Woodbury Fire

National Weather Service Phoenix 2019-06-28 2:40 PM MST

Spot Forecast for Woodbury Fire...FOREST SERVICE National Weather Service Phoenix AZ 239 PM MST Fri Jun 28 2019

.DISCUSSION...

There is potential for gusty winds from distant thunderstorms to occur at the fire later this afternoon and early evening. If it happens, the winds would most likely have an easterly component (northeast, or east, or southeast). Toward midnight, anticipate a distinct shift to easterly winds. On Saturday, anticipate isolated afternoon and evening storms over the eastern third of Arizona and once again the possibility of gusty winds from distant storms. Otherwise, somewhat gusty easterly winds will prevail. There will also be more cloudiness as well. Humidities trend upward tonight and Saturday. High temperatures Saturday will be a bit lower than today.

... Thunderstorms imply gusty winds...

Note...Additional Fire Weather Forecast information can be found in the Area Forecast Discussion. See product PHXAFDPSR.

.SATURDAY...

Sky/weather.....Partly sunny. CWR..... percent. Max temperature....98-102. Min humidity......12-17 pct.

Wind (20 ft)......East winds 7 to 13 mph with gusts to around 17 mph in the morning becoming south 5 to 8 mph in

the afternoon.
