# APPENDIX E: EXISTING VEGETATION REFERENCES AND CODES 

February 2014
Existing Vegetation References

| Code | Name | Author |
| :---: | :--- | :---: |
| FSHR8 | Forest Service Handbook. Atlanta, Georgia. R8 FSH 2409.26d. <br> Silvicultural Examination and Prescription Handbook. R8 <br> Amendment No. 2409.26d-93-1. | USDA Forest Service |

## Existing FSHR8 Vegetation Codes

| Code | Description | Mgt <br> Type | Code | Description | Mgt <br> Type |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2 | Red pine | Y | 36 | Pond pine | Y |
| 3 | White pine | Y | 37 | Spruce pine |  |
| 4 | White pine-hemlock |  | 38 | Pitch pine | Y |
| 5 | Hemlock |  | 39 | Table Mountain pine | Y |
| 6 | Fraser fir |  | 40 | Hardwood-pond pine |  |
| 7 | Red spruce-frasier fir | Y | 41 | Cove hardwoods-white pine-hemlock | Y |
| 8 | Hemlock-hardwood | Y | 42 | Upland hardwoods-white pine | Y |
| 9 | White pine-cove hardwood | Y | 43 | Oak-Eastern redcedar |  |
| 10 | White pine-upland hardwood | Y | 44 | Southern red oak-yellow pine | Y |
| 11 | Eastern redcedar - hardwood |  | 45 | Chestnut oak-scarlet oak-yellow pine | Y |
| 12 | Shortleaf pine-oak | Y | 46 | Bottomland hardwood-yellow pine | Y |
| 13 | Loblolly pine-hardwood | Y | 47 | White oak-black oak-yellow pine | Y |
| 14 | Slash pine-hardwood | Y | 48 | Northern red oak-hickory-yellow pine | Y |
| 15 | Pitch pine-oak | Y | 49 | Bear oak-southern scrub oak-yellow pine | Y |
| 16 | Virginia pine-oak | Y | 50 | Yellow poplar | Y |
| 17 | Red spruce-northern hardwood |  | 51 | Post oak-black oak | Y |
| 18 | Pond pine-hardwood |  | 52 | Chestnut oak | Y |
| 19 | Sand pine-hardwood |  | 53 | White oak-northern red oak-hickory | Y |
| 20 | Table Mountain pine-hardwood | Y | 54 | White oak | Y |
| 21 | Longleaf pine | Y | 55 | Northern red oak | Y |
| 22 | Slash pine | Y | 56 | Yellow poplar-white oak-northern red oak | Y |
| 23 | Pondcypress | Y | 57 | Scrub oak | Y |
| 24 | Baldcypress | Y | 58 | Sweetgum-yellow poplar | Y |
| 25 | Yellow pine | Y | 59 | Scarlet oak | Y |
| 26 | Longleaf pine-hardwood | Y | 60 | Chestnut oak-scarlet oak | Y |
| 27 | Longleaf pine - slash pine |  | 61 | Swamp chestnut oak-cherrybark oak | Y |
| 28 | Shortleaf pine - loblolly pine |  | 62 | Sweetgum-oak | Y |
| 29 | Loblolly pine - longleaf pine |  | 63 | Sugarberry-American elm-green ash | Y |
| 30 | Longlead pine - shortleaf pine |  | 64 | Laurel oak-willow oak | Y |
| 31 | Loblolly pine | Y | 65 | Overcup oak-water hickory |  |
| 32 | Shortleaf pine | Y | 66 | Atlantic white cedar |  |
| 33 | Virginia pine | Y | 67 | Baldcypress-water tupelo | Y |
| 34 | Sand pine | Y | 68 | Sweetbay-swamp tupelo-red maple | Y |
| 35 | Eastern red- cedar | Y | 69 | Beech-magnolia | Y |

FSHR8 Existing Vegetation Codes (cont.)

| Code | Description | Mgt <br> Type | Code | Description | Mgt <br> Type |

| 73 | Cottonwood |  | 97 | Live oak |  |
| 74 | Willow |  | 98 | Undrained flatwoods |  |
| 75 | Sycamore-pecan-American elm | Y | 99 | Brush species |  |
| 76 | Silver maple-American elm |  | 800 | Novaculite Glade (includes talus) |  |
| 77 | Oak hammock |  | 801 | Cliff and Talus (Sandstone, Shale) |  |
| 78 | American chestnut |  | 802 | Glade and Barrens (Sandstone, Shale) |  |
| 79 | Slash pine - cypress | 803 | Calcareous Prairie |  |  |
| 80 | Upland oak |  | 804 | Seep/Spring |  |
| 81 | Sugar maple-beech-yellow birch | Y | 805 | Montane Oak | Ozark Clacareous Glade and Barren <br> (Ozark) |
| 82 | Black walnut |  | 807 | Sinkhole and Depression Pond (Ozark) |  |
| 83 | Black birch | 808 | Calcareous Cliff and Talus (Ozark) |  |  |
| 84 | Chestnut oak - white oak - scarlet <br> oak |  | 806 |  |  |
| 85 | White oak - black oak - hickory |  | 809 | Prarie and Woodland (Ozark) |  |

The Existing Vegetation type code is a classification of the forest overstory cover type currently existing on the stand. These codes are also used to identify management type. Existing Vegetation type is based on one or more species of trees that comprise the main crown canopy (i.e., the dominants and co-dominants). These codes generally conform to definitions in "Forest Cover Types of the United States and Canada," Society of American Foresters (1980) with some notable exceptions. They are divided into four broad groups as follows:

Pine Types: Stands in which 70 percent or more of the basal area of trees with dominant and codominant crowns are softwoods, the specific name represents the species comprising the plurality.

Pine-Hardwood Types: Stands in which 51-69 percent of the basal area of trees with dominant and co-dominant crowns are softwood species. Use the type name associated with the softwood species comprising the plurality.

Hardwood-Pine Types: Stands in which 51-69 percent of the basal area of trees with dominant and co-dominant crowns are hardwoods. Use the type name associated with the hardwood species comprising the plurality.

Hardwood Types: Stands in which 70 percent or more of the basal area of trees with dominant and co-dominant crowns are hardwoods. Use the type name associated with the hardwood species comprising the plurality.

The SAF cover type classification requires a stand to exceed 80 percent in one species to be considered pure as opposed to the 70 percent threshold used in the Region 8 classification. The SAF cover type classification considers all mixtures of pine and hardwood that have less than 80 percent stocking of one species group as pine hardwood types. The Region 8 approach divides the group into Pine-Hardwood and Hardwood-Pine.

The percentage of softwood and hardwood in the Region 8 classification applies to the particular mixture of trees at any single sample point. This is not the same as, and should not be confused with intermingling of less-than-stand size areas of pine type in a hardwood stand or of a hardwood type in a pine stand. These less-than-stand-size areas should be treated as pine inclusions in hardwood stands or hardwood inclusions in pine stands. In heterogenous areas with neither type being of stand size, forest type should be assigned on the basis of the type occupying the plurality of the area. Such situations should not be assigned a pine-hardwood or hardwood-pine forest type unless individual plot classifications for a plurality of the area are a mixed type.

Management Type: Existing Vegetation codes are used to identify management type. The management type classification reflects the vegetation type that should be produced on the site to best meet the goals and objectives of the Forest Plan. For areas classified as suitable for timber production and allocated to management prescriptions with timber production management emphasis, the management type is the vegetation type that optimizes the productive capability of the site to produce high quality material. These same criteria also apply to all other areas unless the Forest Plan requires occupying the site with another, less productive vegetation type, to meet some other resource goal or objective.

Assigning a Management Type code to a stand implies that you expect the Existing Vegetation type to be this code after the next regeneration. For example: 74 Willow is not an acceptable Management Type because we would not regenerate a stand and expect to see Willow as the resulting Existing Vegetation Type.

Note: CISC used four levels of Management Type. Those levels have been removed from use as of the transition to FSVeg. If this causes a problem for you, please let me know.

David Belcher

## APPENDIX F: POTENTIAL VEGETATION REFERENCES

Region 8 does not support the use ofPotential Vegetation References.

## APPENDIX G: POTENTIAL VEGETATION CODES

Region 8 does not support Potential Vegetation Codes.

## APPENDIX I: FIXED RADIUS PLOT

1. Correct the fixed plot radius for slope percent using the "Circular Plot Radii Corrected for Slope" table and then measuring distances parallel to the ground line. This method always results in a circular plot on the slope.

Example - $1 / 300$ acre fixed plot on 50 percent slope. Corrected fixed plot radius is 7.2 feet.

Circular Plot Radii Corrected for Slope
Plot Size in Acres

| SLOPE \% | $\mathbf{1 / 3 0 0}$ | $\mathbf{1 / 1 0 0}$ | $\mathbf{1 / 5 0}$ | $\mathbf{1 / 2 0}$ | $\mathbf{1 / 1 0}$ | $\mathbf{1 / 5}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $0-9$ | 6.8 | 11.8 | 16.7 | 26.3 | 37.2 | 52.7 |
| $\mathbf{1 0 - 1 7}$ | 6.8 | 11.8 | 16.7 | 26.5 | 37.4 | 52.9 |
| $18-22$ | 6.9 | 11.9 | 16.8 | 26.6 | 37.6 | 53.2 |

Circular Plot Radii Corrected for Slope (cont.)
Plot Size in Acres

| SLOPE \% | $\mathbf{1 / 3 0 0}$ | $\mathbf{1 / 1 0 0}$ | $\mathbf{1 / 5 0}$ | $\mathbf{1 / 2 0}$ | $\mathbf{1 / 1 0}$ | $\mathbf{1 / 5}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 135 | 8.8 | 15.3 | 21.6 | 34.1 | 48.3 | 68.3 |
| 140 | 8.9 | 15.4 | 21.8 | 34.5 | 48.8 | 69.1 |
| 145 | 9.0 | 15.6 | 22.1 | 34.9 | 49.4 | 69.9 |
| 150 | 9.1 | 15.8 | 22.3 | 35.3 | 50.0 | 70.7 |

2. Determine the slope limiting distance to borderline trees by using the "Slope Correction Table" (The slope being corrected is the slope from plot center to the tree, not the overall plot slope.). Measure the distance parallel to the ground line to the borderline tree. This method always results in an oval plot on the slope. Following is a list of fixed plot sizes and the specific radius for each:

| Plot Size | Plot Radius | Plot Size | Plot Radius | Plot Size | Plot Radius |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $1 / 1000$ | 3.7 feet | $1 / 250$ | 7.4 feet | $1 / 5$ | 52.7 feet |
| $1 / 500$ | 5.3 feet | $1 / 150$ | 9.6 feet | $1 / 4$ | 58.9 feet |
| $1 / 400$ | 5.9 feet | $1 / 100$ | 11.8 feet | $1 / 3$ | 68.0 feet |
| $1 / 300$ | 6.8 feet | $1 / 50$ | 16.7 feet | $1 / 2$ | 83.3 feet |
| $1 / 250$ | 7.4 feet | $1 / 20$ | 26.3 feet | 1 | 117.8 feet |
| $1 / 200$ | 8.3 feet | $1 / 10$ | 37.2 feet |  |  |
|  |  |  |  |  |  |

To determine the slope limiting distance, multiply the plot radius for the appropriate plot size by the appropriate slope correction factor.

## Slope Correction Table

| Percent <br> of Slope | Degree <br> of Slope | Correction <br> Factor | Percent <br> of Slope | Degree <br> of Slope | Correction <br> Factor | Percent <br> of Slope | Degree <br> of Slope | Correction <br> Factor |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| 46 | 124.6 | 124.8 | 125.1 | 125.4 | 125.7 | 125.9 | 126.2 | 126.5 | 126.7 | 127.0 |
| 47 | 127.3 | 127.5 | 127.8 | 128.1 | 128.4 | 128.6 | 128.9 | 129.2 | 129.4 | 129.7 |
| 48 | 130.0 | 130.3 | 130.5 | 130.8 | 131.1 | 131.3 | 131.6 | 131.9 | 132.2 | 132.4 |
| 49 | 132.7 | 133.0 | 133.2 | 133.5 | 133.8 | 134.0 | 134.3 | 134.6 | 134.9 | 135.1 |
| 50 | 135.4 | 135.7 | 135.9 | 136.2 | 136.5 | 136.8 | 137.0 | 137.3 | 137.6 | 137.8 |

Prepared by multiplying the BAF 10 Plot Radius Factor 2.708 * DBH
For example, if DBH $=14.3$ inches, then $14.3 * 2.708=38$.

Prepared by multiplying the BAF 60 Plot Radius Factor 1.081 * DBH.
For Example, if DBH = 14.3 inches, then 14.3 * $1.081=15.5$ feet.

Table J-6: Limiting Distance to Face of Tree and Slope Correction Factors for Various Basal Area Factors
This table provides an expanded list of slope correction factors to the face of the tree for use with various basal area factors. To use the table, measure the slope and the distance from plot-center to the face of the tree at DBH. To obtain the corrected limiting distance to a tree multiply the trees DBH by the "combined factor" shown under the appropriate BAF heading.

| \% of Slope | Slope Correction Factor | Combined Factor |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 5 BAF | 10 BAF | 15 BAF | 20 BAF | 30 BAF | 40 BAF |

## APPENDIX K: DAMAGE CATEGORIES, AGENTS, SEVERITY RATINGS, AND TREE PARTS

## Damage Categories

| Code | Description |
| :---: | :--- |
| 10 | General Insects |
| 11 | Bark Beetles |
| 12 | Defoliators |
| 13 | Chewing Insects |
| 14 | Sucking Insects |
| 15 | Boring Insects |
| 16 | Seed/Cone/Flower/Fruit Insects |
| 17 | Gallmaker Insects |
| 18 | Insect Predators |
| 19 | General Diseases |
| 20 | Biotic Damage |
| 21 | Root/Butt diseases |
| 22 | Stem Decays/Cankers |
| 23 | Parasitic/Epiphytic Plants |
| 24 | Decline Complexes/Dieback/Wilts |
| 25 | Foliage Diseases |
| 26 | Stem Rusts |
| 27 | Broom Rusts |
| 30 | Fire |
| 40 | Animal damage, source unknown |
| 41 | Wild animals |
| 42 | Domestic Animals |
| 50 | Abiotic Damage |
| 60 | Competition |
| 70 | Human Activities |
| 71 | Harvest |
| 80 | Multi-Damage (Insect-Disease) |
| 90 | Unknown |
| 99 | Physical Effects |

## Damage Agents

| Category | Agent | Common Name | Scientific Name |
| :---: | :---: | :---: | :---: |
| 10 | 000 | General Insects |  |
| SEVERITY RATING |  |  |  |
| $\begin{aligned} & 1=\text { minor } \\ & 2=\text { severe } \end{aligned}$ |  |  |  |
|  | 001 | Thrips |  |
|  | 002 | Tip moth |  |
|  | 003 | Wasp |  |
|  | 007 | Clerid beetle | Cleridae |
|  | 008 | Weevil | Curculionidae |
|  | 011 | Ant | Formicidae |
|  | 017 | Bagworm moth | Psychidae |
| 11 | 000 | Bark Beetles |  |
| SEVERITY RATING |  |  |  |
| 1 = Unsuccessful bole attack: pitchout and beetle brood absent <br> 2 = Strip attacks: galleries and brood present <br> 3 = Successful bole attack: galleries and brood present <br> 4 = Topkill <br> 5 = Successful attack last year <br> 6 = Older dead |  |  |  |
|  | 003 | Southern pine beetle | Dendroctonus frontalis |
|  | 011 | Black turpentine beetle | Dendroctonus terebrans |
|  | 012 | Red turpentine beetle | Dendroctonus valens |
|  | 018 | Native elm bark beetle | Hylurgopinus rufipes |
|  | 020 | Small southern pine engraver | Ips avulsus |
|  | 021 | Sixspined ips | Ips calligraphus |
|  | 023 | Southern pine engraver beetle | Ips grandicollis |
|  | 030 | Ips engraver beetles | Ips spp. |
|  | 035 | Cedar bark beetles | Phloeosinus spp. |
|  | 037 | Tip beetles | Pityogenes spp. |
|  | 039 | Twig beetles | Pityophthorus spp. |
|  | 045 | Small European elm bark beetle | Scolytus multistriatus |
|  | 047 | Hickory bark beetle | Scolytus quadrispinosus |
|  | 053 | Four-eyed bark beetle | Polygraphus spp. |
|  | 055 | Spruce ips | Ips pilifrons |
|  | 056 | Mexican pine beetle | Dendroctonus mexicanus |

Damage Agents (cont.)

| Category | Agent | Common Name | Scientific Name |
| :---: | :---: | :---: | :---: |
| 12 | 000 | Defoliators |  |
| SEVERITY RATING |  |  |  |
| 1 = Light defoliation (1-25\%), no topkill |  |  |  |
| 2 = Light defoliation (1-25\%), topkill $\leq 10 \%$ |  |  |  |
| $3=$ Light defoliation (1-25\%), topkill $>10 \%$ |  |  |  |
| 4 = Moderate defoliation (26-75\%), no topkill |  |  |  |
| $5=$ Moderate defoliation (26-75\%), topkill $\leq 10 \%$ |  |  |  |
| $6=$ Moderate defoliation (26-75\%), topkill $>10 \%$ |  |  |  |
| 7 = Heavy defoliation (76-100\%), no topkill |  |  |  |
| 8 = Heavy defoliation (76-100\%), topkill $\leq 10 \%$ |  |  |  |
| 9 = Heavy defoliation (76-100\%), topkill $>10 \%$ |  |  |  |
|  | 002 | Leaftier |  |
|  | 003 | Looper |  |
|  | 004 | Needleminer |  |
|  | 005 | Sawfly |  |
|  | 006 | Skeletonizer |  |
|  | 007 | Larger elm leaf beetle | Monocesta coryli |
|  | 008 | Spanworm |  |
|  | 009 | Webworm |  |
|  | 013 | Whitefly | Aleyrodoidae |
|  | 014 | Fall cankerworm | Alsophila pometaria |
|  | 018 | Oak worms | Anisota spp. |
|  | 019 | Orange-striped oakworm | Anisota senatoria |
|  | 021 | Fruit tree leafroller | Archips argyrospila |
|  | 028 | Texas leafcutting ant | Atta texana |
|  | 029 | Oak skeletonizer | Bucculatrix ainsliella |
|  | 031 | Scarlet oak sawfly | Caliroa quercuscoccineae |
|  | 034 | Maple petiole borer | Caulocampus acericaulis |
|  | 044 | Cottonwood leaf beetle | Chrysomela scripta |
|  | 045 | Leafhopper | Cicadellidae |
|  | 053 | Sycamore lace bug | Corythucha ciliata |
|  | 054 | Lace bugs | Corythucha spp. |
|  | 055 | Oak leaftier | Croesia semipurpurana |
|  | 057 | Walnut caterpillar | Datana integerrima |
|  | 058 | Yellownecked caterpillar | Datana ministra |
|  | 059 | Walkingstick | Diapheromera femorata |
|  | 061 | Introduced pine sawfly | Diprion similis |
|  | 062 | Greenstriped mapleworm | Dryocampa rubicunda |
|  | 064 | Elm spanworm | Ennomos subsignaris |
|  | 065 | Maple trumpet skeletonizer | Epinotia aceriella |
|  | 067 | Linden looper | Erannis tiliaria |
|  | 072 | Geometrid moth | Geometridae |
|  | 075 | Pale tussock moth | Halisidota tessellaris |
|  | 078 | Buck moth | Hemileuca maia |
|  | 079 | Saddled prominent | Heterocampa guttivitta |

Damage Agents (cont.)

| Category | Agent | Common Name | Scientific Name |
| :---: | :---: | :---: | :---: |
| 12 (cont.) | 080 | Variable oakleaf caterpillar | Heterocampa manteo |
|  | 081 | Cherry scallop shell moth | Hydria prunivorata |
|  | 082 | Fall webworm | Hyphantria cunea |
|  | 083 | Hemlock looper | Lambdina fiscellaria |
|  | 085 | Tent caterpillar moth | Lasiocampidae |
|  | 089 | Gypsy moth | Lymantria dispar |
|  | 090 | Cottonwood leafminers | Lyonetia spp. |
|  | 092 | Rose chafer | Macrodactylus subspinosus |
|  | 093 | Eastern tent caterpillar | Malacosoma americanum |
|  | 096 | Forest tent caterpillar | Malacosoma disstria |
|  | 098 | Leafcutting bees | Megachilidae |
|  | 099 | Blister beetle | Meloidae |
|  | 102 | Willow sawfly | Nematus spp. |
|  | 105 | Blackheaded pine sawfly | Neodiprion excitans |
|  | 107 | Redheaded pine sawfly | Neodiprion lecontei |
|  | 110 | White pine sawfly | Neodiprion pinetum |
|  | 112 | Virginia pine sawfly | Neodiprion pratti pratti |
|  | 114 | Loblolly pine sawfly | Neodiprion taedae linearis |
|  | 119 | Locust leafminer | Odontota dorsalis |
|  | 122 | Whitemarked tussock moth | Orgyia leucostigma |
|  | 125 | Spring cankerworm | Paleacrita vernata |
|  | 127 | Maple leafcutter | Paraclemensia acerifoliella |
|  | 130 | Half-wing geometer | Phigalia titea |
|  | 138 | Japanese beetle | Popillia japonica |
|  | 141 | Elm leaf beetle | Pyrrhalta luteola |
|  | 143 | Giant silkworm moth | Saturniidae |
|  | 144 | Redhumped caterpillar | Schizura concinna |
|  | 151 | Maple webworm | Tetralopha asperatella |
|  | 152 | Pine webworm | Tetralopha robustella |
|  | 154 | Bagworm | Thyridopteryx ephemeraeformis |
|  | 155 | Leafroller/seed moth | Tortricidae |
|  | 161 | Cypress looper | Anacamptodes pergracilis |
|  | 162 | Cottonwood leaf beetle | Chrysomela spp. |
|  | 163 | Pine colaspis | Colaspis pini |
|  | 180 | Tent caterpillar | Malacosoma spp. |
|  | 181 | Abbot's sawfly | Neodiprion abbotii |
|  | 182 | Slash pine sawfly | Neodiprion merkell |
|  | 183 | Sand pine sawfly | Neodiprion pratti |
|  | 185 | Cypress leaf beetle | Systena marginalis |
|  | 190 | Hickory tussock moth | Halisidota caryae |
|  | 191 | Pin oak sawfly | Caliroa lineata |
|  | 192 | Palmerworm | Dichomeris ligulella |
|  | 193 | Pitch pine looper | Lambdina athasaria pellucidaria |
|  | 194 | Red pine sawfly | Neodiprion nanulus nanulus |
|  | 195 | Pine tip moth | Argyrotaenia pinatubana |

## Damage Agents (cont.)

| Category | Agent | Common Name | Scientific Name |
| :---: | :---: | :--- | :--- |
| $\mathbf{1 2}$ (cont.) | 196 | Baldcypress leafroller | Archips goyerana |
|  | 197 | Winter moth | Operophtera |
|  | 198 | Basswood thrips | Neohydatothrips |
|  | 199 | Noctuid moth | Xylomyges simplex (walker) |
|  | 200 | Pyralid moth | Palpita magniferalis |
|  | 201 | Pacific silver fir budmoth | Zeiraphera sp. destitutana |
| $\mathbf{1 3}$ | $\mathbf{0 0 0}$ | Chewing Insects |  |
| $\mathbf{S E V E R}$ |  |  |  |

## SEVERITY RATING

1 = Minor: bottlebrush or shortened leaders, 0-2 forks on stem, OR $<20 \%$ of branches affected 2 = Severe: 3 or more forks on bole, OR $20 \%$ or more branches affected, OR terminal leader dead

|  | 001 | Grasshopper |  |
| :--- | :--- | :--- | :--- |
|  | 002 | Shorthorn grasshoppers | Acrididae |
|  | 006 | Cicadas | Cicadidae |
|  | 009 | Whitefringed beetles | Graphognathus spp. |
|  | 010 | Pales weevil | Hylobius pales |
|  | 012 | Periodical cicada | Magicicada septendecim |
|  | 028 | Pitch-eating weevil | Pachylobius picivorus |
|  | 029 | Deodar weevil | Pissodes nemorensis |
|  | 030 | Adana tip moth | Rhyacionia adana |
| $\mathbf{1 4}$ | $\mathbf{0 0 0}$ | Sucking Insects |  |
| $\mathbf{~}$ |  |  |  |

## SEVERITY RATING

1 = Minor: bottlebrush or shortened leaders, 0-2 forks on stem, OR <20\% of branches affected 2 = Severe: 3 or more forks on bole, OR $20 \%$ or more branches affected, OR terminal leader dead

|  | 001 | Scale insect |  |
| :--- | :--- | :--- | :--- |
|  | 003 | Balsam woolly adelgid | Adelges piceae |
|  | 004 | Hemlock woolly adelgid | Adelges tsugae |
|  | 006 | Aphid | Aphididae |
|  | 007 | Pine spittlebug | Aphrophora parallela |
|  | 011 | Wax scale | Ceroplastes spp. |
|  | 012 | Pine needle scale | Chionaspis pinifoliae |
|  | 015 | White pine aphid | Cinara strobi |
|  | 016 | Beech scale | Cryptococcus fagisuga |
|  | 018 | Woolly apple aphid | Eriosoma lanigerum |
|  | 020 | Elongate hemlock scale | Fiorinia externa |
|  | 022 | Pine thrips | Gnophothrips spp. |
|  | 024 | Honeysuckle aphids | Hyadaphis tataricae |
|  | 026 | Lecanium scale | Lecanium spp. |
|  | 027 | Common falsepit scale | Lecanodiaspis prosopidis |
|  | 028 | Oystershell scale | Lepidosaphes ulmi |
|  | 035 | Treehoopers | Membracidae |
|  | 037 | Balsam twig aphid | Mindarus abietinus |
|  | 040 | Spruce spider mite | Oligonychus ununquis |
|  | 041 | Twig girdler | Oncideres cingulata |

Damage Agents (cont.)

| Category | Agent | Common Name | Scientific Name |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 4}$ (cont.) | 042 | Woolly alder aphid | Paraprociphilus tessellatus |
|  | 043 | Maple aphids | Periphyllus spp. |
|  | 046 | Pine leaf adelgid | Pineus pinifoliae |
|  | 047 | White pine adelgid | Pineus spp. |
|  | 048 | Pine bark adelgid | Pineus strobi |
|  | 050 | Mealybug | Pseudococcidae |
|  | 051 | Cottony maple scale | Pulvinaria innumerabilis |
|  | 059 | Mulberry whitefly | Tetraleurodes mori |
|  | 060 | Tuliptree scale | Toumeyella liriodendri |
|  | 061 | Pine tortoise scale | Toumeyella parvicornis |
|  | 065 | Casuarina spittlebug | Clastoptera undulata |
|  | 066 | Giant bark aphid | Longistigma caryae |
|  | 067 | Woolly pine scale | Pseudophilippia quaintancii |
|  | 069 | Elm scurfy scale | Chionaspis americana |
| $\mathbf{1 5}$ | $\mathbf{0 0 0}$ | Boring Insects |  |
| SEVERITY RATING |  |  |  |

1 = Minor: bottlebrush or shortened leaders, 0-2 forks on stem, OR <20\% of branches affected 2 = Severe: 3 or more forks on bole, OR $20 \%$ or more branches affected, OR terminal leader dead

|  | 001 | Shoot borer |  |
| :--- | :--- | :--- | :--- |
|  | 002 | Termite |  |
|  | 004 | Bronze birch borer | Agrilus anxius |
|  | 005 | Twolined chestnut borers | Agrilus bilineatus |
|  | 007 | Carpenter bees | Apidae |
|  | 008 | Flatheaded borer | Buprestidae |
|  | 010 | Carpenter ants | Camponotus spp. |
|  | 011 | Gouty pitch midge | Cecidomyia piniinopis |
|  | 016 | Columbian timber beetle | Corthylus columbianus |
|  | 017 | Pitted ambrosia beetle | Corthylus punctatissimus |
|  | 018 | Carpenterworm moths | Cossidae |
|  | 019 | Poplar and willow borer | Cryptorphynchus lapathi |
|  | 023 | Oak twig pruners | Elaphidionoides spp. |
|  | 024 | Twig pruner | Elaphidionoides villosus |
|  | 025 | Lesser cornstalk borer | Elasmopalpus lignosellus |
|  | 026 | Red oak borer | Enaphalodes rufulus |
|  | 031 | Sugar maple borer | Glycobius speciosus |
|  | 032 | Goes borers | Goes spp. |
|  | 033 | Pine root collar weevil | Hylobius radicis |
|  | 034 | Warren's collar weevil | Hylobius warreni |
|  | 035 | Powderpost beetle | Lyctidae |
|  | 036 | Tarnished plant bug | Lygus lineolaris |
|  | 038 | White pine bark miner | Marmara fasciella |
|  | 039 | Locust borer | Megacyllene robiniae |
|  | 042 | Whitespotted sawyer | Monochamus scutellatus |
|  | 043 | Redheaded ash borer | Neoclytus acuminutus |

Damage Agents (cont.)

| Category | Agent | Common Name | Scientific Name |
| :---: | :---: | :---: | :---: |

| Plot Elevation | $\pm 2$ Contour Intervals |
| Existing Vegetation | No Errors |
| Potential Vegetation | Accurate to series understory union and phases |
| Plot History | No Errors |
| Plot History Date | Year required if field 12 is other than code 10 or <br> blank |
| Fuel Model | No Errors |
| Residual Descriptive Code | No Errors |
| Distance to Seed wall | $\pm 100$ feet |
| Plot Remarks |  |

## Tree Data

Tree Data (cont.)

| Field |  | Tolerance |
| :---: | :---: | :---: |
| Tree Age | $\pm 10 \%$ (Based on actual tree ring count at breast height for trees <br> $\geq 3.0$ " DBH otherwise based on total age recorded.) |  |
| Crown Ratio | $\pm 10$ \% |  |
| Crown Class | No Errors |  |
| Crown width | No Errors |  |
| Wildlife Use | No Errors |  |
| Log/Snag Decay | No Errors |  |
| Cone Serotiny | No Errors |  |
| Damage Category | No Errors |  |
| Damage Category | Damage Category Description | Tolerance |
| 11 | Bark Beetles | No misses on live trees with a severity of 2 or greater. |
| 12 | Defoliators | No misses on live trees with a severity of 3 or greater. |
| 13-17 | Other Insects | No misses of shoot moths or weevils on live trees. |
| 21 | Root/Butt Diseases | No misses on live trees with a severity of 2 or greater. |
| 22 | Stem Decays/Cankers | No misses on live trees with a severity of 3 or greater. |
| 25 | Foliage Diseases | No misses on Elytroderma on live trees. |
| 41-42 | Animal Damage | No misses on live trees with terminal leader damage or with greater than $1 / 4$ of bole circumference affected. |
| 50 | Abiotic Damage | No misses on wind, snow, or ice bending, breakage, or bole cracks and frost damage to shoots on trees less than 1-inch diameter and lightning. |
| 70 | Human Damage | No misses on live trees for logging damage or fire if the damage affects greater than $1 / 4$ of the bole circumference or if an open wound is in contact with the ground. |
| Damage Agent |  |  |
| Damage Part |  |  |
| Damage Severity |  |  |
| Tree Remarks |  |  |

## Ground Surface Cover

| Field | Tolerance |
| :--- | :--- |
| Plot Number | No Errors |
| Cover Type | No Errors |
| Cover Percent | $\pm 10$ Percent |

## Vegetation Composition

| Field | Tolerance |
| :--- | :--- |
| Plot Number | No Errors |
| Live /Dead | No Errors |
| Layer | No Errors |
| Life form | No Errors |
| Species | No Error in species level identification for dominant, common or <br> community type indicator plants. No plant name can be repeated within <br> a layer. |
| Minimum Height | $\pm 10 \%$ of Height |
| Average Height | $\pm 10 \%$ of Height |
| Maximum Height | $\pm 10 \%$ of Height |
| Canopy Cover | $\pm 10$ Percent |
| Average Diameter | No Errors |
| Maturity | No Errors |
| Cover Remarks |  |
| User Field |  |

## Down Woody

| Field |  |
| :--- | :--- |
| Plot Number | No Errors |
| First Duff | $\pm 1 / 2$ inch |
| Second Duff | $\pm 1 / 2$ inch |
| Fuel Depth | No Errors |
| Twigs 0 -.24 | $\pm 40 \%$ |
| Twigs .25-.99 | $\pm 30 \%$ |
| Branch 1.0-2.99 | $\pm 20 \%$ |
| Volume 1 |  |
| Weight 1 |  |
| Volume 2 |  |
| Weight 2 |  |
| Volume 3 |  |
| Weight 3 |  |
| Volume 4 |  |
| Weight 4 |  |
| Piece Count | No missed pieces |
| Decay Class | No Errors |
| Diameter | $\pm 1$ inch on measurements |
| Piece Length | No Errors |

## APPENDIX M: GLOSSARY OF TERMS

| Term | Definition |
| :---: | :---: |
| Aspect | A position facing or commanding a given direction; exposure. Aspect is the compass direction of the prevailing slope with respect to true north. |
| Azimuth | A horizontal angular measure from true north to an object of interest. |
| Basal Area | The cross-sectional area of the stem or stems of a plant or of all plants in a stand, generally expressed as square units per unit area. For trees, measured at 4.5 feet above ground, for forbs and grasses, measured at the root crown. |
| Bole Length | The straight-line distance measured parallel to the main bole of a tree, from its base to its tip. |
| Breast Height | A point located on the uphill side of the main stem, by measuring 4.5 feet along the uphill side of the bole from ground level or the predominant root collar. Preclude slight, non-compacted litter accumulations when establishing breast height. |
| CALVEG | Classification and Assessment with LANDSAT of Visible Ecological Groupings. It is a California-wide system for classifying vegetative and non-vegetative cover types. The primary cover type relates to life form and uses a 3-character alpha code. |
| Canopy Cover | The percent of a fixed area covered by the crown of an individual plant species or delimited by the vertical projection of its outermost perimeter; small openings in the crown are included. |
| Compacted Live Crown Ratio | The percent of the total height of the tree that supports a full, live crown. For trees that have uneven length crowns, occularly transfer lower branches to fill holes in the upper portions of the crown, until a full, even crown is created. |
| Compartment | A land area, usually between 3,000 and 8,000 acres, easily identified on the ground by physical features. A compartment is comparable in size to a sub-watershed, or landscape management unit. It is used as a convenience for maintaining stand records and planning vegetation management projects. |
| Crown Class | The relative position of the tree or shrub crown with respect to the competing vegetation around it. Crown class for each tree or shrub is judged in the context of its immediate environment, that its, those trees or shrubs which are competing for sunlight with the subject tree or shrub. |
| Crown Length | The vertical distance from the top of the leader to the base of the crown, measured to the lowest live branch-whorl with live branches in at least 3 quadrants, and continuous with the main crown. |
| Crown Ratio | The ratio of compacted live crown length to bole length. Lengths are measured parallel to the bole from the base of the tree to the tip. |
| DEM | Digital Elevation Model. USGS geographic elevation data distributed in raster form. Digital representation of the shape of the earth's surface. Typically, digital elevation data consists of arrays of values that represent topographic elevations measured at equal intervals on the Earth's surface. |

## Glossary of Terms (cont.)

| Term | Definition |
| :---: | :---: |
| Diameter | The length of a straight-line segment passing through the center of an item and terminating at its periphery. |
| Diameter at Breast Height (DBH) | A measure at breast height ( 4.5 feet), outside bark, of the tree bole, perpendicular to the tree bole. |
| Diameter at Root Collar (DRC) | The straight line passing through the center of a cross section of a bole measured at the root collar of a shrub or tree. |
| Down Log | Stem material (conifer or hardwood) that is lying on the ground. If a stem material is leaning more than 45 degrees from vertical, is not selfsupporting, and/or in contact with the ground, it is considered a down log. |
| Down Woody Material | Woody pieces of trees and shrubs that have been uprooted (no longer supporting growth) or severed from their root system, not selfsupporting, and are lying on the ground. |
| Duff Layer | Duff is the fermentation and humus layer of the forest floor. It does not include the freshly cast material in the litter layer. The top of the duff is where needles, leaves, and other cast-off vegetative material have noticeably begun to decompose. Individual particles usually will be bound by fungi mycelium. When moss is present, the top of the duff is just below the green portion of the moss. The bottom of the duff is the start of the soil ("A" horizon). |
| Elevation | Vertical distance from a datum, usually mean sea level, to a point or object on the earth's surface. Not to be confused with altitude, which refers to points above the earth's surface. |
| Fuel Bed | The fuel bed is the accumulation of dead, woody residue on the forest floor. It begins at the top of the duff layer and above. It includes litter, dead limbwood and bolewood from tree species, as well as dead material from shrub, herbaceous, and grass species. |
| Fuel Model | Mathematical descriptions of fuel properties (e.g., fuel load and fuel depth) that are used as inputs to calculations of fire danger indices and fire behavior potential. |
| GPS | Global Positioning System. A network of radio-emitting satellites deployed by the U.S. Department of Defense. Ground-based GPS receivers can automatically derive accurate surface coordinates for all kinds of GIS, mapping, and surveying data collection. |
| Ground Level | The forest floor, made up by soil and duff layer. It does not include unincorporated woody debris that may rise above the ground line. In reference to a point of measure, it is the highest point of the ground touching the base of the object being referenced. |
| Group Talley | A count of one or more items of the same type or species and recorded as a single line entry. |
| Growth | A measure of the increase in growth layers for a specified time frame. |
| Height Growth | The increase in height over a set period of time. |
| Intersect Diameter | Measurement of diameter at a point where the sampling plane intersects the geometric center of the object being tallied. No adjustment is made for stem irregularities at the point of intersection. |

Glossary of Terms (cont.)

| Term | Definition |
| :--- | :--- |
| Lean (Tree) | The deflection from vertical, > 15 degrees of a straight line passing <br> through the geometric center of the base and top of the main stem. |
| Length | The measurement of the extent of something along its greatest <br> dimension. |
| Life Form | Species and individuals that are grouped into classes on the basis of their <br> similarities in structure and function. A growth form that displays an <br> obvious relationship to important environmental factors. |
| Limiting Distance | A comparative measurement between the subplot radius and the <br> distance from the subplot center to the center of the object. The <br> comparison is used to determine whether the object is IN or OUT of the <br> fixed area subplot. <br> IN - The object is "in" if the measured distance is equal to or less than the <br> subplot radius. <br> 0UT - The object is "out" if the measured distance is greater than the <br> subplot radius. |
| Live Crown Length | The straight-line distance measured parallel to the main bole of a tree, <br> from the top of the live crown to the base of the live crown. |
| Ownership | The identification of the legal owner/administrator on both the surface <br> and subsurface estates. |
| Plant Species | The major subdivision of a genus or subgenus of a plant being described <br> or measured. |
| Plot Configuration | The size and shape of the sampling unit (plot) and the spatial <br> arrangement of subplots within that unit. |
| Plot | A sub-sample of a plot or stand exam. This is the unit on which data are <br> recorded to individual trees, snags, logs, understory vegetation, and fuels. <br> Data can be collected on either a fixed area or variable radius area. |
| Sroclaimed Forest | Units of the National Forest System as originally proclaimed or <br> designated by Congress. |
| Quadratic Mean | The diameter of the tree of average basal area. <br> Diameter |
| Radial Growth |  |
| Increment | The increase in tree radius over a period of time at breast height, or <br> occasionally at the base. |
| Random Sample | Any method of sample selection based on the theory of probability <br> (degree of certainty). At any stage of the operation of selection, the <br> probability of any set of units being selected must be known. It is the <br> only method that can provide a measure of precision of the estimate. |
| Slope | A code used to reflect the status of an individually tallied item with <br> regards to previous surveys. |
| Apecies | A deviation from the horizontal. <br> classification of an organism. |
| A spatially continuous group of trees and associated vegetation having <br> similar structures and growing under similar soil and climatic conditions. |  |

Glossary of Terms (cont.)

| Term | Definition |
| :--- | :--- |
| Stand Exam Grid | Basic data collection method for stand exams. It consists of a set of plots, <br> separated by equal distances on a grid pattern. The lines of the grid <br> (transects) are oriented in cardinal directions. There is a predetermined <br> distance between plots. The number of transects and grid plots will vary <br> depending upon the size and shape of the stand. |
| Stratified Sample | A method of sampling forest resources where stands or polygons of <br> similar properties are lumped into strata. This improves the efficiency of <br> an inventory by reducing the variability within a given population. The <br> less variability there is within a strata, the fewer samples will need to be <br> taken to achieve a statistically valid result. |
| Stratum | A group of stands within a condition class; similar characteristics such as <br> forest type, tree size class, and canopy density. |
| Stump | The woody base of a tree remaining in contact with the soil after the <br> trunk or main stem has been severed at a point less than 4.5 feet above <br> ground height (measured on the uphill side). |
| Tree | A woody perennial plant, typically large, with a single well-defined stem <br> carrying a more or less definite crown. |
| Tree Age | Total age of the above ground stem of a tree (not age of the root stock or <br> the total age from seed). Total age is usually the annual ring count to the <br> pith of the tree at breast height plus an estimate of the number of years it <br> took the tree to reach breast height. |

## Region 8 Land Class Codes

| Land <br> Class | Name | Suitable | Description |
| :---: | :--- | :---: | :--- |
| $\mathbf{0 0 0}$ | Un-Inventoried | No | Land in Forest Service Ownership that has not been <br> classified. Usually for new acquisitions or other lands for <br> which no information is available |
| $\mathbf{1 0 0}$ | Water Area | No | Areas that are covered by water and not included in the <br> more specific codes below |
| 110 | Natural Lake | No | A naturally occurring area of water of more than one are in <br> size |
| 120 | Reservoir | No | A constructed area of water of more than one acre in size |
| 125 | Pond | No | A natural or construncted area of water of less than one acre <br> in size |
| 130 | Estuary | No | An area where fresh water from a river mixes with salt <br> water from the sea |
| 140 | River | A flowing body of water in a well defined bed or channel. <br> Wider than a stream |  |
| 150 | Stream | A flowing body of water in a well defined bed or channel. <br> Narrower than a river. Most of the streams that we are used <br> to seeing are components of stands and do not get mapped <br> out separately with stand numbers of their own and thus <br> would not be covered by this code. Use this code when a <br> stream is large enough or important enough to be mapped <br> separately as a stand by itself. |  |

## Region 8 Land Class Codes (cont.)

| Land Class | Name | Suitable | Description |
| :---: | :---: | :---: | :---: |
| 160 | Wetlands | No | Areas that are periodically or permanently inundated by surface or ground water and support vegetation adapted for life in saturated soil. These areas are also referred to as swamps, marshes, bogs, and bays. |
| 200 | Non-Forest Land | No | Lands developed for non-forest use include areas for crops, improved pasture, residential, or administrative areas, improved roads of any width, and adjoining road clearing and power line/pipeline clearing of any width. (Forest land is defined as land at least 10 percent occupied by forest trees of any size or formerly having had such tree cover and not currently developed for non-forest use). 219.3. Use this code for non-forest land not covered by more specific codes below. |
| 210 | Public Park, Cemetery | No | Land containing an officially designated public park or a cemetary |
| 220 | Utility R-O-W | No | Land containing easements or Right-of-way for utility lines |
| 230 | Road and Railroad R-O-W | No | Land occupied by road and/or railroad right-or-way |
| 240 | Special Use | No | Lands that rea under a special user permit |
| 250 | Wildlife Opening | No | Non-forest land used for wildlife purposes |
| 251 | Balds | No | High elevation heaths or grassy areas |
| 260 | Nursery | No | Nursery |
| 265 | Seed Orchard | No | Seed Orchard |
| 270 | Non Forest service | No | Lands within Forest Service boundary that do not belong to Forest Service. May be forested or non-forested. |
| 280 | Mine | No | Strip Mines, well sites, quarries, etc. |
| 290 | Military Use | No | Lands used by or formerly used by military. May contain unexploded ordinance at or near ground surface. May contain shrapnel in trees. |
| 300 | Reserved - Withdrawn | No | Withdrawn from timber production by an acto of Cngress, the Secretary of Agriculture, or the Chief of the Forest Service |
| 310 | Scenic Area | No | Officially designated scenic area |
| 320 | Historic Area | No | Officially designated historic area |
| 330 | Natural Area | No | Officially designated natural area. Includes research natural areas, RNAs |
| 340 | Geological/Archeological Area | No | Officially designated geological/archeological area |
| 350 | Wilderness Area | No | Officially designated wilderness area |
| 351 | RCW in Wilderness - Active | No | Officially designated wilderness area with RCW currently active |
| 352 | RCW in Wilderness - in active | No | Officially designated wilderness area with RCW previously active |
| 360 | Wild and Scenic River | No | Officially designated wild and scenic river. Includes river corridor |
| 370 | Roadless Area | No | Officially designated roadless area |
| 400 | Deferred - Withdrawn | No | Defferred - withdrawn from timber production pending final action at which time it may be re-classified into the 300 series or some other land class |
| 410 | Scenic Area | No | Scenic area. Pending |

Region 8 Land Class Codes (cont.)

| Land Class | Name | Suitable | Description |
| :---: | :---: | :---: | :---: |
| 420 | Historic Area | No | Historic area. Pending |
| 430 | Natural Area | No | Natural area. Pending |
| 440 | Geological/Archeological Area | No | Geological/Archeological area. Pending |
| 450 | Wilderness Area | No | Wilderness area. Pending |
| 460 | Wild and Scenic River | No | Wild and Scenic River. Includes river corridor. Pending |
| 470 | Roadless Area | No | Roadless area. Pending |
| 500 | Standard Forest Land | Yes | Standard - timber production emphasis |
| 510 | Key Area for Wildlife, Fish, Rare Plants | Yes | A stand lying within an area having a timber production emphasis where wildlife, fish, and rare plants resources area a major management consideration |
| 511 | Contains key area for wildlife, Fish, rare Plants | Yes | Area of standard forest land which contains an inclusion where wildlife, fish, and rare plants resources area major management consideration. |
| 512 | Contains Threatened \& endangered Species-Plants | Yes | Area of standard forest land which contains an inclusion where threatened \& endangered plants resources are a major management consideration. |
| 513 | Contains Threatened \& endangered SpeciesAnimals | Yes | Area of standard forest land which contains an inclusion where threatened \& endangered animals resources are a major management consideration. |
| 520 | Open woodland | Yes | Stocking levels are maintained below regional guidelines for fully stocked stands. Stands are open, park-like with emphasis on maintaining a strong herbaceous component. Percent crown closure from all woody vegetation is between $10 \%$ and $60 \%$ |
| 530 | Low Site Productivity | Yes |  |
| 540 | Steep Slopes | Yes | Steep slopes |
| 545 | Sensitive Soils | Yes | Sensitive soils |
| 550 | Needs R-O-W | Yes | Lands needing road access for implementation of management prescriptions |
| 560 | Needs Road | Yes | Lands needing road construction for implementation of management prescriptions |
| 580 | Military Use | No | Lands used or formerly used by military. May contain unexploded ordinance at or near ground surface. May contain shrapnel in trees. |
| 590 | RCW Forage for Active Cluster | Yes | Stand designated as foraging habitat for active RCW cluster |
| 591 | RCW Foraging Stand for Recruitment Cluster | Yes | Stand designated as foraging habitat for RCW recruitment cluster. Note: recruitment clusters are provisioned with artificial cavities. |
| 592 | RCW Foraging Stand for Recruitment Stand | Yes | Stand designated as foraging habitat for RCW recruitment stand. Note: recruitment stands are not provisioned with artificial cavities. |
| 593 | RCW Foraging Stand for Inactive Cluster | Yes | Stand designated as foraging habitat for inactive RCW cluster |
| 594 | RCW Potential Recruitment | Yes | Stand that may be used for recruitment in the future |
| 600 | Special | Yes | Special - Timber production secondary to other resources |
| 620 | Sensitive Plants | Yes | Sensitive plants |

Region 8 Land Class Codes (cont.)

| Land Class | Name | Suitable | Description |
| :---: | :---: | :---: | :---: |
| 630 | Recreation Emphasis | Yes | Recreation emphasis |
| 640 | Visual Emphasis | Yes | Visual emphasis |
| 650 | Wildlife Emphasis | Yes | Wildlife emphasis |
| 660 | Water Emphasis | Yes | Water emphasis |
| 665 | Cultural Resource Emphasis | Yes | Cultural resource emphasis |
| 667 | Wildlife Preserve | Yes | Wildlife preserve |
| 670 | Special Study Area | Yes | Special study area |
| 671 | Growth and Yield Research Plot | Yes | Growth and yield research plot |
| 680 | Progeny Test Plantation | Yes | Progeny test plantation |
| 690 | Military Use | No | Lands used or formerly used by military. May contain unexploded ordinance at or near ground surface. May contain shrapnel in trees. |
| 700 | Lack of Technology | No | Technology is not available t ensure timber production from the land withut irreversible resource damage to soils, productivity, or watershed conditions. |
| 710 | Restocking Not Assured | No | There is not reasonable assurance that the land can be adequately restocked as provided in 219.27©(3). Adequate restocking means that the cut area will contain the minimum number, size, distribution, and species composition of regeneration as specified in the regional silvicultural guides for each forest type 5 years after harvest. |
| 720 | Irreversible Damage | No | Timber production would cause irreversible resource damage to soils, productivity, or watershed conditions. |
| 740 | Response Info Lacking | No | It is not known if timber production can be ensured without irreversible resource damage to soils, productivity, or watershed conditions. |
| 800 | Not Appropriate | No | Land coded in the 800's series are designated as Not Appropriate for timber production by regional Forester's decision in approving forest plans |
| 810 | Experimental Forest, Range or Watershed | No | Lands used for research and special study |
| 820 | MIN Level | No | Lands that are unsuitable due to access or existing landscape features. Lands that are difficult and/or exceedingly costly to manage. Minimally productive. If a treatment is applied then a number of mitigating measures must be implemented to protect the resources. Use this code if, when classifying a stand, you think "I would not tough this area with a 10 foot pole," nothing but big trouble once disturbed, "Why would I want to?" |
| 821 | MIN Level - Steep Slopes | No | MIN level - steep slopes |
| 822 | MIN Level - Inadequate Markets | No | MIN level - inadequate markets |
| 823 | MIN Level - Inaccessible ROW needed | No | MIN level - In accessible - ROW needed |
| 824 | MIN Level - Sensitive Soils | No | MIN level - sensitive soils |
| 825 | MIN Level - Low Level Management | No | MIN level - low level management |

Region 8 Land Class Codes (cont.)

| Land Class | Name | Suitable | Description |
| :---: | :---: | :---: | :---: |
| 826 | MIN Level - Physical Barriers | No | MIN level - physical barriers |
| 827 | MIN Level - Road Costs Exceed Values | No | MIN level - road costs exceeds values |
| 828 | MIN Level - Riparian Area | No | MIN level - riparian area |
| 830 | Wildlife Emphasis | No | Wildlife emphasis |
| 832 | Threatened \& Endangered Species - Plants | No | Unsuitable forest land with threatened \& endangered plant resources |
| 833 | Threatened \& Endangered Species - Animals | No | Unsuitable forest land with threatened \& endangered animal resources |
| 840 | RCW Cluster Active | No | Area, at least 10acres in size, containing the aggregate of cavity trees + a $200^{\prime}$ buffer in an active cluster |
| 841 | RCW Cluster Inactive | No | Area, at least 10acres in size, containing the aggregate of cavity trees + a 200 ' buffer in an inactive cluster |
| 842 | RCW Recruitment Stand | No | Area, at least 10 acres in size, designated for RCW recruitment that has not been provisioned with artificial cavities |
| 843 | RCW Replacement Stand | No | Area, at least 10 acres in size, designated to replace existing active RCW cluster. Sites should be adjacent to or within $1 / 4$ mile of active cluster it is replacing. Cavities are not present. |
| 844 | RCW Recruitment Cluster | No | Area, at least 10 acres in size, designated for RCW recruitment that has been provisioned with artificial cavities |
| 846 | Other Rare/Endangered Species | No | Area, ar least 10 acres in size, designated for conservation of rare/endangered species other than RCW |
| 848 | Designated Critical habitat | No | Area, at least 10 acres in size, legally designated as critical habitat. For aquatic designated crtical habitat, the adjacent riparian should also be coded as critical habitat. |
| 850 | Developed Recreation Site | No | Developed recreation site |
| 851 | Un-Developed Recreation Site | No | Un-developed recreation site |
| 852 | Appalachian Trail | No | Appalachian Trail corridor |
| 853 | Other National Recreation Trail | No | Other national Recreation Trail corridor |
| 860 | Administrative Site | No | Land occupied by Forest Service structures such as District offices, work centers, etc. |
| 861 | Undeveloped <br> Administrative Site | No | Land potentially occupied by Forest Service structures such as District offices, work centers, etc. |
| 862 | Summer Home Site | No | Site contains a residential structure owned by Forest Service but rented or leased to public for residential or recreational purposes |
| 870 | Nursery | No | Lands dedicated to production of tree seedlings |
| 871 | Seed Orchards | No | Lands dedicated to the production and collection of tree seed |
| 880 | RARE II Lands under study | No | Lands removed from the suitable timber base pending evaluation with the roadless Area Review and Evaluation legislated program |
| 890 | Military Use | No | Lands used or formerly used by military. May contain unexploded ordinance at or near ground surface. May contain shrapnel in trees. |

Region 8 Land Class Codes (cont.)

| Land <br> Class | Name | Suitable | Description |
| :---: | :---: | :---: | :--- |
| 891 | Contaminated | No | Lands containing hazardous materials (chemical, nuclear, <br> etc.) |
| $\mathbf{9 0 0}$ | Unproductive | No | Forested land that is incapable of producing a minimum level <br> of growth where the minimum level is set in the forest plan |

This page intentionally left blank.

## APPENDIX N: FUEL MODELS

The original 13 fuel models are from "Aids to Determining Fuel Models for Estimating Fire Behavior", Hal E. Anderson, INT-122, 1982. The remaining fuel models are from "Standard Fire Behavior Fuel Models: A Comprehensive Set for Use with Rothermel's Surface Fire Spread Model" by Joe H. Scott and Robert E. Burgan. RMRS -GTR-153. June 2005.

| Fuel Model | Fuel Model Code | Fuel Model Name | Fuel Type | Model Set | Fuel 1-Hr | $\begin{aligned} & \text { Fuel } \\ & 10-\mathrm{Hr} \end{aligned}$ | $\begin{aligned} & \hline \text { Fuel } \\ & \text { 100- } \\ & \mathrm{Hr} \\ & \hline \end{aligned}$ | Fuel <br> Bed <br> Depth |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 |  | Short grass (1 foot) | Grass and grassdominated | Original 13 | 0.74 | 0 | 0 | 1 |
| 2 |  | Timber (grass and understory) | Grass and grassdominated | Original 13 | 2 | 1 | 0.500 | 1 |
| 3 |  | Tall grass (2.5 feet) | Grass and grassdominated | Original 13 | 3.01 | 0 | 0 | 2.50 |
| 4 |  | Chaparral (6 feet) | Chaparral and shrub fields | Original 13 | 5.01 | 4.010 | 2 | 6 |
| 5 |  | Brush (2 feet) | Chaparral and shrub fields | Original 13 | 1 | 0.500 | 0 | 2 |
| 6 |  | Dormant brush, hardwood slash | Chaparral and shrub fields | Original 13 | 1.50 | 2.500 | 2 | 2.50 |
| 7 |  | Southern rough | Chaparral and shrub fields | Original 13 | 1.13 | 1.870 | 1.500 | 2.50 |
| 8 |  | Closed timber litter | Timber litter | Original 13 | 1.50 | 1 | 2.500 | 0.20 |
| 9 |  | Hardwood litter | Timber litter | Original 13 | 2.92 | 0.410 | 0.150 | 0.20 |
| 10 |  | Timber (litter and understory) | Timber litter | Original 13 | 3.01 | 2 | 5.010 | 1 |
| 11 |  | Light logging slash | Slash | Original 13 | 1.50 | 4.51 | 5.510 | 1 |
| 12 |  | Medium logging slash | Slash | Original 13 | 4.01 | 14.03 | 16.53 | 2.30 |
| 13 |  | Heavy logging slash | Slash | Original 13 | 7.01 | 23.04 | 28.05 | 3 |
| 91 | NB1 | Urban/Developed | Nonburnable | Scott and Burgan | 0 | 0 | 0 | 0 |
| 92 | NB2 | Snow/Ice | Nonburnable | Scott and Burgan | 0 | 0 | 0 | 0 |

## Detailed Description of the Fuel Models

| Code | Detailed Description |
| :---: | :---: |
| 1 | Contains fine, very porous, and continuous herbaceous fuels that have cured or are nearly cured. Generally less than one-third of the area contains shrubs or timber. Grasslands and savanna are represented along with stubble, grass-tundra, and grass-shrub combinations. Annual and perennial grasses are included in this fuel model. |
| 2 | Herbaceous material with litter and dead-down stem wood from the open shrub or timber overstory. Open shrub lands and pine stands or scrub oak stands that cover one-third to two-thirds of the area. Stand may include clumps and may include pinyon-juniper. |
| 3 | Stands are tall, averaging about three feet, but considerable variation may occur. Approximately one-third or more of the stand is considered dead and cured. May include cultivated grains that have not been harvested, tall prairie, and marshland grasses |
| 4 | Stands of mature shrubs, 6 feet or more tall such as California mixed chaparral, the high pocosin along the east coast, the pine barrens of New Jersey, or the closed jack pine stands of the north-central states. Besides flammable foliage, stand may contain dead woody material. May contain a deep litter layer. |
| 5 | Shrubs are young with little dead material, and the foliage contains little volatile material. Usually shrubs are short and almost totally cover the area. Young, green stands with no dead wood qualify: laurel, vine maple, alder, or even chaparral, manzanita, or chamise. |
| 6 | The shrubs are older, but not as tall as model 4, nor do they contain as much fuel as model 4. This model covers a broad range of shrub conditions: intermediate stands of chamise, chaparral, oak brush, low pocosin, Alaskan spruce taiga, and shrub tundra. May include hardwood slash that has cured. Pinyonjuniper shrub lands may be represented. |
| 7 | Stands of shrubs are generally between 2 and 6 feet high. Palmetto-galliberry understory, with a pine overstory, is typical. Low pocosin may be represented. Black spruce shrub combinations in Alaska may also be represented. |
| 8 | Contains closed canopy stands of short needle conifers or hardwoods that have leafed out. The compact litter layer is mainly needles, leaves, and occasionally twigs because little undergrowth is present. Representative conifer types are white pine, lodgepole pine, spruce, fir, and larch. |
| 9 | Both long-needle conifer stands and hardwood stands, especially the oak-hickory types, are typical. Closed stands of long-needled pine like ponderosa, Jeffrey, red pines, or southern pine plantations are grouped in this model. May contain concentrations of dead-down woody material. |
| 10 | Dead-down fuels include quantities of 3-inch or larger limb wood resulting from over maturity or natural events that create a large load of dead material on the forest floor. Any forest type may be considered if heavy down material is present; examples are insect- or disease-ridden stands, wind thrown stands, overmature situations with deadfall, and aged light thinning or partial cut slash. |
| 11 | Contains slash and herbaceous material intermixed with slash. Light partial cuts or thinning operations in mixed conifer stands, hardwood stands, and southern pine harvests are considered. Clearcuts generally produce more slash than represented here. The less than 3-inch material load is less than 12 tons per acre. The greater than 3 inch is represented by not more than 10 pieces, 4 inches in diameter, along a 50 foot transect. |
| 12 | The visual impression is dominated by slash and much of it is less than 3 inches in diameter. The fuels are well distributed. Heavily thinned conifer stands; clearcuts, and medium or heavy partial cuts are represented. The material larger than 3 inches is represented by encountering 11 pieces, 6 inches in diameter along a 50 foot transect. |
| 13 | There is a continuous layer of slash. Large quantities of material larger than 3 inches are present. Clearcuts and heavy partial cuts in mature and over mature stands are depicted where the slash load is dominated by the greater than 3 inch diameter material. Fuels less than 3 inches are generally only 10 percent of the total load. May include situations where the slash still has "red" needles attached. |
| 91 | Land covered by urban and suburban development. The area must not support wildland fire spread. In some cases the area may experience structural fire losses during a wildland fire incident; however, structure ignition in those cases is either house-to-house or by firebrands, neither of which is directly modeled using fire behavior fuel models. If sufficient vegetation surrounds structures such that wildland fire spread is possible, then choose a fuel model appropriate for the wildland vegetation. |

Detailed Description of the Fuel Models (cont.)

| Code | Detailed Description |
| :---: | :---: |
| 92 | Land covered by permanent snow and ice. Areas covered by seasonal snow and ice can be mapped to two different fuels models. |
| 93 | Agricultural land maintained in a nonburnable condition; examples include irrigated annual crops, mowed or tilled orchards, and so forth. However, there are many agricultural areas that are not kept in a non burnable condition. For example, grass is often allowed to grow beneath vines or orchard trees, and wheat or similar crops are allowed to cure before harvest; in those cases use a different fuel model. |
| 98 | Land covered by open bodies of water such as lakes, rivers and oceans. |
| 99 | Land devoid of enough fuel to support wildland fire spread. Such areas include gravel pits, arid deserts with little vegetation, sand dunes, rock outcroppings, beaches and so forth. |
| 101 | The primary carrier of fire is sparse grass, though small amounts of fine fuel may be present. The grass is generally short, either naturally or by grazing, and may be sparse or discontinuous. The moisture extraction is indicative of a dry climate fuelbed, but may also be applied in high-extinction moisture fuelbeds because in both cases predicted spread rate and flame length are low compare to other grass models. |
| 102 | The primary carrier of fire is grass, though small amounts of fine dead fuel may be present. Load is greater than 101, and fuelbed may be more continuous. Shrubs, if present, do not affect fire behavior. |
| 103 | The primary carrier of fire is continuous, coarse, humid-climate grass. Grass and herb fuel load is relatively light; fuelbed depth is about 2 feet. Shrubs are not present in significant quantity to affect fire behavior. |
| 104 | The primary carrier of fire is continuous, dry-climate grass. Load and depth are greater than 102; fuelbed depth is about 2 feet. |
| 105 | The primary carrier of fire is humid-climate grass. Load is greater than 103 but depth is lower, about 1-2 feet. |
| 106 | The primary carrier of fire is continuous humid-climate grass. Load is greater than 105 but depth is about the same. Grass is less coarse than 105. |
| 107 | The primary carrier of fire is continuous dry-climate grass. Load and depth are greater than 104. Grass is about 3 feet tall. |
| 108 | The primary carrier of fire is continuous, very coarse, humid-climate grass. Load and depth are greater than 106. Spread rate and flame length can be extreme if grass is fully cured. |
| 109 | The primary carrier of fire is dense, tall, humid-climate grass. Load and depth are greater than 108, about 6 feet tall. Spread rate and flame length can be extreme if grass is fully or mostly cured. |
| 121 | The primary carrier of fire is grass and shrubs combined. Shrubs are about 1 foot high, grass load is low. Spread rate is moderate; flame length is low. Moisture of extinction is low. |
| 122 | The primary carrier of fire is grass and shrubs combined. Shrubs are 1 to 3 feet high, grass load is moderate. Spread rate is high; flame length moderate. Moisture of extinction is low. |
| 123 | The primary carrier of fire is grass and shrubs combined. Moderate grass/shrub load, average grass/shrub depth less than 2 feet. Spread rate is high; flame length moderate. Moisture of extinction is high. |
| 124 | The primary carrier of fire is grass and shrubs combined. Heavy grass/shrub load, depth greater than 2 feet. Spread rate high; flame length very high. Moisture of extinction is high. |
| 141 | The primary carrier of fire is woody shrubs and shrub litter. Low shrub fuel load, fuelbed about 1 foot; some grass may be present. Spread rate is very low; flame length very low. |
| 142 | The primary carrier of fire is woody shrubs and shrub litter. Moderate fuel load (higher than 141), depth about 1 foot, no grass fuel present. Spread rate is very low; flame length low. |
| 143 | The primary carrier of fire is woody shrubs and shrub litter. Moderate shrub load, possibly with pine overstory or herbaceous fuel, fuel bed depth 2 to 3 feet. Spread rate is low; flame length low. |
| 144 | The primary carrier of fire is woody shrubs and shrub litter. Low to moderate shrub and litter load, possibly with pine overstory, fuel bed depth about 3 feet. Spread rate is high; flame length moderate. |
| 145 | The primary carrier of fire is woody shrubs and shrub litter. Heavy shrub load, depth 4-6 feet. Spread rate very high; flame length very high. Moisture of extinction is high. |
| 146 | The primary carrier of fire is woody shrubs and shrub litter. Dense shrubs, little or no herbaceous fuel, fuelbed depth about 2 feet. Spread rate is high; flame length high. |

## Detailed Description of the Fuel Models (cont.)

| Code | Detailed Description |
| :---: | :---: |
| 147 | The primary carrier of fire is woody shrubs and shrub litter. Very heavy shrub load, depth 4 to 6 feet. Spread rate lower than 146, but flame length similar. Spread rate is high, flame length is very high. |
| 148 | The primary carrier of fire is woody shrubs and shrub litter. Dense shrubs, little or no herbaceous fuel, fuelbed depth about 3 feet. Spread rate is high; flame length high. |
| 149 | The primary carrier of fire is woody shrubs and shrub litter. Dense, finely branched shrubs with significant fine dead fuel, about 4-6 feet tall; some herbaceous fuel may be present. Spread rate is high; flame length very high. |
| 161 | The primary carrier of fire is low load of grass and/or shrub with litter. Spread rate is low; flame length is low. |
| 162 | The primary carrier of fire is moderate litter load with shrub component. High extinction moisture. Spread rate is moderate; flame length is low. |
| 163 | The primary carrier of fire is moderate forest litter with grass and shrub components. High extinction moisture. Spread rate is high; flame length is moderate. |
| 164 | The primary carrier of fire is short conifer trees with grass or moss understory. Spread rate is moderate; flame length is moderate. |
| 165 | The primary carrier of fire is heavy forest litter with a shrub or small tree understory. Spread rate is moderate; flame length is moderate. |
| 181 | The primary carrier of fire is compact forest litter. Light to moderate load, fuels 1 to 2 inches deep. May be used to represent a recently burned forest. Spread rate is very low; flame length is very low. |
| 182 | The primary carrier of fire is broadleaf (hardwood) litter. Low load, compact broadleaf litter. Spread rate is very low; flame length is very low. |
| 183 | The primary carrier of fire is moderate load conifer litter, light load of coarse fuels. Spread rate is very low; flame length low. |
| 184 | The primary carrier of fire is moderate load of fine litter and coarse fuels. Includes small diameter downed logs. Spread rate is low; flame length low. |
| 185 | The primary carrier of fire is high load of fine litter; light slash or mortality fuel. Spread rate is low; flame length low. |
| 186 | The primary carrier of fire is moderate load broadleaf litter, less compact than 182. Spread rate is very moderate; flame length is low. |
| 187 | The primary carrier of fire is heavy load of forest litter, includes large diameter downed logs. Spread rate low; flame length low. |
| 188 | The primary carrier of fire is moderate load long-needle pine litter, may include small amount of herbaceous load. Spread rate is moderate; flame length low. |
| 189 | The primary carrier of fire is very high load, fluffy broadleaf litter. This can also be used to represent heavy needle-drape. Spread rate is very moderate; flame length moderate. |
| 201 | The primary carrier of fire is light dead and down activity fuel. Fine fuel load is 10 to 20 t/ac weighted towards fuels 1 to 3 inch diameter class; depth is less than 1 foot. Spread rate is moderate; flame length moderate. |
| 202 | The primary carrier of fire is moderate dead and down activity fuel or light blowdown. Fine fuel load is 7 to 12 t/ac, evenly distributed across 0 to $0.25,0.25$ to 1 , and 1 to 3 inch diameter classes, depth is about 1 foot. Blowdown is scattered, with many trees still standing. Spread rate is moderate; flame length moderate. |
| 203 | The primary carrier of fire is heavy dead and down activity fuel or moderate blowdown. Fine fuel load is 7 to 12 t/ac, weighted toward 0 to 0.25 inch diameter class, depth is more than 1 foot. Blowdown is moderate; trees compacted to near the ground. Spread rate is high; flame length high. |
| 204 | The primary carrier of fire is heavy blowdown fuel. Blowdown id total, fuelbed is not compacted, most foliage and fine fuel still attached to blowdown. Spread rate is very high; flame length very high. |
