IN REPLY REFER TO:
6840 (OR-931) P

EMS TRANSMISSION
Permanent Instruction Memorandum No. OR-2021-004

To: All District Managers
From: State Director, Oregon/Washington
Subject: Final State Director's Special Status Species List

Program Area: Special Status Species (SSS)

Purpose: The purpose of this instruction memorandum (IM) is to issue a final, updated State Director's Special Status Species List (List). The List is developed as an interagency effort with the U.S. Forest Service Region 6.

Administrative or Mission Related: Mission

Policy/Action: This IM officially updates the List, which includes federally designated threatened, endangered, and proposed species, as well as, Bureau of Land Management (BLM) sensitive species for the BLM Oregon/Washington (OR/WA). The updated List reflects comments and corrections received from the field in response to the April 26, 2021, email requesting review of the draft, updated list. In a change from previous versions of the List, the occurrence statuses (documented or suspected) of the National Forests in Region 6 are included. This will allow for a broader understanding of species distribution in Oregon and Washington on Federal lands.

The attachments to this IM include the final List (Attachment 1) and the criteria for determining inclusion as a BLM-designated sensitive species (Attachment 2). Both attachments are available for download from the Interagency Special Status/Sensitive Species Program (ISSSSP) website at <http://www.fs.fed.us/r6/sfpnw/issssp/agency-policy/>.

Management of BLM-designated sensitive species follows the Special Status Species (SSS) policy as identified in BLM Manual 6840 (12/12/2008). In addition, observations, surveys, and site information of the List's wildlife and botanical species shall be entered into the BLM OR/WA corporate database Geographic Biotic Observations (GeoBOB). Annually, all information pertaining to the List's species that is collected in the previous year is to be

entered into the GeoBOB database by March 1 of the following year. Observations, surveys, and site information of the List's fish species shall be entered into the agency's Aquatic Data & Tools corporate database (no annual data entry deadline has been established).

Timeframe: Apply the updated List included in Attachment 1 to all projects initiated after the date of this IM. Projects initiated prior to the date of this IM may apply either the updated List transmitted in this IM or the SSS list in effect when the project was initiated. For the purpose of this IM, "initiated" means that a signed, dated document such as a project initiation letter, scoping letter, or Federal Register Notice has been completed for the project.

The List will remain in place until the next update (normally every three years) except for changes relating to Federal listing status. You will be notified whenever Federal listing-related changes are made (for example, if a species becomes federally proposed or listed as threatened or endangered), and these changes become effective as of the effective date in the Federal Register Notice. Similarly, newly designated Federal candidate species are immediately considered BLM sensitive (if not already sensitive) on BLM districts where the species is documented or suspected to occur.

Budget Impact: None

Background: The State Director transmitted new criteria (July 25, 2007, IM-OR-2007-072, Attachment 1) jointly approved by the U.S. Forest Service Region 6 Regional Forester and the BLM OR/WA State Director for determination of species included within the BLM SSS and Forest Service Sensitive Species Program. The new criteria were designed to make the two agencies more consistent in their approaches to the development of lists of species with conservation concerns. Subsequent memorandums (IM-OR-2008-038, IM-OR-2012-018, IM-OR-2015-028, OR-P-IM-2019-003) reissued updated SSS lists.

Bureau of Land Management Manual Section 6840 (Special Status Species Management) was updated in December 2008. The BLM Headquarters Office asked state offices to review their criteria for identifying sensitive species and update their lists. Policy objectives are to initiate proactive conservation measures that reduce or eliminate threats to BLM sensitive species to minimize the likelihood of and need for listing of these species under the Endangered Species Act (BLM Manual 6840.02). The manual, policy, and IM-2009-039 can be found at: <http://www.fs.fed.us/r6/sfpnw/issssp/agency-policy/>.

Pages of Manual/Handbook Sections Affected: None.

Instruction Memorandums Affected: Supersedes OR-P-IM-2019-003.

Coordination: Branch of Biological Resources (OR-931); and OR/WA Districts; and Forest Service, Region 6, Natural Resources.

Contact: Rob Huff, ISSSSP Conservation Planning Coordinator, rhuff@blm.gov.

Districts with Unions are reminded to notify their unions of this IM and satisfy any bargaining obligations before implementation. Your servicing Human Resources Office or Labor Relations Specialist can provide you with assistance in this matter.

Criteria for Determining
Oregon/Washington Bureau of Land Management
and Forest Service Region 6
Sensitive Species
June 21, 2021

To confer Sensitive status within a state, the following criteria must be met within the state.

Sensitive

1. All US Fish and Wildlife Service (USFWS) and National Oceanic and Atmospheric Administration (NOAA) Candidate species are sensitive within the state where suspected¹ or documented on lands administered by the Bureau of Land Management (BLM) or Forest Service (FS).
2. All de-listed USFWS or NOAA species are sensitive within the state where suspected or documented on BLM/FS lands for the longer of five years or the duration of their delisting monitoring plans.
3. All Oregon Department of Agriculture, Oregon Department of Fish and Wildlife, and Washington Department of Fish and Wildlife state threatened or endangered species where documented on BLM/FS lands (not suspected only) and which are not state extirpated (SX) or historic (SH) in the state.

For all other taxa, the following four criteria must be met:

1. On the Oregon Biodiversity Information Center (ORBIC) List 1 or 2 or Washington Natural Heritage Program (WNHP) rare species lists except Review Group 1 or 2 (see below for acronyms and lists) with NatureServe ranks of:
 - a. S1, S1S2, S1S3, S2, or S2S3 **or**
 - b. S2S4 or S3 **and** G1-G3, G1Q-G3Q, N1-N3, or T1-T3
2. Sensitive taxa must be documented on at least one FS or BLM unit in the state where status is being evaluated.
3. Sensitive taxa must be fully described with valid scientific names (i.e., no undescribed). In addition, botanical forms (forma) do not qualify as sensitive.
4. To be added as sensitive, lichens, bryophytes, fungi, and invertebrates must have a completed ISSSP species fact sheet.

¹Suspected = habitat is expected to occur on FS/BLM lands and surveys have not been thorough or recent enough to determine presence/non-presence.

Acronyms

NatureServe Network Global (G), National (N), and Subnational (State/Province) (S) Ranks

- 1 = Critically imperiled
 - 2 = Imperiled
 - 3 = Rare and uncommon; vulnerable.
 - 4 = Not rare and apparently secure
- NatureServe Rank Qualifiers:

Criteria for Determining
Oregon/Washington Bureau of Land Management
and Forest Service Region 6
Sensitive Species
June 21, 2021

#X# = Range rank – a numeric range rank (e.g., G2G3, G1G3) is used to indicate uncertainty about the exact status of a taxon

Q = Questionable taxonomy

Washington Natural Heritage Program (WNHP) Plant Lists

R1 = Review group 1; plants of potential concern for which current information is insufficient to evaluate conservation status.

R2 = Review group 2; plants of potential concern but with unresolved taxonomic questions.

Oregon Biodiversity Information Center (ORBIC) List

1 = Taxa are threatened with extinction or presumed to be extinct throughout their entire range.

2 = Taxa are threatened with extirpation or presumed to be extirpated from the state of Oregon; these are often peripheral or disjunct species which are of concern when considering species diversity within Oregon's borders.
