR acres are reported as integer (whole) numbers. A comparison of summed acreages from different LAR tables may identify modest and statistically insignificant differences. A small part of the difference can be attributed to spatial feature vertical alignment errors. The greater part of the difference is due to numeric rounding. Rounding error averages less than 0.000005 percent of the total acres. (± 10 in 192,000,000 acres). Which sum is right? Both are correct, though, in theory, the dataset with the fewest numbers subject to rounding is probably a more accurate accounting. Hence, table 1 (National and Regional Areas Summary) is more accurate than the sum of the values from table 6 (NFS Acreage by State, Congressional District, and County).

Land Areas Report—Glossary of Terms

Total/Gross Acreage	NFS Acreage	Other Acreage
Sum of National Forest System (NFS) and non-NFS acreages.	Areas that fall within one of the National Forest System designations described below.	Areas located within NFS boundaries that are not federally owned or administered by the Forest Service.

General Area Kinds

National Forest System

A nationally significant system of federally owned units of forest, range, and related land consisting of national forests, purchase units, national grasslands, land utilization project areas, experimental forest areas, experimental range areas, designated experimental areas, other land areas, water areas, and interests in lands that are administered by the U.S. Department of Agriculture (USDA) Forest Service or designated for administration through the Forest Service. Also see Section 11 of Forest and Rangeland Renewable Resources Planning Act of 1974 (P.L. 93-378, 88 Stat. 476, 16 U.S.C. 1609).

National Forest

A unit formally established and permanently set aside and reserved for national forest purposes.

Purchase Unit

A unit designated by the Secretary of Agriculture or previously approved by the National Forest Reservation Commission for purposes of Weeks Law acquisition.

National Grassland

A unit designated by the Secretary of Agriculture and permanently held by USDA under Title III of the Bankhead-Jones Farm Tenant Act.

Land Utilization Project

A unit designated by the Secretary of Agriculture for conservation and utilization under Title III of the Bankhead-Jones Farm Tenant Act.

Research and Experimental Area

A unit reserved and dedicated by the Secretary of Agriculture for forest or range research and experimentation.

National Preserve

A unit established to protect and preserve natural resources and scientific, scenic, geologic, watershed, historic, cultural, and recreational values; and to provide for multiple use and sustained yield of its renewable resources.

Other Area

An area administered by the Forest Service that is not included in one of the above groups.

Region

A large geographic area containing units of the National Forest System.

National Forest System Special Designated Areas**National Forest Wilderness Areas**

Areas designated by Congress as a part of the National Wilderness Preservation System.

National Forest Primitive Areas

Areas designated by the Chief of the USDA Forest Service as primitive areas. They are administered in the same manner as national wilderness areas, pending studies to determine suitability as a component of the National Wilderness Preservation System.

National Wild and Scenic River Areas

Areas designated by Congress as part of the National Wild and Scenic River System.

National Recreation Areas

Areas established by Congress for the purpose of assuring and implementing the protection and management of public outdoor recreation opportunities.

National Scenic Research Area

Areas established by Congress to provide use and enjoyment of certain ocean headlands and to ensure protection and encourage the study of the area for research and scientific purposes.

National Game Refuges and Wildlife Preserve Areas

Areas designated by Presidential proclamation or by Congress for the protection of wildlife.

National Monument Areas

Areas including historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest, declared by proclamation or by Congress as national monuments.
