To Whom It May Concern:

There has been an increased occurrence of standing dead trees within the Shasta Unit of the Whiskeytown-Shasta-Trinity National Recreation Area (Shasta NRA). This hazardous condition has been abated, but excessive fuel loading remains adjacent to and within developed recreation sites. There are now fuelwood piles and whole logs decked along roadsides and turnouts within the Shasta NRA.

Historically, the Shasta NRA had not permitted the cutting of personal fuelwood within its boundaries. However, current conditions of excessive fuel loading needs to be addressed as soon as possible and the Shasta NRA will be open for personal fuelwood cutting adjacent to open roads.

All of the new areas permitted for cutting, gathering and transporting fuelwood are restricted to 100 feet adjacent to roads. Personal fuel wood cutting within the Shasta NRA will be permitted from September 15 through May 1. This is a supplement to the existing personal fuelwood permitting process and all of the same conditions apply as written within the Shasta-Trinity National Forest personal fuelwood map for the Shasta Zone (R5-UP-081A). The map on the back of this letter identifies additional cutting areas in green.

No cutting is allowed within administrative sites, including but not limited to, developed campgrounds, recreation residences and marinas. All roads leading to these administrative sites and shown with green on the attached map are permitted.

Sincerely,

LeAnn S Colburn
