

*ASSESSMENT OF FIRES LESS THAN 300 ACRES IN SIZE FORM  
Reporting and Monitoring Requirement for Aerially Applied Fire Retardant Only*

If your forest used aerial retardant during the fire season, this form is required. If your forest had no fires under 300 acres, fill out blocks 1-4, putting a 0 in block 4, and submit. If your forest had fires under 300 acres, you must complete assessment blocks for 5% of those fires and submit the completed form. If your forest is required to complete assessments but you had fewer than 20 fires under 300 acres, you must complete at least 1 assessment. Forests that do not use aerially delivered retardant do not need to complete this assessment.

1. Agency:
2. Area: (Region, Area, State, Other)
3. Unit: (Forest, etc)
4. Number of fires less than 300 acres in size per forest where avoidance areas are present and aerial retardant was used:
5. Number of Assessments completed (5 % per Forest/ minimum of 1):

**Fire Assessment 1**

1. Subunit:
2. Incident Name:
3. Incident Number: (EX: MT-HLF-000692)
4. Fire Date:
5. Assessment Date:
6. Fire Size: (0-10, 11-100, 101-200, 201-300)
7. Did retardant enter avoidance area?
8. If Yes, check all that apply:
  - Waterway Buffer Zone
  - Aquatic TEPSC
  - Terrestrial TEPSC
  - Dry Intermittent Buffer

## Fire Assessment 2

1. Subunit:
2. Incident Name:
3. Incident Number: (EX: MT-HLF-000692)
4. Fire Date:
5. Assessment Date:
6. Fire Size: (0-10, 11-100, 101-200, 201-300)
7. Did retardant enter avoidance area?
8. If Yes, check all that apply:
  - Waterway Buffer Zone
  - Aquatic TEPSC
  - Terrestrial TEPSC
  - Dry Intermittent Buffer

## Fire Assessment 3

1. Subunit:
2. Incident Name:
3. Incident Number: (EX: MT-HLF-000692)
4. Fire Date:
5. Assessment Date:
6. Fire Size: (0-10, 11-100, 101-200, 201-300)
7. Did retardant enter avoidance area?
8. If Yes, check all that apply:
  - Waterway Buffer Zone
  - Aquatic TEPSC
  - Terrestrial TEPSC
  - Dry Intermittent Buffer
