INCIDENT OBJECTIVES		1. Incident Name Woodbury Fire	2. Date Prepared 06/19/2019	3. Time Prepared 2100 hrs
4. Operational Period				
Thursday June 20 th , 2019		DAY SHIFT 0600-2000		
5. Leaders Intent				
<p>The intent for the incident is to effectively utilize strategies and tactics that provide for firefighter and public safety first and foremost, which have a high probability of success. Objectives to be accomplished shall utilize risk based decisions that minimize unnecessary exposure for the purpose of implementing tasks associated with protecting priority values at risk.</p>				
6. General Control Objectives for the Incident (Include Alternatives)				
<ol style="list-style-type: none"> 1. Ensure firefighter, aviation and public safety through clear leader's intent with established work prioritization and implementation of fundamental firefighting principles utilizing thorough risk informed decisions. 2. Protect or minimize threats to identified values at risk including the Communities of Queen Valley Estates, Gold Canyon, Superior, Apache Junction, Roosevelt, Claypool, Miami, Globe, Ranches and Ranch Infrastructure, Lower Salt River Lake System Corridor, Arizona Trail, Tonto National Monument, Arizona Public Service and Salt River Project infrastructure, Arizona Department of Transportation infrastructure, and Pinto Valley Mine infrastructure.. 3. Maintain and develop partnerships and relationships with stakeholders, cooperators, community leaders, and local agencies through timely and accurate information. 4. Protect and minimize suppression and fire impacts to natural and cultural resources, Sonoran Desert Ecosystem, threatened and endangered species, Riparian waterways, Circle Stone Structure, Angel Basin Cliff Dwellings, Arizona Hedge Hog Cactus, Mexican Spotted Owls, Reavis Ranch, Gila Topminnow, Bald Eagles, and Golden Eagles. 5. Ensure timely incident information is provided to the public through area information outlets including the fires activity and smoke impacts. 6. Develop long term full suppression strategic planning incorporating management actions to protect critical values at risk. 				
7. Weather Forecast For Period				
Hot and Dry, Windy				
High Temp: 103-106 Minimum RH: 5 to 7% Winds (20') : 14 to 19 MPH Gusts to 27 on ridges SW				
LAL: 1		Haines: 5		Prob. Of Precipitation: 0%
8. General Safety Message				
Use caution when traveling in neighborhoods, maintain safe distances, use headlights at all times. Hydrate, Hydrate, Hydrate.

FIRE WEATHER FORECAST

Forecast No. 8

Name of Fire: Woodbury Fire

Prediction for: Day shift

Unit: Tonto National Forest

Shift Date: 6/20/19 Thursday

Time & Date Issued: 2030 MST 6/19/19

Signed: Mark Stubblefield, IMET

Weather Discussion: A large area of low pressure will bring increasing southwest winds over northern Arizona today. This storm system will bring cooler and breezy to windy conditions to the fire Friday and Saturday. The strongest winds look to be Friday afternoon and evening. Some northeast aspects and drainages could see southwest breezes through the night Thursday night and Friday night.

.TODAY...

SKY WEATHER...Sunny.

MAX TEMP (2000 feet)...103 to 106F (4000 feet)...93 to 96F

MIN RH (2000 feet)...5 to 7% (4000 feet)...8 to 10%

SLOPE/VALLEY WINDS (20 FOOT)...Downslope/valley winds 3 to 5 MPH becoming southwest 14 to 19 MPH by late morning...afternoon gusts to 27 MPH.

10000 FOOT WINDS...southwest 18 to 23 MPH.

LAL: 1

Haines Index: 5.

.TONIGHT...

SKY WEATHER...Clear.

MIN TEMP: (2000 feet)...79 to 81F (4000 feet)...69 to 71F

MAX RH: (2000 feet)...16 to 19% (4000 feet)...27 to 30%

SLOPE/VALLEY WINDS (20 FOOT)...southwest 12 to 17 MPH becoming slope/down canyon 3 to 5 MPH after 2300. Northeast aspects could see southwest/downslope winds 8 to 12 MPH through the night.

10000 FOOT WINDS...southwest 20 to 25 MPH.

LAL:1.

Outlook for Friday...Increasing clouds. Max Temp (2000 feet) 101 to 104F (4000 feet) 91 to 94 F, Min RH 10 to 15%. 20-ft Winds: light diurnal winds 3 to 5 MPH becoming southwest 18 to 22 MPH by mid-morning. Afternoon and early evening wind gust to 30 MPH. 10000 foot winds...southwest 22 to 27 MPH. Haines Index: 3 LAL:1.

Observations on Wednesday:

Gold Canyon (SRP Wx Station)(1,800 feet) Min temp: 75F Max RH: 15% Max Temp: 103F Min RH 6%

Happy Camp IRAWS 1 (4,725 feet) Min temp: 69F Max RH: 15% Max Temp 91F Min RH 9%

Fish Creek IRAWS 2 (2,900 feet) Min temp: 74F Max RH: 17% Max Temp 97F Min RH 6%

Spring Creek IRAWS 3 (2400 feet) Min temp: 62F Max RH: 27% Max Temp 99F Min RH 7%

IRAWS frequency 163.350Hz Tone 0001, 0002, 0003

Woodbury Incident General Weather Outlook

Work Assignments (Task and Purpose)

Task: Continue to hold fire south of Hwy 88. Mopup as necessary. Monitor fire spread along northwest flank.

Purpose: Keep fire south of Hwy 88 and from impacting private infrastructure.

End State (Desired outcome and Time Frame)

Fire was kept south of Hwy 88, did not affect private land, infrastructure, and Sonoran Desert ecosystem.

EMS Transport Time Risk Analysis				Note
X	<2HRS GREEN	<3HRS YELLOW	<3HRS RED	

Special Instructions

Aerial ignition may be used to minimize fire effects and make firing operations more efficient.
Responsible for IA in the identified area.

Fire Behavior Forecast # 07

Name of Incident: Woodbury	Administrative Unit: AZ – TNF Tonto National Forest
---	---

Date & Time Issued: 06/19/2019 @2030	Operational Period: <u>Day</u> 06/20/2019
---	--

FBAN: Steve Ziel	Signed:
-------------------------	----------------

Assumptions: *Our weather pattern of “hot and dry” now includes “windy” conditions that will continue for the next several days. Expect the most active fire behavior to occur between 1200-1900. The combination of single digit RH, temperature over 100 degrees, increased wind (ridge level gusts to 27mph), WITH ample dry fuels provide all the ingredients for very active fire behavior. Canyons, draws, saddles, and confluences may produce localized wind acceleration, funneling, and direction changes. Dangerous rates of spread may occur on wind aligned steep slopes, and wind favored areas. Possible column development by noon from areas of active fire behavior on higher portions of the fire – especially if influenced by the forecast winds. Think Hot, dry...and windy today.*

Weather Summary

.*See Fire Weather Forecast

Fire Behavior Summary

Fuels in the fire area range from a lowland Sonoran Desert ecosystem to continuous mountain shrub types. Cured *Grass (GR2)*, and *Grass/Shrub (GS2)* fuel models serve as the primary spread mechanism. Fuel types transition to continuous high load *Shrub (SH5)* with Pinyon-Juniper mix at higher elevations (4500'+). *Fuel continuity and loading is highly variable across the landscape as determined by elevation, aspect, and topography. Rock barriers and cliffs are scattered across the landscape providing some fuel discontinuity.*

Today's fire behavior potential: *In areas where the fire is active – grass/shrub fuels may produce rapid rates of spread. Continuous heavy shrub fuels will produce high intensity fire behavior. Expect areas of sustained backing and aggressive upslope spread on steep slopes. Slope reversals are likely to produce aggressive head fire runs with rapid heat build-up. Expect short-range spotting in heavy fuels, roll-out fuels may result in rapid uphill spread. Expect rapid consumption in grass, while heavy shrub fuels may retain heat until completely consumed. Fuel continuity and loading will determine today's fire behavior..if fuel is present, it will burn. All fuels are very dry and contain a lot of energy that is ready to release rapidly (local ERC above 90th percentile).*

Fuel Type	Rate of Spread	Flame Length	**30 MPH Gusts
Grass (GR2)	50-70 fpm (.7 mph)	2- 4 feet	2 mph w/ 10' FL
Grass/Shrub (GS2)	50-60 fpm (.6 mph)	6 – 8+ feet	1.5 mph w/12' FL
Shrub (SH5) *Heavy load on slopes	75-95 fpm (1+mph)	10-15 Feet	2 mph+ w/ 25'+ FL
(FB during burn period conditions)			

* Fine Dead fuel moisture of 1-2%, woody fuels 60-70%, expect 100% POI. Review IRPG pages 3 & 4

Specific Assignments:

- Div. A/D – Monitor activity on Hewitt Ridge for rollout and flare-ups. light downslope winds early, Stronger upslope after noon.
- Div G/J/K – Assess for hotspots burning through retardant lines and previously cold portions of the perimeter.
- Div. L/O/P – Monitor fire activity for flare-ups and materials. Expect strong squirely winds on SW aspects and deep canyons .
- Div. R – Assess potential impact in the event fire threatens the 88 road corridor – observe wind and smoke direction.
- *All other Divisions need to monitor fire activity for resource and fire movement. Forecast applies I.A. resources and Structure Groups.

**Expect increased activity on NE side of fire in the headwaters of Campaign Cr. between Pinto Peak and Mound Mtn. Expect additional activity SE of Pinto Peak to W. Fork of Pinto Creek/Spencer Cr. Fire may establish south of Sawtooth Ridge into Rock Cr. Wind and slope alignment issues may become problematic due to the complex terrain and forecast winds (Campaign Cr. runs N-S, W. Fk Pinto Cr. runs W-E). Potential for high intensity fire behavior and large acreage increases in all fuel types with strong wind.*

Air Operations: ***Strong gusts over ridges. Potential for column development and resulting downwind smoke to the NE.*

Safety

Very high rates of spread are possible due to increased winds. Review page 5 of your IRPG – Common Denominators of Fire Behavior on Tragedy Fires.....as well as the Standard Firefighting Orders. Ensure LCES is in place before and at all times during the operational period. Be prepared to move quickly.....remember “it is better to be out a minute early than a second too late.....”

****Subtle changes in the weather pattern today Watchout Situation #15 – Wind increases and/or changes direction. #4 – Unfamiliar with weather and local factors influencing fire behavior.**

**Today's Fire Behavior Forecast contains 739 words written for your situational awareness and discussion with your folks.*

Work Assignments (Task and Purpose)

Task: Keep fire south of Highway 88. Protect public and private infrastructure along the Hwy 88 corridor using suppression tactics to include firing operations as needed.

Purpose: Protect campgrounds, private property and infrastructure, power lines, ADOT maintenance yard, and businesses around Apache Lake along Highway 88 corridor.

End State (Desired outcome and Time Frame)

Fire was held south of Highway 88. Campgrounds, private property and infrastructure, power lines, ADOT maintenance yard, and businesses around Apache Lake along Highway 88 corridor were protected.

Work Assignments (Task and Purpose)

Task: Keep fire north of Pinto Valley, FMML, and BHP mines. Protect private property and infrastructure and 500 KV powerline using suppression tactics to include firing operations as needed. Where needed, continue masticating along control features.

Purpose: Protect private inholdings, power lines, and mining operations and infrastructure.

End State (Desired outcome and Time Frame)
Private inholdings, power lines, and mining operations were protected.

EMS Transport Time Risk Analysis			Note
X	<2HRS GREEN	<3HRS YELLOW	<3HRS RED

Special Instructions

Aerial ignition may be used to minimize fire effects and make firing operations more efficient. All personnel entering Pinto Valley mine need to be accompanied by escort or obtain a company issued radio. LEFT HAND DRIVING ONLY at Pinto Valley mine.

Work Assignments (Task and Purpose)

Task: Look for opportunities to tie fire into constructed hand line near wilderness boundary to J/G division break. Monitor and reinforce retardant line north of Coffee Flat. Maintain readiness for primary and alternative line.

Purpose: Protect Quarter Circle U Ranch, minimize impacts to private inholdings and State Trust lands.

End State (Desired outcome and Time Frame)

Fire held as close to the wilderness boundary as possible, up to the division break at Peralta Trailhead, minimizing impacts to private and State Trust lands and the Sonoran Desert ecosystem.

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

INCIDENT Woodbury Fire

DATE: 06 20 2019

Major Hazards and Risks:

- Driving
- Ignition operations
- Fire Weather – increased winds
- Fire Behavior - topography alignment with winds
- Mine activities and infrastructure
- Heat Stress – hotter and drier, refer to IRPG page 109
- Communications – Check radio frequencies before committing, don't bank on cell phone service

Heat Related Fatigue

Heat becomes a problem when *humidity, air temperature, and radiant heat* combine with *hard work* to raise body temperature beyond safe limits. Sweat is your main defense. Everyone on the fire line must understand the importance of drinking water *often*.

THREE MOST COMMON FORMS OF HYPERTHERMIA (Heat Disorders):

-Heat cramps

-Heat exhaustion

-Heat stroke

Hikes into a fire typically raise your body temperature *1-2 degrees* from your pre-hike level

Maintain low skin temperature when possible (*shade*), as it allows heat transfer from the body

Work expectations *above physical fitness levels* can increase risk of Heat Related Illness

Key Points

-Hydration alone will not prevent a heat-related injury.

You need to combine hydration with good fitness and adequate recovery from physical tasks

-Your initial hike sets your body's core temp for the day

-Your PPE weight (pack and tool) contributes to high physical demands and higher body temperatures

-Performing physical tasks –such as hiking up hills- can increase your body temperature to near-critical levels

-Physical work is our biggest producer of body heat.

Breaks and appropriate levels of physical exertion are important in mitigating adverse heat related issues

HUMAN RESOURCE MESSAGE

HOW MUCH DO YOU KNOW ABOUT HARASSMENT?

The US Forest Service Anti-Harassment Policy defines the following types of harassment:

- Sexual Assault:** Any type of sexual contact that is attempted or completed against an individual's will or when an individual cannot consent because of age, disability, the influence of alcohol or drugs, or any other reason preventing the individual from providing consent.
- Sexual Harassment:** Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of sexual nature.
- Equal Employment Opportunity (EEO)- Related Harassment:** Unwelcome intimidation, ridicule, insults, comments, or verbal or physical conduct that is based on race, color, religion, age (40 years or older), disability (physical or mental), national origin, reprisal, sex/gender (whether or not of a sexual nature), sexual orientation, disability, marital, and/or parental status.
- Other Workplace Harassment/Bullying:** Any form of repeated, unwelcome, pervasive, persistent, and unsolicited verbal, nonverbal, written, or physical conduct that is objectively offensive and could alter the affected individual's terms and conditions of employment.

As employees on a federal worksite, you are responsible for knowing what constitutes harassment and for reporting it when you see it occur. Know the law and protect your employees – it's your responsibility!

Larry Sandoval – HRSP

WOODBURY FIRE INFORMATION

Inciweb: <https://inciweb.nwcg.gov/incident/6382/>

Facebook: www.facebook.com/TontoNationalForest/

Twitter: @TontoForest

Fire Information Line: 505-399-2439 7:00 a.m. – 9:00 p.m.

Email: 2019.woodbury@firenet.gov

SOCIAL MEDIA PROTOCOLS – PAUSE BEFORE YOU POST!!

Everybody has a cell phone these days and most people are on Facebook. While working on the fire, it may be tempting to take pictures and post to Facebook.

We realize a lot of you will take photos. However, do not take photos if it compromises your safety or the safety of your crew or interferes with the work you are expected to perform.

Do not take pictures of:

- fireline personnel not wearing full PPE
- identifiable structures (ie. addresses)
- burning / burned structures
- inmate crews
- accident or investigation scenes
- sensitive natural or cultural resources (or QR codes to maps that identify them)
- whiteboards/flipcharts/documents with passwords or internal contacts listed

Avoid posting about suppression tactics, evacuations, closures, cause of the fire, homes burned or other sensitive information unless it comes from an official fire source.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (**Verify correct frequency prior to starting report**)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient as applicable (start with the most severe patient)*

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: **Considerations:** *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.*

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
