

# Socioeconomic Conditions and Trends for Communities in the NWFP Region

Ellen Donoghue  
N. Lynnae Sutton  
USDA Forest Service  
PNW Research Station

# Objectives

To delimit communities in the Plan region to facilitate socioeconomic monitoring and research.

To assess socioeconomic conditions and trends for communities in the Plan region.

# Challenges of defining communities in the Plan region

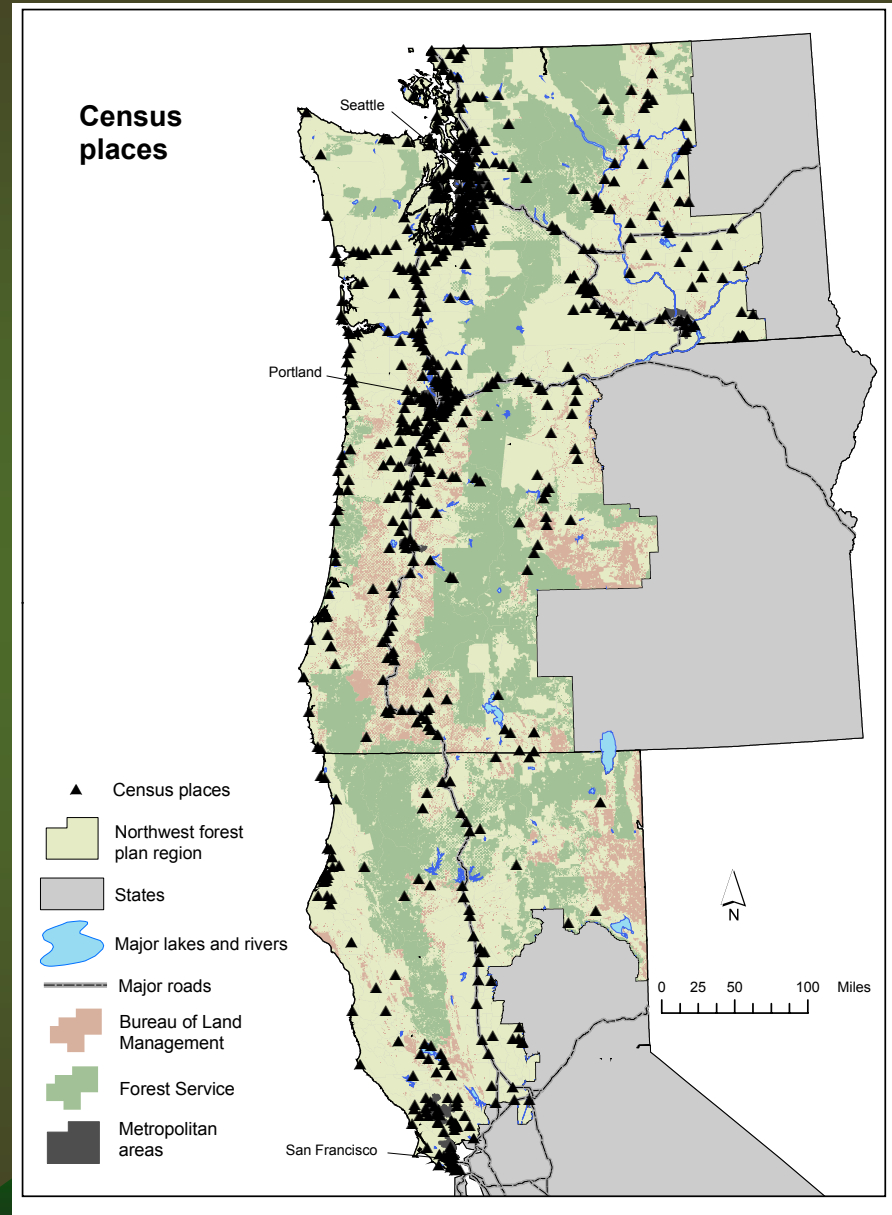

- ✦ Size of the region (72 counties)
- ✦ 10 million people
- ✦ Need for trend data
- ✦ Census data
- ✦ Issues of secondary data

# Issues with Secondary Data

- ✦ “Availability of data” does not mean easy to work with at low costs
- ✦ Census does not emphasize making data comparable from one decade to the next
- ✦ Challenges and opportunities for using Census data to define the unit of analysis

One challenge of  
census places as  
the unit of analysis:

Who is left out?

# An opportunity: aggregating census block groups

- ✦ Combine adjacent and related block groups into meaningful social units
- ✦ Data availability – BGs are the smallest unit for which all census summary statistics are reported
- ✦ Track record – Sierra Nevada Ecosystem Project (Doak and Kusel 1996)
- ✦ Issue: 1990 – 2000 data compatibility

# Aggregating census block groups

- 1) GIS analysis
- 2) Visual review
- 3) Issue of 1990 and 2000 data compatibility
  - ② used population and housing proportions and multipliers

For detailed description of defining the unit of analysis:

[www.fs.fed.us/pnw](http://www.fs.fed.us/pnw)

Publication number: PNW-GTR-570

# Unit of analysis

1,314 community block group aggregations

“Communities in the Plan region”

## Community boundaries and population centers within NWFP region

- Population centers
- ⊕ Community boundaries
- Northwest forest plan region
- States
- 🌊 Major lakes and rivers
- Major roads
- BLM
- Forest Service
- Metropolitan areas

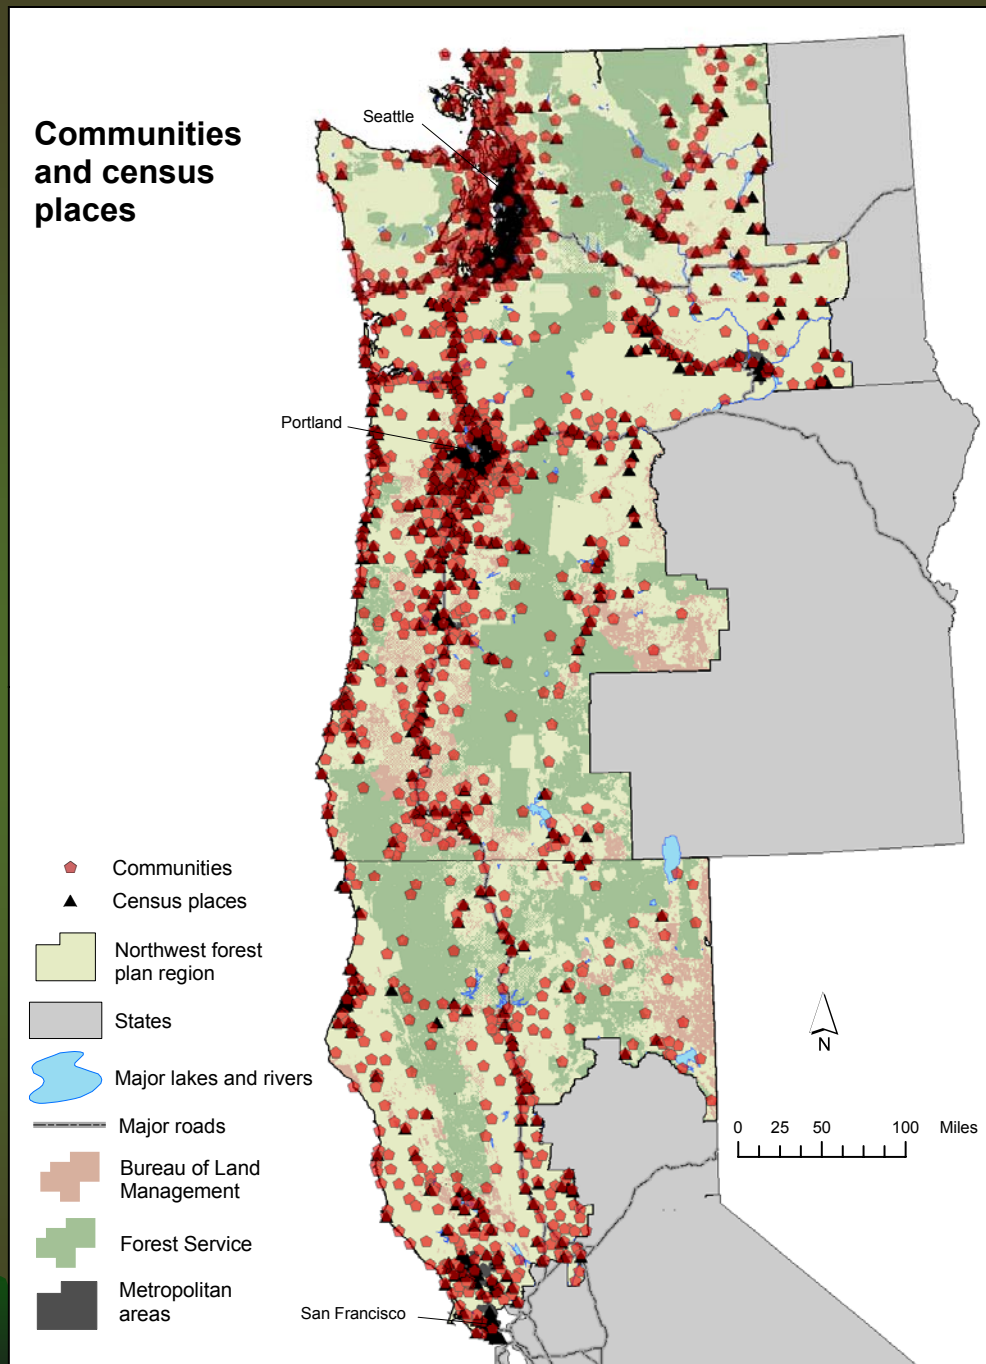

# Community block group aggregations vs. census places

☀ 1,314 vs 517 places

☀ 4.0 million people vs 2.5 million people

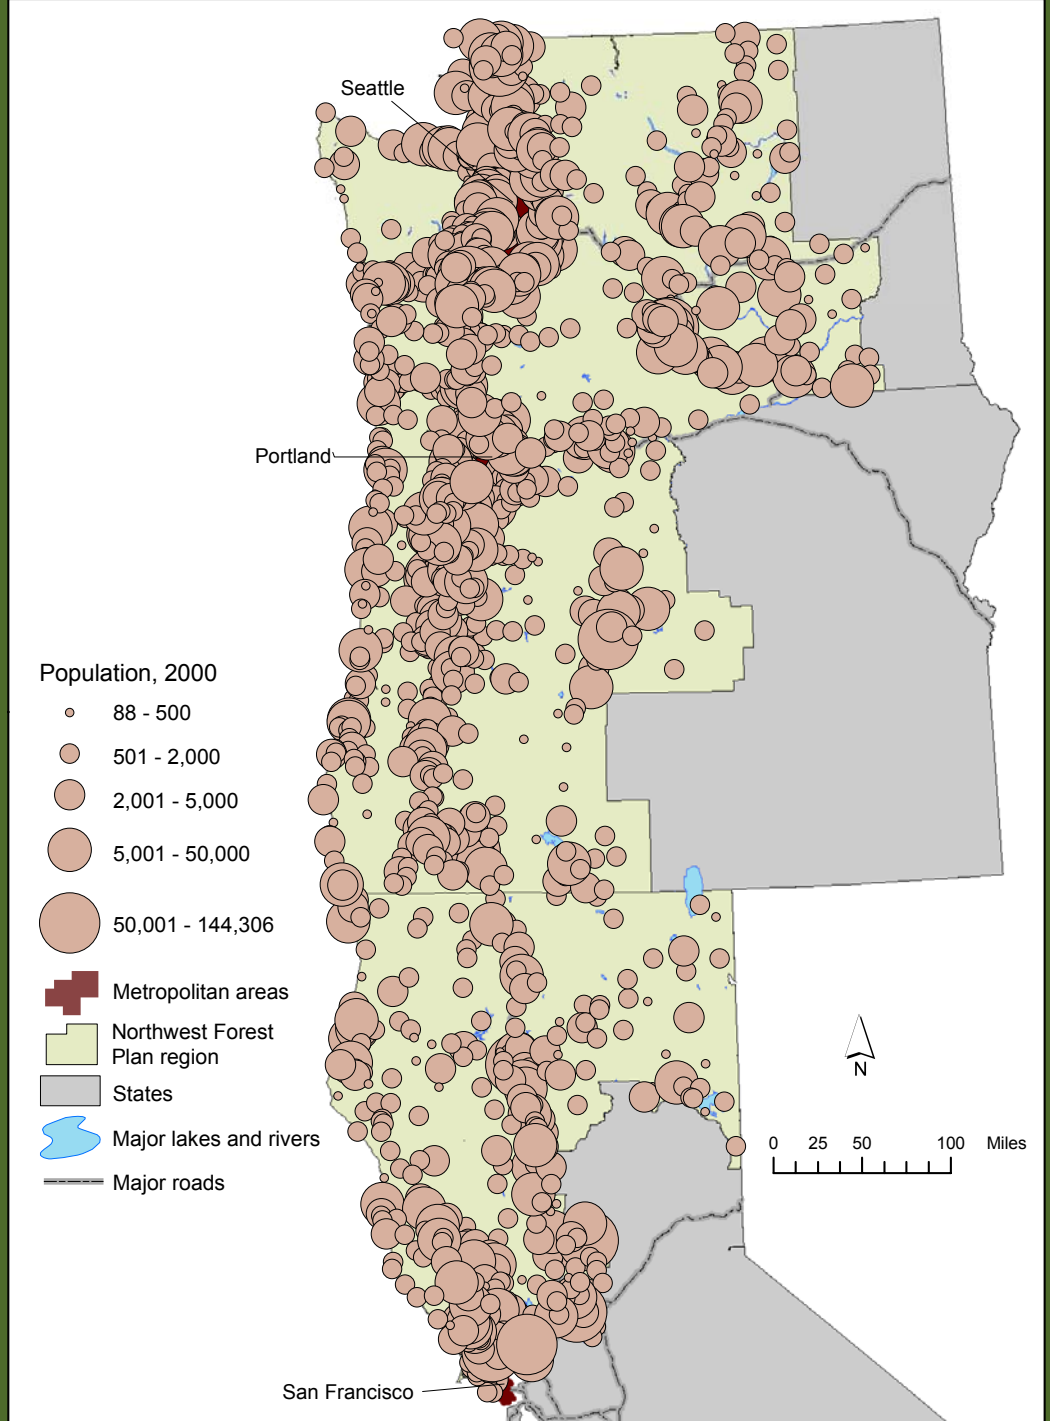

☀ Note the proximity of red dots ● to public forestlands

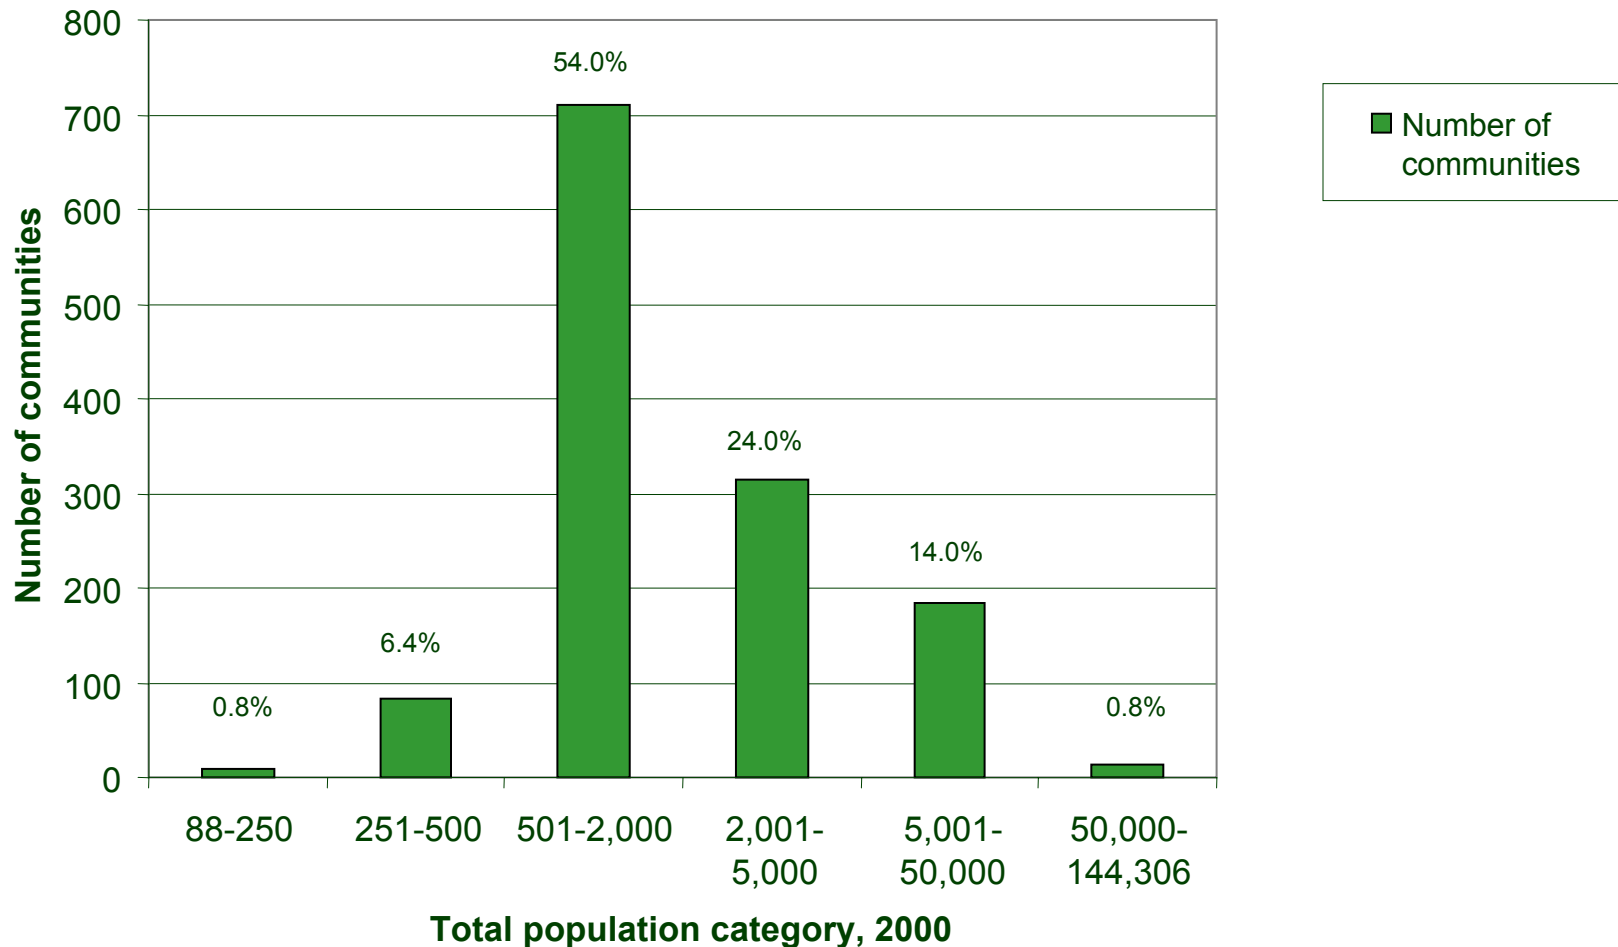

# Socioeconomic conditions and trends for communities in the Plan region

# Population Plan Communities, 2000

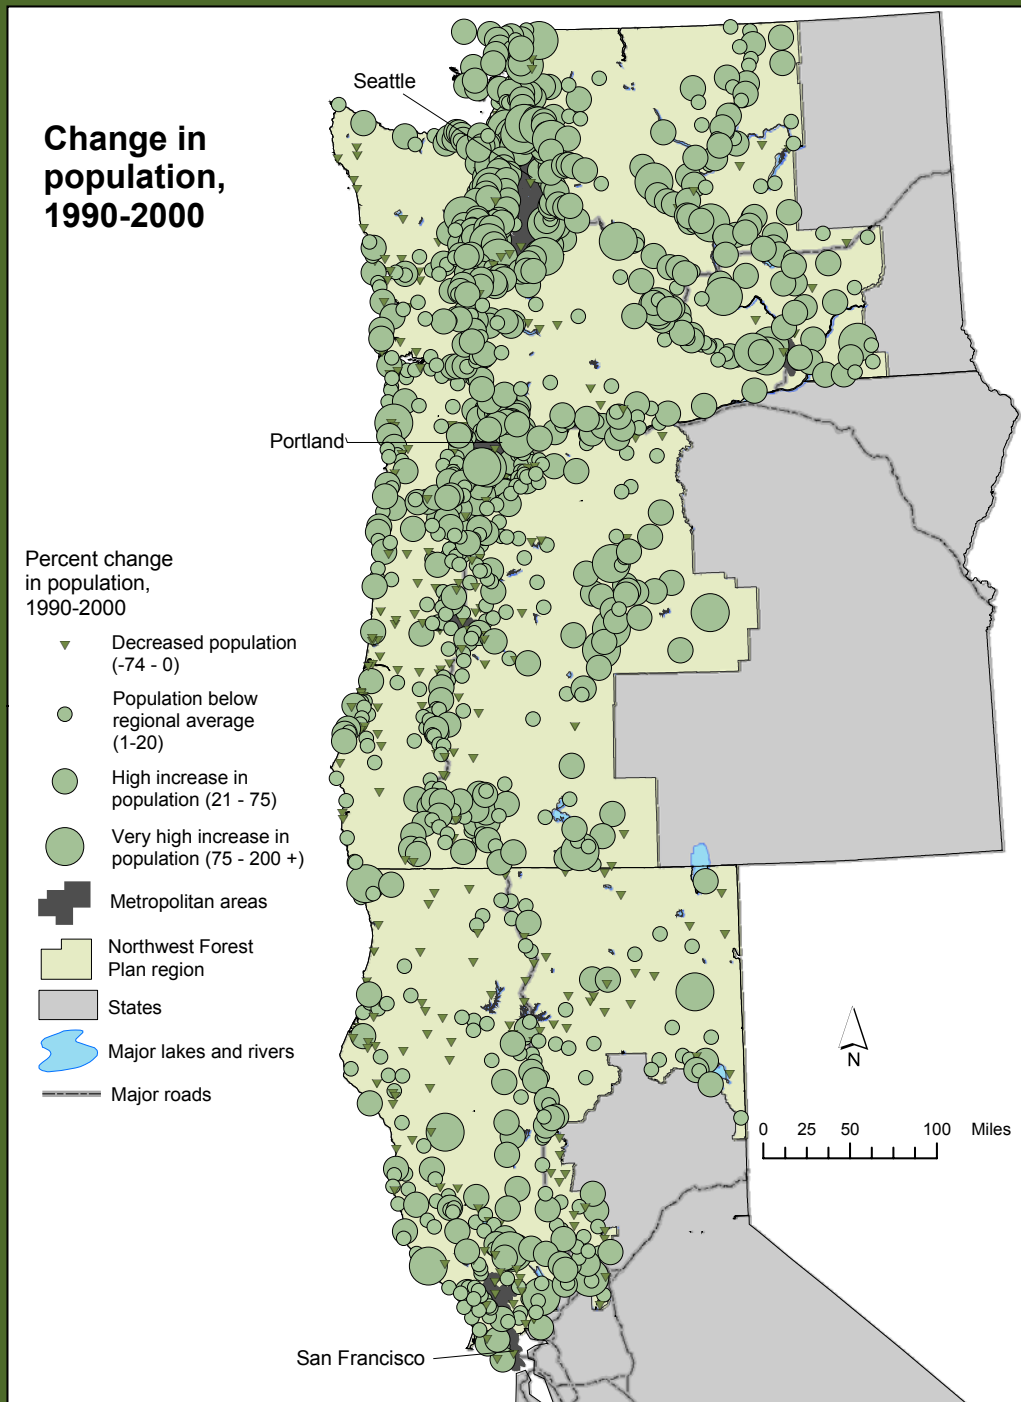

# 54% of communities had between 500 and 2000 people

# Population Change in the Plan Region, 1990 – 2000

- ☀ Communities in Plan region: 4.13 million people in 1990, 4.98 million in 2000
- ☀ Population increased 20.6 %
- ☀ Entire region: 8.57 to 10.26 million people (10 metro + 1,314 nonmetro)
- ☀ U.S. population increased 13.2 %

# Change in Population, Plan Communities 1990 - 2000

# Community Population Change

	% change	# of comms	% of comms
Decrease in population	-74 - 0	275	(21%)
Increase below regional average	1 – 20	518	(39%)
High increase	21 – 75	472	(36%)
Very high increase	75 – 200+	49	(4%)

# Change in community age distribution

# Percent of population by race

Hispanic origin	
1990	5.8%
2000	8.5%

Year: 2000

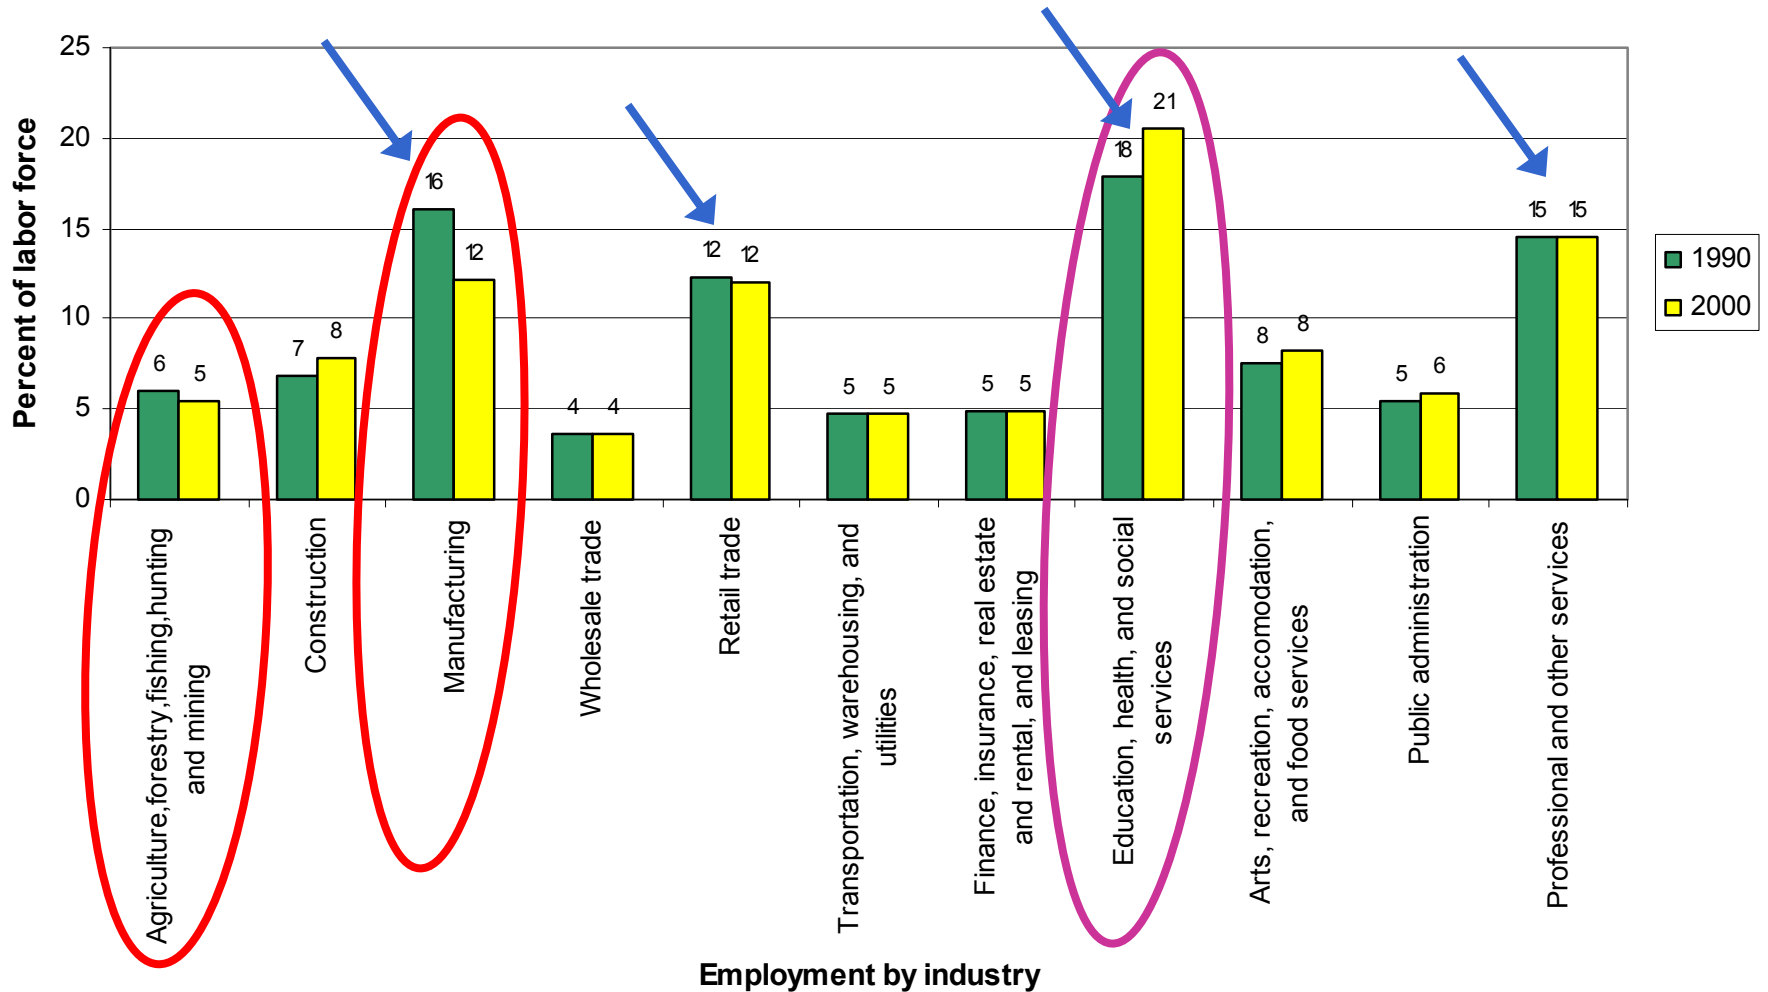

# Education

	1990	2000	Percent change
Percent completed high school	77.6	82.8	6.7
Percent with a Bachelor's degree or higher	15.4	19.3	25.3
School enrollment (average # persons per community)	621	811	30.7

# Economic indicators

	1990	2000	Percent change
Median household income	\$35,214 (in 2000 \$)	\$37,151	5.5%
Percent unemployment	7.3%	7.3%	0.0%
Percent poverty	12.9%	11.8%	-8.5%

# Community socioeconomic well-being categories, 1990 and 2000

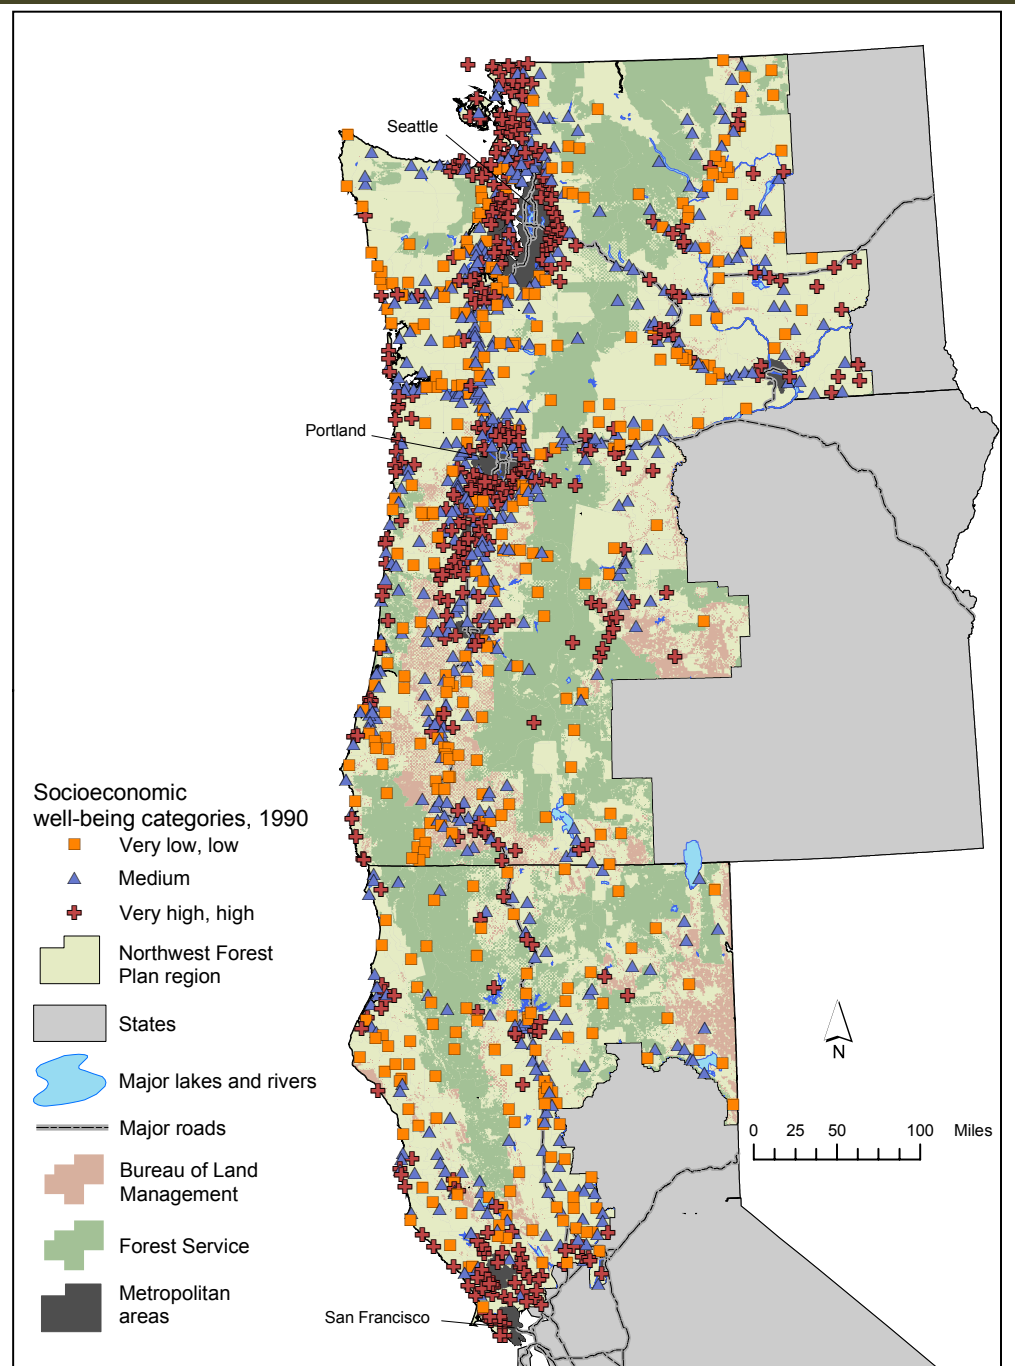

Categories	Standard deviations from the mean ( $\bar{x} = 67.2$ )	Socioeconomic well-being score range
Very low	$> -1.5$	0 to 48.72
Low	$\geq -1.5$ and $< -0.5$	48.73 to 61.07
Medium	$\geq -0.5$ and $< 0.5$	61.08 to 73.36
High	$\geq 0.5$ and $< 1.5$	73.37 to 85.58
Very high	$\geq 1.5$	85.59 to 100.00

# Average size of community population by socioeconomic well-being category, 1990 and 2000

The rankings  
(very low to very high)  
allow us to see how  
communities are  
doing relative to  
their neighbors.

# Change in community socioeconomic well-being score between 1990 and 2000

Community socioeconomic well-being change	Change in score (scale of 0 to 100)	Number of communities	Percent of communities
Decrease	-51 to < -3	484	37
Little change	$\geq -3$ and $\leq 3$	353	27
Increase	> 3 to 44	477	36

# Change in average socioeconomic well-being score between 1990 and 2000.

1990 socioeconomic well-being category	Number of communities 1990	1990 score	2000 score	Difference
Very Low	100	40.5	53.0	12.5*
Low	250	55.9	58.8	2.9*
Medium	543	67.7	66.2	-1.5*
High	368	78.3	75.8	-2.5*
Very High	53	89.5	84.3	-5.2*

\*Significant at  $p < .05$  level.

# Regional population and socioeconomic well-being categories

# Regional population and socioeconomic well-being categories

Socioeconomic well-being category	Total population 1990	Percent of population in SEWB category 1990	Total population 2000	Percent of Category 2000
Very low	131,211	3.2	215,191	4.3
Low	409,336	9.9	833,340	16.7
Medium	1,962,201	47.5	2,064,668	41.5
High	1,515,526	36.7	1,641,515	33.0
Very high	109,385	2.7	225,197	4.5
Total	4,127,659	100.00	4,979,911	100.00

# Proximity of Communities to Forest Service and BLM lands

## Community boundaries and population centers within NWFP region

- Population centers
- ⊕ Community boundaries
- Northwest forest plan region
- States
- Major lakes and rivers
- Major roads
- BLM
- Forest Service
- Metropolitan areas

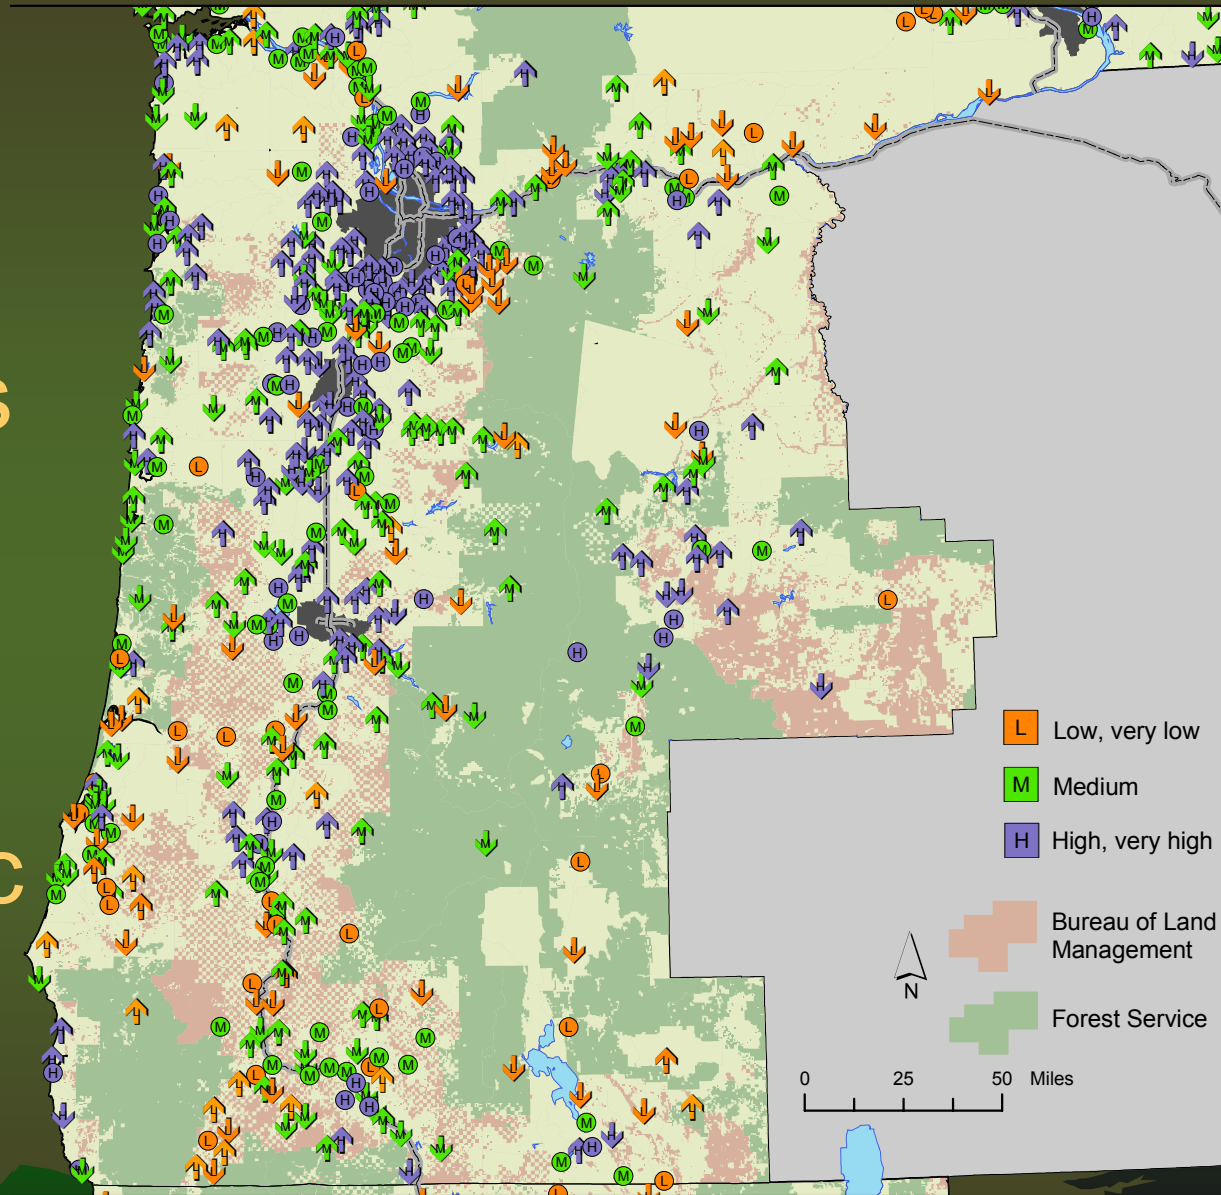

# Proximity to Public Forestlands

- ☀ 57% (750 of 1,314) communities are within 5 miles of FS or BLM lands
- ☀ 2 million people – just under half the population (not including 10 metro areas)

# Proximity to Forest Service and BLM lands and Community Socioeconomic Well-being

# Socioeconomic well-being & proximity to public forestlands

SEWB 2000	Communities < 5 miles FS and BLM lands	Communities > 5 miles FS and BLM lands
Very low & low	270 36%	109 19%
Medium	291 39%	204 36%
High & very high	189 25%	251 45%
<i>Total</i>	750 100%	564 100%

# Socioeconomic well-being & proximity to public forestlands

SEWB 2000	Communities < 5 miles from FS and BLM lands	Communities > 5 miles from FS and BLM lands
	<b>270/379 = 71%</b>	
Very low & low	270 36%	109 19%
Medium	291 <b>189/440 = 43%</b>	204 36%
High & very high	189 25%	251 45%
<i>Total</i>	750 100%	564 100%

# Summary of Proximity & SEWB

- ☀ Of the 1.05 million people in Plan-area communities that had very low or low socioeconomic well-being scores in 2000, 61 percent were living in close proximity to FS and BLM lands.
- ☀ 71 percent of communities with very low or low socioeconomic well-being scores in 2000 were communities with 5 miles of FS and BLM lands.
- ☀ 43 percent of the communities that received high or very high socioeconomic well-being scores, however, were also in close proximity.

# Summary of Proximity & SEWB

☀ On average, communities farther away had higher socioeconomic well-being scores than those in close proximity.

(differences between means 1990, 2000 sig,  $p < .001$ )

- ☀ On average, communities farther away had
  - ☀ higher percentage of the population with bachelor's degrees or more,
  - ☀ less poverty,
  - ☀ less unemployment,
  - ☀ less income inequality,
  - ☀ higher 1990 employment by industry diversity,
  - ☀ and higher commute times.
