Safety Spotlight:

HOW TO RESPOND

**When an active shooter is in your
vicinity**

Quickly determine the most
reasonable way to protect your
own life:

- 1. RUN** – Have an escape route
and plan in mind.
- 2. HIDE** – Hide in an area out of
the active shooter’s view.
- 3. FIGHT** – As a last resort and only
when your life is in imminent
danger?

CALL 911 WHEN IT IS SAFE

INCIDENT OBJECTIVES		1. Incident Name Woodbury Fire	2. Date Prepared 06/20/2019	3. Time Prepared 2100 hrs
4. Operational Period				
Friday June 21 th to June 22 nd 2019		DAY SHIFT 0600-2000 Night Shift 1800 - 0600		
5. Leaders Intent				
<p>The intent for the incident is to effectively utilize strategies and tactics that provide for firefighter and public safety first and foremost, which have a high probability of success. Objectives to be accomplished shall utilize risk based decisions that minimize unnecessary exposure for the purpose of implementing tasks associated with protecting priority values at risk.</p>				
6. General Control Objectives for the Incident (Include Alternatives)				
<ol style="list-style-type: none"> 1. Ensure firefighter, aviation and public safety through clear leader's intent with established work prioritization and implementation of fundamental firefighting principles utilizing thorough risk informed decisions. 2. Protect or minimize threats to identified values at risk including the Communities of Queen Valley Estates, Gold Canyon, Superior, Apache Junction, Roosevelt, Claypool, Miami, Globe, Ranches and Ranch Infrastructure, Lower Salt River Lake System Corridor, Arizona Trail, Tonto National Monument, Arizona Public Service and Salt River Project infrastructure, Arizona Department of Transportation infrastructure, and Pinto Valley Mine infrastructure.. 3. Maintain and develop partnerships and relationships with stakeholders, cooperators, community leaders, and local agencies through timely and accurate information. 4. Protect and minimize suppression and fire impacts to natural and cultural resources, Sonoran Desert Ecosystem, threatened and endangered species, Riparian waterways, Circle Stone Structure, Angel Basin Cliff Dwellings, Arizona Hedge Hog Cactus, Mexican Spotted Owls, Reavis Ranch, Gila Topminnow, Bald Eagles, and Golden Eagles. 5. Ensure timely incident information is provided to the public through area information outlets including the fires activity and smoke impacts. 6. Develop long term full suppression strategic planning incorporating management actions to protect critical values at risk. 				
7. Weather Forecast For Period				
Hot and Dry, High Temp: 100 - 103 Minimum RH: 7-10% Winds (20') Becoming 22 Gusts to in afternoon LAL: 1 Haines: 3 Prob. Of Precipitation: 0%				
8. General Safety Message				
Use caution when traveling in neighborhoods, maintain safe distances, use headlights at all times. Hydrate, Hydrate, Hydrate.

FIRE WEATHER FORECAST

Forecast No. 9

Name of Fire: Woodbury Fire
Unit: Tonto National Forest
Time & Date Issued: 2030 MST 6/20/19

Prediction for: Day shift
Shift Date: 6/21/19 Friday
Signed: Mark Stubblefield, IMET

Weather Discussion: A large area of low pressure will bring slightly stronger southwest winds over Arizona today. Cooler and breezy to windy conditions will continue through Saturday. The strongest winds with this storm will likely be this afternoon and evening. Some northeast aspects and drainages could see southwest breezes through the night with lower RH values.

.TODAY...

SKY WEATHER...Partly cloudy.
MAX TEMP (2000 feet)...100 to 103F (4000 feet)...90 to 93F
MIN RH (2000 feet)...7 to 10% (4000 feet)...11 to 14%
SLOPE/VALLEY WINDS (20 FOOT)...Downslope/valley winds 3 to 5 MPH becoming southwest 18 to 22 MPH by late morning...afternoon gusts to 30 MPH.
10000 FOOT WINDS...southwest 22 to 27 MPH.
LAL: 1
Haines Index: 3.

.TONIGHT...

SKY WEATHER...Partly cloudy.
MIN TEMP: (2000 feet)...79 to 81F (4000 feet)...69 to 71F
MAX RH: (2000 feet)...16 to 19% (4000 feet)...27 to 30%
SLOPE/VALLEY WINDS (20 FOOT)...southwest 12 to 17 MPH becoming slope/down canyon 3 to 5 MPH after 0200. Northeast aspects could see southwest/downslope winds 10 to 14 MPH through the night.
10000 FOOT WINDS...southwest 20 to 25 MPH.
LAL:1.

Outlook for Saturday...Partly cloudy. Max Temp (2000 feet) 96 to 99F (4000 feet) 85 to 88F, Min RH 12 to 17%. 20-ft Winds: southwest 10 to 15 MPH becoming southwest 18 to 22 MPH by mid-morning. Afternoon and early evening wind gust to 30 MPH. 10000 foot winds...southwest 22 to 27 MPH. Haines Index: 3 LAL:1.

Observations on Thursday:

Gold Canyon (SRP Wx Station)(1,800 feet) Min temp: 74F Max RH: 17% Max Temp: 102F Min RH 6%	19 MPH gust
Happy Camp IRAWS 1 (4,725 feet) Min temp: 69F Max RH: 19% Max Temp 88F Min RH 9%	32 MPH gust
Fish Creek IRAWS 2 (2,900 feet) Min temp: 75F Max RH: 15% Max Temp 95F Min RH 6%	32 MPH gust
Spring Creek IRAWS 3 (2400 feet) Min temp: 63F Max RH: 29% Max Temp 96F Min RH 6%	17 MPH gust

IRAWS frequency 163.350Hz Tone 0001, 0002, 0003

LAL	< 3	3 to 4	> 5
Ridge Wind	< 10 mph	10 to 20 mph	> 20 mph
*Wind Direction	Criticality of wind direction highly dependent on burn operations and/or structures threatened		
Min Humidity	> 22 %	16 to 22 %	< 16 %
Haines Index	< 4	5	6

5 or more EXTREME blocks in a day equals the potential for a Critical Weather Day

Fire Behavior Forecast # 09

Name of Incident:

Woodbury

Administrative Unit:

AZ – TNF Tonto National Forest

Date & Time Issued: 06/20/2019 @2030

Operational Period: Day 06/21/2019

FBAN: Steve Ziel

Signed:

Assumptions: *Our weather pattern of “hot, dry, and windy” will continue for the next couple days. Expect very active fire behavior to occur between 1200-1900. The combination of very low RH, very high temperature, increased wind (ridge level gusts to 30mph), and ample dry fuels provides all the ingredients for very active fire behavior. Canyons, draws, saddles, and confluences may produce localized wind acceleration, funneling, and direction changes. SW winds may produce downslope effects on NE aspects. Dangerous rates of spread may occur on wind aligned steep slopes, and wind favored areas. Possible column development by noon from areas of very active fire behavior on higher portions of the fire – especially if influenced by the forecast winds. Think hot, dry....and windy again today.*

Weather Summary

. *See Fire Weather Forecast

Fire Behavior Summary

Fuels in the fire area range from a lowland Sonoran Desert ecosystem to continuous mountain shrub types. Cured *Grass (GR2)*, and *Grass/Shrub (GS2)* fuel models serve as the primary spread mechanism. Fuel types transition to continuous high load *Shrub (SH5)* with Pinyon-Juniper mix at higher elevations (4500'+). *Fuel continuity and loading is highly variable across the landscape as determined by elevation, aspect, and topography. Rock barriers and cliffs are scattered across the landscape providing some fuel discontinuity.*

Today's fire behavior potential: *In areas where the fire is active – grass/shrub fuels may produce rapid rates of spread. Continuous heavy shrub fuels will produce high intensity fire behavior. Expect areas of sustained backing and aggressive upslope runs on steep slopes. Slope reversals have been providing aggressive head fire runs with rapid heat build-up. Expect short-range spotting in heavy fuels, roll-out fuels may result in rapid uphill spread. Expect rapid consumption in grass, while heavy shrub fuels retain heat until consumed. Fuel continuity and loading will determine today's fire behavior..if fuel is present, it will burn. All fuels are very dry and contain a lot of energy that is ready to release rapidly (local ERC above 90th percentile). Watch for downslope wind on NE aspects.*

Fuel Type	Rate of Spread	Flame Length	**30 MPH Gusts
Grass (GR2)	50-70 fpm (.7 mph)	2- 4 feet	2 mph w/ 10' FL
Grass/Shrub (GS2)	50-60 fpm (.6 mph)	6 – 8+ feet	1.5 mph w/12' FL
Shrub (SH5) *Heavy load on slopes	75-95 fpm (1+mph)	10-15 Feet	2 mph+ w/ 25'+ FL
(FB during burn period conditions)			

* Fine Dead fuel moisture of 1-2%, woody fuels 60-70%, expect 100% POI. Review IRPG pages 3 & 4

Specific Assignments:

- Div. R – Evaluate rate of fire progression downslope toward the 88 Rd. Fire may accelerate downslope movement with wind .
 - Div T – Assess rate and direction of fire progression for expected increase winds. Monitor Campaign Cr. alignment with smoke .
 - Div. U – Monitor fire activity and progression in the Little Campaign Cr. headwaters, Apache Hill and Nonesuch Rocks .
 - Div. Y – Assess potential fire spread rate in the Miles Ranch and JK Mountain area. Monitor fire activity in W. Fk. Pinto Cr.
- *All other Divisions need to monitor fire activity for resource and fire movement. Forecast applies I.A. resources and Structure Groups.

***Expect increased activity on NE side of fire as fire progress down Campaign Cr. into desert fuels. Expect additional activity SE of Pinto Peak to W. Fork of Pinto Creek/Spencer Cr. Fire may spot south of Sawtooth Ridge into Rock Cr.. Expect continued spread down Reavis Cr./Pine Cr. toward the 88 road. Wind and slope alignment issues may become problematic due to the complex terrain and forecast winds. Potential for high intensity fire behavior and large acreage increases in all fuel types with strong wind.**

Air Operations: ****Strong gusts over ridges.** Potential for column development and resulting downwind smoke to the NE.

Safety

Preplan! Don't wait until you're in the wrong place at the wrong time---with no time. Establish trigger points based on measurable factors such as: • RH • Winds • Fire Behavior • Topographical boundaries • Time constraints/Time of day • Time/distance to safety zones • Loss of suppression resources • Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, weather change).

**Today's Fire Behavior Forecast contains 739 words written for your situational awareness and discussion with your folks.*

Work Assignments (Task and Purpose)

Task: Keep fire south of Highway 188. Protect public and private infrastructure and Tonto National Monument along Hwy 188 and corridor using suppression tactics to include firing operations as needed.

Purpose: Implement the plan to protect values at risk along Highway 88 and Highway 188 corridor, Tonto National Monument, Theodore Roosevelt Dam, and private inholdings.

End State (Desired outcome and Time Frame)

Campgrounds, private property, infrastructure, power lines, Theodore Roosevelt Dam infrastructure, businesses, and Tonto National Monument were protected.

Work Assignments (Task and Purpose)

Task: Keep fire south and west of Hwy 188. Protect private infrastructure, 500 KV powerline, and grazing allotments when possible. Initiate firing operation as needed to protect identified values.

Purpose: Implement suppression tactics to protect private infrastructure, 500 KV powerline, and grazing allotments.

End State (Desired outcome and Time Frame)

All values identified were protected.

EMS Transport Time Risk Analysis			Note

Work Assignments (Task and Purpose)

Task: Continue firing operations initiated by day shift divisions. Fire and hold as appropriate.

Purpose: Protect identified values at risk in the division.

End State (Desired outcome and Time Frame)

Identified values were protected.

EMS Transport Time Risk Analysis			Note
X	<2HRS GREEN	<3HRS YELLOW	<3HRS RED

Special Instructions

Fire as needed using ground and aerial ignition.

SAFETY MESSAGE

INCIDENT NAME: WOODBURY FIRE

OPERATIONAL PERIOD: 6/21/2019

Day/Night Operations

MAJOR HAZARDS:

- **HEAT RELATED ILLNESS**
- **EXTREME FIRE BEHAVIOR** – ERC's and fuel moistures indicate potential for rapid growth
- **FIRE WEATHER** – Today we are nearing critical fire weather conditions (temps, humidity, winds) on this incident.
- **DRIVING** - Be courteous and drive defensively. Obey posted speed limits.
- **WILDLAND/URBAN INTERFACE** – High density development in portions of Branch II & III

WILDLAND/URBAN INTERFACE SAFETY

The wildland/urban interface “Watch-outs!” include:

- Poor roads
- Bridge load limits
- Wooden construction and wood shake roofs
- Power lines
- Propane tanks and HazMat threat
- Inadequate water supply
- Natural fuels within 30 ft. (9 m) or closer to structures
- Structures in chimneys, box canyons, narrow canyons, or on steep slopes
- Extreme fire behavior
- Strong winds
- Panic during an evacuation

Scene Assessment and Structure Triage:

- Estimated time when the fire will hit
 - Distribution of structures
 - Number and vulnerability of structures
 - Firefighting tactics that are likely to work
- When fighting a fire in the interface, stick to these “Do’s” and “Don’ts”:**
- **DO** wear full personal protective equipment (PPE)
 - **DO** keep at least 100 gal. (400 l) of water in reserve
 - **DO** have a protective line for personnel and vehicles
 - **DO** back vehicles in for quick egress
 - **DO** use a 1.5 in. (4 cm) hose when possible
 - **DO** post lookouts as necessary
 - **DON’T** enter burning buildings unless you are properly trained and equipped

NARRATIVE:

CREATING A LEARNING CULTURE IN WILDLAND FIRE:

An essential step in creating a high reliability organization (HRO) is developing and nurturing a “learning” culture. A learning culture sees unintended outcomes as valued opportunities to learn, grow and to be better. How we in wildland fire leadership respond to an accident is enormously important. Progressive leaders can treat accidents and other unintended outcomes as opportunities to look deeply into our operations to better understand how firefighters perceive and manage risk. This view enables learning and with it, an accident can become a safe opportunity for those involved to share their story. Consider these important points:

- A safety culture is dependent upon being a learning culture.
- A learning culture is dependent upon a culture of reporting.
- A culture of reporting is dependent upon trust; that is, firefighters willing to share openly because of the certain knowledge that leadership will respond in the best interest of the greater wildland fire community.

SWIMT TEAM 2 SAFETY OFFICER:

Don Muise SOF1, Russ Copp SOF1

MINE HAZARDS

When working in an area which is known or suspected for mining activities, be aware of the serious hazard which may or may not be visible.

- Surface Features at mines: Mine buildings (mill sites, assorted support structures), waste rock dumps, glory holes (large open pits), trenches and shallow pits, tailing piles, power lines, well heads and **chemical hazards including:**
 - Bulk Fuels Alkilis
 - Bulk Explosives Corrosives
 - Flammables Poisonous
 - Acids Radioactive Materials
- Emergency Response Guidebook for **flammable gases:**
 - ISOLATE for ½ mile in all directions, also consider initial evacuation for ½ mile in all directions
 - Keep unauthorized personnel away
 - Stay upwind, keep out of low areas (flammable gasses may sink into low areas)
 - Withdraw immediately in case of rising sound from ventilating safety devices or discoloration of tank
 - ALWAYS stay away from tanks engulfed in fire
- Emergency Response Guidebook for **radioactive materials:**
 - Some of these materials may burn, but most do not ignite readily
 - Nitrates and oxidizers may ignite other combustibles
 - Do not move damaged packages
 - Stay upwind
 - Low radiation hazard when material is inside container
- Emergency Response Guidebook for **corrosives:**
 - CORROSIVE and/or TOXIC; inhalation, ingestion or contact (skin, eyes) with vapors, dusts or substance may cause severe injury, burns or death
 - Fire will produce irritating, corrosive and/or toxic gases
 - Reaction with water may generate much heat that will increase the concentration of fumes in the air
 - Containers may explode when heated or if contaminated with water
 - May ignite combustibles (wood, paper, oil, clothing, etc.)
 - Substance will react with water (some violently), releasing corrosive and/or toxic gases and runoff

Human Resource Message

Deep Thought by Jack Handy

*“One thing vampire children have to be taught early on is,
don’t run with wooden stakes.”*

Watch your thoughts; they become words.

Watch your words; they become actions.

Watch your actions; they become habits.

Watch your habits; they become character.

Watch your character, it becomes your destiny.

Be careful what we say and do toward others.
Protecting Civil Rights is everyone’s responsibility.

Be safe and thank you for giving your best!!!

Larry Sandoval

Email: 2019.woodbury@firenet.gov

SOCIAL MEDIA PROTOCOLS – PAUSE BEFORE YOU POST!!

Everybody has a cell phone these days and most people are on Facebook. While working on the fire, it may be tempting to take pictures and post to Facebook.

We realize a lot of you will take photos. However, do not take photos if it compromises your safety or the safety of your crew or interferes with the work you are expected to perform.

Do not take pictures of:

- fireline personnel not wearing full PPE
- identifiable structures (ie. addresses)
- burning / burned structures
- inmate crews
- accident or investigation scenes
- sensitive natural or cultural resources (or QR codes to maps that identify them)
- whiteboards/flipcharts/documents with passwords or internal contacts listed

Avoid posting about suppression tactics, evacuations, closures, cause of the fire, homes burned or other sensitive information unless it comes from an official fire source.

Southwest Team 2 Line Order

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
