

Table of contents

Chapter 1 Purpose and need	1
Purpose and need.....	1
Background	1
Need for management direction	6
Proposed action	8
Administrative units	10
Scope	13
Decision framework.....	15
Responsible officials.....	15
How information is presented	16
Chapter 2 Alternatives	17
Introduction	17
Public participation.....	18
Issues & concerns addressed in the alternatives.....	20
Range of alternatives	25
Alternatives developed in detail.....	26
Management direction considered	71
Management direction related to habitat elements.....	71
Management direction related to human uses.....	90
Other suggestions.....	97
Other concerns	103
Comparing alternatives.....	107
Chapter 3 Affected Environment & Effects	135
Introduction	135
Lynx	137
Analysis process	137
Biology	141
Lynx risk factors	145
Productivity risk factors.....	145
Mortality risk factors	180
Movement risk factors	181
Standard ALL S2	186
Effects summary	187
Cumulative effects	200
Other wildlife & fish	202
TEP species.....	202

Table of contents

Sensitive species	205
MIS species.....	209
Cumulative effects	212
Fire.....	213
Affected environment.....	213
Effects.....	220
Cumulative effects	229
Forests	231
Stand initiation stage	232
Older multistoried forests.....	251
Effects to ASQ and LTSY.....	261
Cumulative effects	262
Plants.....	264
Affected environment.....	264
Effects.....	265
Cumulative effects	274
Range	275
Affected environment.....	275
Effects.....	275
Cumulative effects	278
Recreation.....	279
Affected environment.....	281
Cumulative effects	292
Transportation	294
Highways	294
Forest roads.....	297
Cumulative effects	301
Minerals	302
Mineral materials	303
Locatable minerals	305
Leasable minerals.....	308
Lands with outstanding or reserved rights	312
Cumulative effects	314
Special use permits.....	316
Affected environment.....	316
Effects.....	316
Cumulative effects	317
Land ownership.....	319

Table of contents

Affected environment.....	319
Effects.....	320
Cumulative effects	320
Linkage habitat	322
Affected environment.....	322
Effects.....	322
Cumulative effects	323
Economics & social.....	324
Affected environment.....	324
Effects.....	330
Cumulative effects	343
Civil rights and environmental justice.....	344
Other required disclosures.....	345
NFMA significance finding.....	347
Chapter 4 Consultation and Coordination.....	351
List of prepapers.....	351
Distribution list.....	354
Glossary	365
References used.....	380
Personal communications	380
References.....	381
List of acronyms	397
Appendices	399
Appendix A – Crosswalk between the LCAS, the scoping proposed action & the DEIS Proposed Action, Alternative B.....	401
Appendix B – Lynx steering committee habitat and linkage area mapping process ...	439
Appendix C – Acres of lynx habitat	453
Appendix D – Schedule for revising plans.....	454
Appendix E – Management area categories.....	455
Appendix F – Lynx research in the contiguous United States.....	457
Appendix G – Precommercial thinning examples for Alternative D.....	465
Appendix H – TEPS species.....	467
Appendix I – MIS species.....	471
Appendix J – TEPS plants	475
Appendix K – Analysis data by national forest	483
Appendix L – Cumulative effects	501
Appendix M – Fuel treatment data.....	512
Appendix N – Alternative F Preferred alternative management direction.....	519
Appendix O – Listing decision.....	532
Appendix P – Remand notice	546

Table of contents

Tables

1-1	Application of occupied/unoccupied habitat, and draft recovery area to units in the planning area	5
1-1	Administrative units and plans included in this analysis	10
2-1	Crosswalk between Alternative B, the Proposed Action, and the other action alternatives C, D & E	41
2-2	Comparing how the alternatives address the issues	107
2-3	Comparing how management concerns are addressed in the alternatives	115
2-4	Comparing how the LCAS risk factors are addressed in the Alternatives	117
2-5	Comparing how the alternatives affect lynx.....	126
2-6	Comparing how the alternatives affect other resources	128
3-1	Lynx habitat in the planning area	137
3-2	Winter snowshoe hare habitat in Montana.....	152
3-3	BA findings about whether existing plans are adequate to protect winter snowshoe hare habitat	154
3-4	Lynx habitat scheduled for precommercial thinning or fuel treatments over the next decade under Alternative A.....	155
3-5	Montana hare forage affected under Alternative A in a decade with full funding ...	157
3-6	Lynx habitat that could be thinned next decade under Alternative B.....	159
3-7	Hare forage affected under Alternative B in a decade with full funding - Montana	160
3-8	Lynx habitat that could be thinned next decade under Alternative C	162
3-9	Hare forage affected under Alternative C in a decade with full funding - Montana	163
3-10	Lynx habitat that could be thinned next decade under Alternative D	164
3-11	Hare forage affected under Alternative D in a decade with full funding - Montana	166
3-12	Lynx habitat that could be thinned next decade under Alternative E.....	167
3-13	Hare forage affected under Alternative E in a decade with full funding - Montana	168
3-14	Lynx habitat that could be thinned next decade under Alternative F	170
3-15	Hare forage affected under Alternative F in a decade with full funding - Montana	171
3-16	BA findings about whether existing plans provide for denning habitat.....	173
3-17	BA findings about whether existing plans manage snow-compacting activities.....	177
3-18	Forest road management plans in lynx habitat in the planning area.....	178
3-19	BA findings about whether existing plans manage habitat connectivity	182
3-20	Forest road management plans in lynx habitat.....	183
3-21	How the alternatives address the risk factors	187
3-22	Lynx habitat that could be affected by the major vegetative management activities over the next decade by alternative	189

Table of contents

3-23	Winter snowshoe hare habitat in young regenerating forests that could be affected by precommercial thinning in “unoccupied” units or isolated mountain ranges over the next decade under Alternative F, Scenario 2	195
3-24	Lynx habitat that could be affected by fuel treatment projects in affected “unoccupied” units or isolated mountain ranges over the next decade under Alternative F, Scenario 2	196
3-25	TEP species that could be affected by the proposed management direction.....	202
3-26	Sensitive species that could be affected by the proposed management direction	205
3-27	Sensitive species not affected, but with habitat in the planning area	206
3-28	MIS species that could be affected by the proposed management direction.....	209
3-29	MIS (not TEP or sensitive) not affected, but with habitat in planning area	209
3-30	Lynx habitat by forest type, fire regime & condition class in Montana.....	214
3-31	Acres within WUI and outside WUI, by State and lynx habitat	217
3-32	Ten year fuels program by state – in and out of WUI	218
3-33	Acres of winter snowshoe hare habitat by density and size in Montana and the distribution by area.....	219
3-34	Projected ten year fuel treatment program in the WUI.....	220
3-35	Projected ten year fuel treatment program outside the WUI.....	221
3-36	Fuel treatments in Montana possibly moved to avoid hare habitat in a decade.....	226
3-37	Acres of the 10 year hazardous fuel reduction program in lynx habitat that would be unconstrained	227
3-38	Planted western white pine precommercial thinning scheduled next decade	233
3-39	Whitebark pine precommercial thinning scheduled next decade	235
3-40	Quaking aspen precommercial thinning scheduled next decade.....	237
3-41	Western larch precommercial thinning scheduled next decade.....	239
3-42	Ponderosa pine precommercial thinning scheduled next decade.....	241
3-43	Lodgepole pine precommercial thinning scheduled next decade.....	243
3-44	Research & genetics precommercial thinning next decade at full funding.....	244
3-45	Scheduled precommercial thinning allowed by alternative next decade.....	245
3-46	Alternatives A & B precommercial thinning next decade	247
3-47	Alternatives C, D, E & F precommercial thinning next decade	248
3-48	Multistoried lynx habitat on NFS lands in Montana.....	251
3-49	Projects allowed in multistoried winter snowshoe hare habitat under Standard VEG S6.....	253
3-50	Grazing allotments overlapping lynx habitat.....	275
3-51	Growth in number of snowmobiles registered by state.....	281
3-52	Miles of designated & groomed winter routes & designated play areas	282
3-53	Number of recreation special use permits & agreements.....	282
3-54	Designated over-the-snow routes available for future grooming	284
3-55	Number of downhill & cross-country ski areas	290
3-56	Planned expansions or new ski areas during the next ten years	291
3-57	Highways in lynx linkage areas	294
3-58	Highways upgrading from two to four lanes.....	295
3-59	Miles of forest road in lynx habitat in the planning area.....	297
3-60	Future forest roads in lynx habitat in the planning area.....	298

Table of contents

3-61	Past and projected population of the analysis area	324
3-62	Year 2000 population race by state.....	325
3-63	Personal income by state, 1969 to 1999.....	329
3-64	Precommercial thinning* by alternative after a decade of average funding.....	331
3-65	Economic effects by alternative after a decade of average funding	332
3-66	Comparison of economic effects after a decade of average funding.....	332
3-67	Precommercial thinning* by alternative after a decade of full funding	333
3-68	Economic effects by alternative after a decade of full funding.....	333
3-69	Comparison of economic effects after a decade of full funding	334
3-70	Growth in number of snowmobiles registered by state.....	336
3-71	Spending in Montana by resident and non-resident snowmobilers in 1997-1998	337
3-72	Spending in Utah by resident snowmobilers in 1999-2000.....	338
3-73	Spending in Wyoming by non-resident snowmobilers in 2000-2001.....	338
3-74	Spending in Wyoming by snowmobile outfitter clients in 2000-2001.....	339

Figures

1-1	Northern Rockies Lynx PlanningArea	separate
1-2	US lynx geographic areas	11
3-1	Lynx photos	141
3-2	Vegetative structural stages and lynx habitat components.....	146
3-3	Describing high and low density winter snowshoe hare habitat	149
3-4	Winter snowshoe hare habitat in Montana.....	151
3-5a	Percent of winter snowshoe hare habitat in young regenerating forests affected by major activity	188
3-5b	Percent of winter snowshoe hare habitat in multistoried forests affected by fuel treatments	188
3-6	Over-the-snow recreation.....	285
3-7	Ski areas in the planning area	289
3-8	Average annual rate of job growth, 1969-1999	326
3-9	Average annual rate of earnings growth, 1969-1999	327
3-10	Unemployment rates.....	328
