

ATTACHMENT 2

Travel Management Plan – Route Specific Information

Introduction

The following tables detail the site-specific travel management decisions for each route on the White River National Forest. The intent of these tables is to disclose the Travel Management Plan decision by route. Individual travel routes are identified by number, and many by name, and are listed according to the ranger district in which they are located.

The Travel Management Plan made decisions for designated modes of travel for both summer and winter travel. These decisions are reflected in two distinct seasons for travel on the White River National Forest. There is a set of tables for the summer season and a set for the winter season. These tables should be used in conjunction with the Final Travel Management Plan maps.

Road and trail listing for summer season

Summer season is considered the snow-free season. Summer season begins May 21 (at 00:00) and ends November 22 (at 23:59).

Only roads and trails under the jurisdiction of the Forest Service are listed in this section. Roads and trails under the jurisdiction of county, state, or other federal agencies are not included.

Summer Table Column Definitions

Route

Route = the route number on file with the Forest Service. This number is used to label and track each Forest Service route.

Type

- ◆ R = road
- ◆ T = trail
- ◆ S = ski area route; these routes are within the ski area boundary and are managed by the ski areas
- ◆ N/A = neither road or trail; generally routes that are to be decommissioned

Summer Strategy

Categories of allowable uses in the Summer Strategies columns are titled in bold below:

- **Licensed Only** - Roads open to licensed motorized only (highway legal)
- **Licensed and Unlicensed** - Roads open to licensed and unlicensed (all vehicles)
- **Motorized Vehicles < 50"** Trails open to motorized vehicles less than 50 inches in width (ATV)
- **Motorcycles** - Trails open to 2-wheeled motor vehicles (motorcycles)
- **Mechanized (bicycles)** - Trails open to mechanized vehicles (bicycles)

- **Foot and Horse (animal)** - Trails open to animal (horse) and foot traffic only)
- **Foot** – Trails open to foot traffic only
- **Managed Under SUP** - Roads and trails managed under special use permits(SUP)
- **Closed to the Public** - Roads and trails closed to the public or decommissioned

Note:

- All motorized and mechanized modes of travel must be on designated routes.
- Highway legal vehicles are considered motor vehicles licensed under State law for general operation on all public roads within the state.
- Animal (horse) and foot (hike) are allowed to travel cross country (off trail) and generally on all routes. There are some routes that may limit animal (horse) or foot (hike) use for safety reasons.

Acceptable Modes of Travel

Designated means of use for a given route are depicted by an **X** in the appropriate Mode of Travel columns. Note: these tables should be used in conjunction with the Summer Strategy. Acceptable Modes of Travel include:

- **FSV** - full-sized motorized vehicles greater than 50" in width such as cars, trucks, jeeps, and side-by-sides
- **ATV** - motorized vehicles equal to or less than 50" in width such as ATVs
- **MCYCLE** - two-wheeled motorized vehicles such as motorcycles
- **MBIKE** - two-wheeled mechanized vehicles such as mountain bikes and bicycles
- **ANIMAL** - pack animals such as horses, mules and llamas
- **HIKE** - foot travel including hiking, running, and walking

Add / Decommission

- ◆ A **Y** in the **Add** column represents a route that is being added to the system. These routes were not part of the inventoried designated system and were previously considered unauthorized. These routes were examined for inclusion by alternative. See the Travel Management Plan Final EIS for a full discussion on unauthorized routes.
- ◆ An **X** or **Y** in the **Decom** column represents a route that is being decommissioned. These routes are to be decommissioned and rehabilitated. An **X** was used to identify routes that were previously decommissioned, though requires more work to be effective. A **Y** was used to identify routes system and non-system that were identified to be decommissioned. See the Travel Management Plan Final EIS for a full discussion on decommissioning routes.

Rationale (R1, R2, R3)

The rationale columns list the reason(s) for why a route is needed or not needed.

1. Status quo – currently a system route with current uses
2. To provide for user safety
3. To provide access for fire protection
4. To provide access to private land
5. To provide access to utility
6. To provide access to suitable timber

7. To facilitate public access
8. To accommodate user demands
9. To provide an opportunity in close proximity to residential areas
10. To provide for a particular recreation activity or activities (such as ATV, motorcycle, horseback riding, etc.)
11. To provide access to a recreation activity (such as dispersed camping, fishing, picnicking, etc.)
12. To provide access to a trailhead
13. To provide access to scenic views
14. To provide a loop opportunity
15. To provide a motorized, primitive recreation experience
16. To provide for a non-motorized, primitive recreation experience
17. To meet Forest Plan desired conditions, standards, guidelines, prescriptions
18. To maintain the desired ROS experience objective in terms of setting, type of activity, or capacity
19. To facilitate dispersal or uses
20. To provide a range of challenge levels
21. Historically used for a particular recreation activity
22. Needed for special-use, commercial use, livestock grazing management or outfitter-guide operation
23. Needed for firewood, or plant collection
24. To reduce user conflicts through separation of uses
25. Deadhead route that leads into a prescription that does not allow for the mode of transportation
26. The route no longer serves the purpose for which it was created
27. The route is not needed for administrative or recreation purpose
28. The White River National Forest does not have jurisdiction
29. No legal public access is available
30. Alternative access is available on a nearby road or trail
31. To meet the road density standards specified by management area prescription, watershed standards, or aquatic standards
32. To reduce disturbance to wildlife, amphibian, or fish habitat
33. To protect wildlife, amphibian, or fish habitat values
34. To protect seasonal wildlife habitat values
35. To protect the values of the special area (research natural areas; special interest areas; wild, scenic, recreational rivers; wilderness; roadless areas)
36. To protect wetlands, riparian areas, streams, and lakes
37. To protect cutthroat streams
38. To protect soils from erosion
39. To protect archaeological, heritage, or special plant site
40. To protect threatened, endangered, or sensitive (TES) plant species
41. To protect users from unsafe conditions
42. Local conflicts
43. Lack of administrative resources to administer
44. Access to Forest Service destination
45. Access to summer homes only, currently closed
46. Reduce impacts to alpine systems
47. Separate motor and non-motor users
48. Previous NEPA decision
49. Needed for rangeland and livestock management
50. Route does not currently exist
51. To reduce costs
52. Previously decommissioned
53. Vegetation and terrain make ATV not feasible
54. Connects to federal lands

55. Maintenance is cost prohibitive
56. Previously administratively closed and maintained as closed
57. Supports recreation strategy
58. Management
59. Dead-end spur
60. To allow for only those uses for which the route was designed
61. To allow only those uses permitted in Wilderness or recommended Wilderness
62. To provide for user safety and/or recreation management

Seasons (S)

The seasonal restrictions reflect those that occur every year at the same time.

7 = Elk calving	May 15 to June 20
8 = Elk migration fall	October 15 to November 30
9 = Elk migration spring	April 15 to June 20
10 = Elk winter concentration areas	December 1 to April 14
11 = Elk summer concentration areas	June 16 to October 14
12 = Restricted outside hunting season	October 15 to November 22 (open)

Fall and spring mud season was eliminated from the travel management plan as they are considered restrictions that would be in place only when necessary per weather related conditions i.e. mud, late snow, etc. Since these are not annual and dates would vary, the Travel Management Plan would not be the venue to institute these decisions. Rather these decisions can be made when needed by the District Ranger per 36 CFR 261.

Route listing for winter season

Winter motorized routes are listed in the tables. They correspond to the winter alternative maps. Routes open to motorized use are for over-snow motorized vehicles only. An over-snow motorized vehicle is defined as a vehicle that is designed for use over snow and runs on a track or tracks and/or ski or skis while in use over snow (36 CFR 212.1).

Any other vehicle other than those defined by 36 CFR 212 for winter use, including wheeled vehicles such as full-sized vehicles, all-terrain vehicles, motorcycles, mountain bikes, and mechanized vehicles, are prohibited, unless on a plowed or maintained road.

Generally there are no restrictions to non-motorized over-snow activities. Groomed routes for cross-country skiing may restrict other uses to keep routes intact.

Winter season is considered the snow season. Over-snow motorized travel begins November 23 (at 00:00) and ends May 20 (at 23:59).

Maps show where winter over-snow motorized use is open, restricted, or prohibited on the forest. For the restricted areas over-snow motorized use is only allowed on the routes shown. In the open to over-snow motorized use areas there are routes that snowmobilers use. Since these are open strategies (a snowmobile can go anywhere in the mapped area), there is no need to list them in the travel management plan.

Winter Routes

The routes listed as **Motorized** in this table are those that occur in the **RESTRICTED** strategy only.

- **Motorized** represents routes open to over-snow vehicles.
- **Plowed access** allows for wheeled motorized access.

This table is best used in conjunction with the winter travel management map.

Year-round restrictions to all uses

There is one area on the forest, east of Avalanche Creek, closed to all activities for the protection and health of the bighorn sheep that reside there.
