Safety Spotlight:

Safety Considerations

► Are we monitoring current and predicted fire weather conditions?

Are we prepared for the predicted fire behavior possibilities?

► Are we prepared to deal with a medical emergency?

► Have conditions in our work environments changed from those predicted or expected?

► Are we willing to adjust tactics and operations to SAFELY accommodate changing or changed conditions?

INCIDENT OBJECTIVES		1. Incident Name Woodbury Fire	2. Date Prepared 06/22/2019	3. Time Prepared 2100 hrs
4. Operational Period				
Sunday June 23 th , 2019		DAY SHIFT 0600-2000 NIGHT SHIFT 1800 - 0600		
<p>The intent for the incident is to effectively utilize strategies and tactics that provide for firefighter and public safety first and foremost, which have a high probability of success. Objectives to be accomplished shall utilize risk based decisions that minimize unnecessary exposure for the purpose of implementing tasks associated with protecting priority values at risk.</p>				
6. General Control Objectives for the Incident (Include Alternatives)				
<ol style="list-style-type: none"> 1. Ensure firefighter, aviation and public safety through clear leader's intent with established work prioritization and implementation of fundamental firefighting principles utilizing thorough risk informed decisions. 2. Protect or minimize threats to identified values at risk including the Communities of Queen Valley Estates, Gold Canyon, Superior, Apache Junction, Roosevelt, Claypool, Miami, Globe, Ranches and Ranch Infrastructure, Lower Salt River Lake System Corridor, Arizona Trail, Tonto National Monument, Arizona Public Service and Salt River Project infrastructure, Arizona Department of Transportation infrastructure, and Pinto Valley Mine infrastructure.. 3. Maintain and develop partnerships and relationships with stakeholders, cooperators, community leaders, and local agencies through timely and accurate information. 4. Protect and minimize suppression and fire impacts to natural and cultural resources, Sonoran Desert Ecosystem, threatened and endangered species, Riparian waterways, Circle Stone Structure, Angel Basin Cliff Dwellings, Arizona Hedge Hog Cactus, Mexican Spotted Owls, Reavis Ranch, Gila Topminnow, Bald Eagles, and Golden Eagles. 5. Ensure timely incident information is provided to the public through area information outlets including the fires activity and smoke impacts. 6. Develop long term full suppression strategic planning incorporating management actions to protect critical values at risk. 				
7. Weather Forecast For Period				
Partly cloudy .. becoming mostly sunny				
High Temp: 100 - 103 Minimum RH: 8-11% Winds (20') Downslope/ Valley winds 3 to 5 MPH becoming SW 8 to 12 MPH				
LAL: 1		Haines: 3		Prob. Of Precipitation: 0%
8. General Safety Message				
Use caution when traveling in neighborhoods, maintain safe distances, use headlights at all times. Hydrate, Hydrate, Hydrate.

FIRE WEATHER FORECAST

Forecast No.

11

Name of Fire: Woodbury Fire
Unit: Tonto National Forest
Time & Date Issued: 2000 MST 6/22/19

Prediction for: Day shift
Shift Date: 6/23/19 Sunday
Signed: Mark Stubblefield, IMET

Weather Discussion: High pressure will begin to move over Arizona on today with a slow warming and drying trend through the week. Expect generally diurnal winds today and Monday. The Haines Index will increase to 5 on Monday and will remain high through the rest of the week. South to southwest winds will increase on Tuesday and will remain breezy each afternoon through the week.

.TODAY...

SKY WEATHER...Partly cloudy...becoming mostly sunny.
MAX TEMP (3000 feet)... 93 to 95F
MIN RH (3000 feet)...8 to 11%
SLOPE/VALLEY WINDS (20 foot)...Downslope/valley winds 3 to 5 MPH becoming southwest 8 to 12 MPH by late morning.
10000 FOOT WINDS...southwest 8 to 12 MPH.
LAL: 1
Haines Index: 3.

.TONIGHT...

SKY WEATHER...Mostly clear.
MIN TEMP: (3000 feet)...67F to 70F
MAX RH: (3000 feet)...29 to 32%
SLOPE/VALLEY WINDS (20 foot)...southwest 5 to 10 MPH becoming slope/down canyon 3 to 5 MPH by 2000.
10000 FOOT WINDS...southwest 8 to 12 MPH...becoming north 5 to 8 MPH by 2100.
LAL:1.

Outlook for Monday...Mostly sunny. Max Temp (3000 feet)...96 to 99F, Min RH 5 to 8%. 20-ft Winds: downslope/down canyon 2 to 5 MPH...southwest 8 to 12 MPH by late-morning. 10000 foot winds...Southwest 5 to 10 MPH. Haines Index: 5 LAL:1.

Observations on Saturday:

Gold Canyon (SRP Wx Station)(1,800 feet) Min temp: 75F Max RH: 31% Max Temp: 98F Min RH 11%
Fish Creek IRAWS 2 (2,900 feet) Min temp: 74F Max RH: 33% Max Temp 91F Min RH 14%
Spring Creek IRAWS 3 (2400 feet) Min temp: 72F Max RH: 36% Max Temp 96F Min RH 12%

IRAWS frequency 163.350Hz Tone 0002 and 0003.

Woodbury Incident General Weather Outlook

For Planning Purposes Only, see the IAP for the Official Forecast

Forecast made Saturday, June 22 - Incident Meteorologist (IMET) Mark Stubblefield

	Sun	Mon	Tue	Wed	Thu	Fri
	23-Jun	24-Jun	25-Jun	26-Jun	27-Jun	28-Jun
Clouds @ 1500 (%)	20	10	10	40	20	5
3000FT Max Temp (F)	93	97	99	98	99	100
Precip Chance (%)	0	0	0	0	0	0
LAL	1	1	1	1	1	1
Ridge Wind (mph)	10	8	12	18	18	20
Wind Direction*	SW	SW	SW	S	SW	SW
Min Humidity (%)	8	7	8	9	7	7
Haines Index	3	5	5	5	5	5

KEY:

	Moderate Burning Conditions	Take Caution - Critical Burning Conditions	Extreme Burning Conditions
Clouds	> 31 %	15 to 30 %	< 15 %
Avg Max Temp	< 75 F	75 to 85 F	> 85 F
Precip Chance	> 49 %	15 to 49 %	< 15 %
LAL	< 3	3 to 4	> 5
Ridge Wind	< 10 mph	10 to 20 mph	> 20 mph
*Wind Direction	Criticality of wind direction highly dependent on burn operations and/or structures threatened		
Min Humidity	> 22 %	16 to 22 %	< 16 %
Haines Index	< 4	5	6

5 or more EXTREME blocks in a day equals the potential for a Critical Weather Day

Fire Behavior Forecast # 11

Name of Incident:

Woodbury

Administrative Unit:

AZ – TNF Tonto National Forest

Date & Time Issued: 06/22/2019 @2030

Operational Period: Day and Night 06/23-24/2019

FBAN: Steve Ziel

Signed:

Assumptions: *Looks like our weather pattern of “hot and dry,” will continue for a while. Expect active fire behavior to occur between 1200-1900, with diminishing activity after dark, with a diurnal wind pattern. The combination of very low RH, very high temperature, and ample dry fuels provides all the ingredients for areas of very active fire behavior. Canyons, draws, saddles, and confluences will produce localized wind acceleration, funneling, and direction changes. Dangerous rates of spread may occur on wind aligned steep slopes, and wind exposed flat lands. Possible column development by noon from areas of active fire behavior on higher portions of the fire. Interior islands will continue to produce fire activity as unburned fuel pockets clean up.*

Weather Summary

. *See Fire Weather Forecast

Fire Behavior Summary

Fuels in the fire area range from a lowland Sonoran Desert ecosystem to continuous mountain shrub types. Cured **Grass (GR2)**, and **Grass/Shrub (GS2)** fuel models serve as the primary spread mechanism. Fuel types transition to continuous high load **Shrub (SH5)** with Pinyon-Juniper mix at higher elevations (4500'+). Fuel continuity and loading is highly variable across the landscape as determined by elevation, aspect, and topography. Rock barriers and cliffs are scattered across the landscape providing some fuel discontinuity.

Today's fire behavior potential: *In areas where the fire is active – grass/shrub fuels may produce rapid rates of spread. Continuous heavy shrub fuels will produce high intensity fire behavior. Expect areas of sustained backing and aggressive upslope runs on steep slopes. Slope reversals have been providing aggressive head fire runs with rapid heat build-up. Expect short-range spotting in heavy fuels, roll-out fuels may result in rapid uphill spread. Expect rapid consumption in grass, while heavy shrub fuels retain heat until consumed. Fuel continuity and loading will determine today's fire behavior..if fuel is present, it will burn. All fuels are very dry and contain a lot of energy that is ready to release rapidly (local ERC above 90th percentile).*

Fuel Type	Rate of Spread	Flame Length		
Grass (GR2)	40-60 fpm (.6 mph)	2- 4 feet		
Grass/Shrub (GS2)	30-50 fpm (.5 mph)	6 – 8+ feet		
Shrub (SH5) *Heavy load on slopes (Optimum burn period conditions)	60-80 fpm (1mph)	10-15 Feet		

* Fine Dead fuel moisture of 1-2%, woody fuels 60-70%, expect 100% POI. Review IRPG pages 3 & 4

Specific Assignments:

Div. R – Evaluate rate of fire progression downslope toward the 88 Rd. Fire may accelerate downslope movement with wind or rollout .
 Div T – Monitor fire activity of interior pockets and islands of unburned fuel for threat to control features. Assess depth of burnout.
 Div. U – Monitor fire activity and progression in the Little Campaign Cr. headwaters, Apache Hill and Nonesuch Rocks .
 Div. Y – Assess potential for fire spread in the Miles Ranch and JK Mountain area. Monitor fire activity in W. Fk. Pinto Cr.
 Div. Z – Evaluate fuel and weather conditions for potential firing operations in the Montana Mtn. FS 650 Rd. to Sawtooth Ridge area.
***All other Divisions, Groups, and IA Resources need to monitor fire activity for resource and fire movement.**

***Expect continued activity on NE side of fire as fire progress down Campaign Cr. into pockets and islands of unburned desert fuels. Expect pockets of activity SE of Pinto Peak and Pinto Creek/Spencer Cr. Expect continued fire activity in Pine Cr. for slope reversal spread onto Two Bar Ridge as chews across the slope .**

Air Operations: ** Potential morning smoke inversion on Lake Roosevelt and lowlands for the next couple early mornings.

Safety

Warming and drying will occur in the fire area for the next several days – observe the rate of drying, and the effect on fire behavior – watch for increasing smoke volume, smoke color, location of fire activity. Peak burning conditions will occur in the late afternoon. Compare morning, afternoon, and early evening burning conditions – relate changing weather (temperature, relative humidity, wind speed and direction) to fire activity – we are all students of fire. Anticipate how fire behavior will change over the course of the day, week, rest of season.....

***Today's Fire Behavior Forecast contains 720 words written for your situational awareness and discussion with your folks.**

DIVISION ASSIGNMENT LIST		Branch		Division/Group	
Incident Name				A - P	
WOODBURY FIRE		Operational Period			
		Date: 6-23-2019		Time: 0600-2000	
Operations Personnel					
Operations Chief		Todd Abel / Rocky Gilbert		Branch Director	
Safety Officer		R. Copp / B. Malloy		Division/Group Supervisor	

Resources Assigned This Period						
Strike Team/Task Force/ Resource Designator	Req#	Last Shift	Leader	# Persons	Drop Off Point /Time	Pick Up Point / Time
UNSTAFFED						

Work Assignments (Task and Purpose)

Task: Patrol and monitor from air and IA Group. Begin suppression repair tasks identified by READS.

Purpose: Monitor division for any hot spots or threats to line. Start with suppression repair goals on divisions that are inactive or unstaffed.

End State (Desired outcome and Time Frame)

Fire remains within containment line and suppression repair goals are met.

EMS Transport Time Risk Analysis				Note
X	<2HRS GREEN	<3HRS YELLOW	<3HRS RED	

Special Instructions

READS check in/out with IA Group Supervisor when entering the area. Contact IA DIVS Mike King with any suppression repair needs.

Work Assignments (Task and Purpose)

Task: Identify control features west of Highway 188 to limit fire spread to the highway. Protect private infrastructure, 500 KV powerline, and grazing allotments when possible. Initiaite firing operation as needed to protect identified values.

Purpose: Implement suppression tactics to protect private infrastructure, 500 KV powerline, and grazing allotments.

End State (Desired outcome and Time Frame)

All values identified were protected. Fire effects to Sonoran Desert ecosystem were minimized.

SAFETY MESSAGE

INCIDENT NAME: WOODBURY FIRE

OPERATIONAL PERIOD: 6/23/2019

MAJOR HAZARDS:

- **DRIVING** – Drive defensibly. Take frequent breaks.
- **CUMULATIVE FATIGUE** – Take care of yourselves. We need you for the long haul.
- **FIRE WEATHER AND FIRE BEHAVIOR** – Watch for increasing SW winds.
- **IGNITIONS OPERATIONS** – Communicate planned ignitions to all adjoining resources

Thanks for paying attention to the details of your mission and for maintaining a great safety record on this incident.

**SOUTHWEST AREA TYPE 1
INCIDENT MANAGEMENT TEAM 2
RICH NIETO - INCIDENT COMMANDER**

NARRATIVE:

Stop Think Talk before Acting (STTA)

* Transportation:

- Tired, drowsy – but still going from point to point.
 - How many miles have we driven this year so far?
 - How many road shoulders have I driven on?
 - How often have I almost driven onto or over the center line?
 - Is this normal?
 - Or are we/I just tired from the long hours and the long season?
 - I bet we don't think about these weak signals. Bet we don't even talk about them anymore!

* Fatigue:

- Ten plus hour days or longer for weeks on end w/o much of a break.
 - When is the last time you had two days off w/o anything to do but rest?
 - Fatigue is cumulative and gets worse over time!
 - It is exasperated by:
 - Hot, dry or humid, windy days
 - Back to back fire assignments w/o a break or a short one
 - Not taking days off (14-2) or (21-2 for rare occasion extensions) Interagency policy, but is it enough?
 - Are you really recharged with one/two days off? Any must do's at home?
 - Lack of sleep
 - Not adhering to 2:1 work rest policy (Our body needs 8 hours of REST per day!)
 - Dehydration and poor nutrition
- We've all heard that but the season isn't over and we have jobs to do (IA, Extended Attack, mop-up, patrol and get ready for the next call.
- Is it normal to have fatigue this time of year? Have you seen more slips, trips and falls?

*Have we done it enough where it's now normal? Repetition can make it normal!

*So now What?

- Let's take care of ourselves and each other and assure we are adhering to work rest guidelines. If you see, hear or feel something that makes you uncomfortable (hazard, risky situation, unsafe situation, weak signals, etc.), speak up.
- Here is what I'd like you to do:
 - **STOP** for a minute or two
 - **THINK** about what's bothering you (what and why)
 - **TALK** it over with your partner, crew and/or supervisor
 - When it makes sense and concerns have been mitigated, **ACT** and do the job, task, etc.

*Is talking about something that bothers you easy? Sometimes, sometimes not. Try and break down that barrier that keeps you from speaking up; build that relationship, trust and take care of each other.

SAFETY OFFICERS:

Bruce Malloy SOF1, Russ Copp SOF1

SAFETY TIP:

“Always do a complete walk around your vehicle before leaving, you never know who used it for a resting place or tool rack.”

WOODBURY FIRE INFORMATION

Inciweb: <https://inciweb.nwcg.gov/incident/6382/>

Facebook: www.facebook.com/TontoNationalForest/

Twitter: @TontoForest

Fire Information Line: 505-399-2439 7:00 a.m. – 9:00 p.m.

Email: 2019.woodbury@firenet.gov

SOCIAL MEDIA PROTOCOLS – PAUSE BEFORE YOU POST!!

Everybody has a cell phone these days and most people are on Facebook. While working on the fire, it may be tempting to take pictures and post to Facebook.

We realize a lot of you will take photos. However, do not take photos if it compromises your safety or the safety of your crew or interferes with the work you are expected to perform.

Do not take pictures of:

- fireline personnel not wearing full PPE
- identifiable structures (ie. addresses)
- burning / burned structures
- inmate crews
- accident or investigation scenes
- sensitive natural or cultural resources (or QR codes to maps that identify them)
- whiteboards/flipcharts/documents with passwords or internal contacts listed

Avoid posting about suppression tactics, evacuations, closures, cause of the fire, homes burned or other sensitive information unless it comes from an official fire source.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (**Verify correct frequency prior to starting report**)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient as applicable (start with the most severe patient)*

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: **Considerations:** *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.*

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
