# WOODBURY FIRE

*TONTO NATIONAL FOREST / ARIZONA DEPARTMENT OF FORESTRY AND FIRE  
MANAGEMENT / BUREAU OF LAND MANAGEMENT  
TONTO NATIONAL MONUMENT*

## Values at Risk

Sonoran Desert Ecosystem  
Communities of Queen Valley Estates, Gold Canyon, Superior, Apache Junction, Roosevelt, Claypool, Miami, Globe  
Ranches and Ranch Infrastructure  
Threatened and Endangered Species  
Riparian Water Ways  
Lower Salt River Lake System Corridor  
Arizona Department of transportation infrastructure  
Arizona Public Safety and Salt River Project Infrastructure  
Cultural Resources  
Tonto National Monument  
Arizona Trail  
Pinto Valley Mine Infrastructure

## Safety Spotlight:

SAFETY SPOTLIGHT:

### DISTRACTED DRIVING

Drivers must recognize and be aware that there are numerous hazards present in both urban and rural driving environments.

With all the potential hazards on the road, is being distracted or inattentive worth the risk?

Being distracted or inattentive impacts your ability to recognize, react and avoid the various hazards on the road.

Keep these potential hazards in mind while you drive.

## INCIDENT ACTION PLAN

**Monday June 24-25, 2019**

**Day / Night**

**Operational Period**

**Day 0600 to 2000 / Night 1700 to 0200**

**AZ-TNF-000579**

**P3L951**

**SOUTHWEST AREA TYPE 1  
INCIDENT MANAGEMENT TEAM 2  
RICH NIETO - INCIDENT COMMANDER**

# **WOODBURY FIRE**

## **Values at Risk**

- **Sonoran Desert Ecosystem**
- **Communities of Queen Valley Estates, Gold Canyon, Superior, Apache Junction, Roosevelt, Claypool, Miami, Globe**
  - **Ranches and Ranch Infrastructure**
  - **Threatened and Endangered Species**
    - **Riparian Water Ways**
    - **Lower Salt River Lake System Corridor**
- **Arizona Department of Transportation infrastructure**
  - **Arizona Public Service and Salt River Project 500 Kv Power lines and Infrastructure**
    - **Cultural Resources**
      - **Tonto National Monument**
        - **Arizona Trail**
    - **Pinto Valley Mine Infrastructure**

<b>INCIDENT OBJECTIVES</b>	1. Incident Name <b>Woodbury Fire</b>	2. Date Prepared 06/23/2019	3. Time Prepared 2100 hrs
	4. <b>Operational Period</b> Monday June 24 <sup>th</sup> , 2019 DAY SHIFT 0600-2000 NIGHT SHIFT 1700 - 0200		
<p>The intent for the incident is to effectively utilize strategies and tactics that provide for firefighter and public safety first and foremost, which have a high probability of success. Objectives to be accomplished shall utilize risk based decisions that minimize unnecessary exposure for the purpose of implementing tasks associated with protecting priority values at risk.</p>			
<b>6. General Control Objectives for the Incident (Include Alternatives)</b>			
<ol style="list-style-type: none"> <li>1. Ensure firefighter, aviation and public safety through clear leader's intent with established work prioritization and implementation of fundamental firefighting principles utilizing thorough risk informed decisions.</li> <li>2. Protect or minimize threats to identified values at risk including the Communities of Queen Valley Estates, Gold Canyon, Superior, Apache Junction, Roosevelt, Claypool, Miami, Globe, Ranches and Ranch Infrastructure, Lower Salt River Lake System Corridor, Arizona Trail, Tonto National Monument, Arizona Public Service and Salt River Project infrastructure, Arizona Department of Transportation infrastructure, and Pinto Valley Mine infrastructure..</li> <li>3. Maintain and develop partnerships and relationships with stakeholders, cooperators, community leaders, and local agencies through timely and accurate information.</li> <li>4. Protect and minimize suppression and fire impacts to natural and cultural resources, Sonoran Desert Ecosystem, threatened and endangered species, Riparian waterways, Circle Stone Structure, Angel Basin Cliff Dwellings, Arizona Hedge Hog Cactus, Mexican Spotted Owls, Reavis Ranch, Gila Topminnow, Bald Eagles, and Golden Eagles.</li> <li>5. Ensure timely incident information is provided to the public through area information outlets including the fires activity and smoke impacts.</li> <li>6. Develop long term full suppression strategic planning incorporating management actions to protect critical values at risk.</li> </ol>			
<b>7. Weather Forecast For Period</b>			
Sunny <b>High Temp:</b> 91 - 94 <b>Minimum RH:</b> 8-11% <b>Winds (20')</b> Light becoming SW 8 to 12 MPH afternoon gusts of 18 MPH <b>LAL:</b> 1 <b>Haines:</b> 5 <b>Prob. Of Precipitation:</b> 0%			
<b>8. General Safety Message</b>			
Use caution when traveling in communities, maintain safe distances, use headlights at all times. Hydrate, Hydrate, Hydrate.

# FIRE WEATHER FORECAST

Forecast No. 12

**Name of Fire:** Woodbury Fire  
**Unit:** Tonto National Forest  
**Time & Date Issued:** 2030 MST 6/23/19

**Prediction for:** Day shift  
**Shift Date:** 6/24/19 Monday  
**Signed:** Mark Stubblefield, IMET

---

**Weather Discussion:** High pressure will bring a slow warming to the fire this week. Afternoon southwest winds will also increase through the week as a trough of low pressure moves into the Pacific Northwest. A deep layer of easterly to northeasterly drainage wind down the Salt River Canyon will affect the northern parts of the fire from around 0100 to around 0900 Monday and Tuesday mornings.

---

**.TODAY...**

SKY WEATHER...Sunny.  
MAX TEMP (3000 feet)... 91 to 94F  
MIN RH (3000 feet)...8 to 11%  
SLOPE/VALLEY WINDS (20 foot)...Downslope/valley winds 5 to 8 MPH becoming southwest 8 to 12 MPH by late morning with afternoon gusts to 18 MPH.  
10000 FOOT WINDS...southwest 8 to 12 MPH.  
LAL: 1  
Haines Index: 5.

**.TONIGHT...**

SKY WEATHER...Mostly clear.  
MIN TEMP: (3000 feet)...67 to 70F  
MAX RH: (3000 feet)...29 to 32%  
SLOPE/VALLEY WINDS (20 foot)...southwest 5 to 10 MPH becoming slope/down canyon 3 to 5 MPH by 2100.  
10000 FOOT WINDS...southwest 8 to 12 MPH.  
LAL:1.

**Outlook for Tuesday...**Sunnt. Max Temp (3000 feet)...93 to 96F. Min RH 7 to 10%. 20-ft Winds: downslope/down canyon 4 to 7 MPH...southwest 8 to 12 MPH by mid-morning. 10000 foot winds...Southwest 12 to 18 MPH. Haines Index: 5 LAL:1.

**Observations on Sunday:**

Globe (3,902 feet) Min temp: 64F Max RH: 38% Max Temp: 91F Min RH 14%  
Fish Creek IRAWS 2 (2,900 feet) Min temp: 73F Max RH: 22% Max Temp 91F Min RH 10%  
Spring Creek IRAWS 3 (2400 feet) Min temp: 65F Max RH: 35% Max Temp 94F Min RH 11%

IRAWS frequency 163.350Hz Tone 0002 and 0003.

# Woodbury Incident General Weather Outlook

For Planning Purposes Only, see the IAP for the Official Forecast

Forecast made Friday, June 21 - Incident Meteorologist (IMET) Mark Stubblefield

	Mon	Tue	Wed	Thu	Fri	Sat
	24-Jun	25-Jun	26-Jun	27-Jun	28-Jun	29-Jun
Clouds @ 1500 (%)	10	10	30	20	5	10
3000FT Max Temp (F)	92	94	93	94	96	96
Precip Chance (%)	0	0	0	0	0	0
LAL	1	1	1	1	1	1
Ridge Wind (mph)	10	15	20	22	20	18
Wind Direction*	SW	SW	SW	SW	SW	SW
Min Humidity (%)	9	8	10	7	7	10
Haines Index	5	5	3	5	4	4

**KEY:**

Moderate Burning Conditions	Take Caution - Critical Burning Conditions	Extreme Burning Conditions
-----------------------------	--	----------------------------

Clouds	> 31 %	15 to 30 %	< 15 %
Avg Max Temp	< 75 F	75 to 85 F	> 85 F
Precip Chance	> 49 %	15 to 49 %	< 15 %
LAL	< 3	3 to 4	> 5
Ridge Wind	< 10 mph	10 to 20 mph	> 20 mph
*Wind Direction	Criticality of wind direction highly dependent on burn operations and/or structures threatened		
Min Humidity	> 22 %	16 to 22 %	< 16 %
Haines Index	< 4	5	6

5 or more EXTREME blocks in a day equals the potential for a Critical Weather Day

## Fire Behavior Forecast # 12

**Name of Incident:**

**Woodbury**

**Administrative Unit:**

AZ – TNF Tonto National Forest

**Date & Time Issued:** 06/23/2019 @2030

**Operational Period:** Day and Night 06/24-25/2019

**FBAN:** Steve Ziel

**Signed:**

**Assumptions:** *Looks like our weather pattern of “hot and dry,” will continue for a while. Expect active fire behavior to occur between 1200-1900, with diminishing activity after dark, with a diurnal wind pattern. The combination of very low RH, very high temperature, and ample dry fuels provides all the ingredients for areas of very active fire behavior. Canyons, draws, saddles, and confluences will produce localized wind effects, and direction changes. Dangerous rates of spread may occur on wind aligned steep slopes, and wind exposed flat lands. Possible column development by noon from areas of active fire behavior on higher portions of the fire and in areas of firing operations. Interior islands will continue to produce fire activity as unburned fuel pockets clean up.*

### Weather Summary

.\*See Fire Weather Forecast

### Fire Behavior Summary

Fuels in the fire area range from a lowland Sonoran Desert ecosystem to continuous mountain shrub types. Cured *Grass (GR2)*, and *Grass/Shrub (GS2)* fuel models serve as the primary spread mechanism. Fuel types transition to continuous high load *Shrub (SH5)* with Pinyon-Juniper mix at higher elevations (4500'+). Fuel continuity and loading is highly variable across the landscape as determined by elevation, aspect, and topography. Rock barriers and cliffs are scattered across the landscape providing some fuel discontinuity.

**Today’s fire behavior potential:** *In areas where the fire is active – grass/shrub fuels may produce rapid rates of spread. Continuous heavy shrub fuels will produce high intensity fire behavior. Expect areas of sustained backing and aggressive upslope runs on steep slopes. Slope reversals have been providing aggressive head fire runs with rapid heat build-up. Expect short-range spotting in heavy fuels, roll-out fuels may result in rapid uphill spread. Expect rapid consumption in grass, while heavy shrub fuels retain heat until consumed. Fuel continuity and loading will determine today’s fire behavior..if fuel is present, it will burn. All fuels are very dry and contain a lot of energy that is ready to release rapidly (local ERC above 90<sup>th</sup> percentile).*

Fuel Type	Rate of Spread	Flame Length		
Grass (GR2)	40-60 fpm (.6 mph)	2- 4 feet		
Grass/Shrub (GS2)	30-50 fpm (.5 mph)	6 – 8+ feet		
Shrub (SH5) *Heavy load on slopes (Optimum burn period conditions)	60-80 fpm (1mph)	10-15 Feet		

\* Fine Dead fuel moisture of 1-2%, woody fuels 60-70%, expect 100% POI. Review IRPG pages 3 & 4

### Specific Assignments:

Div. R – Monitor the complex canyon and ridge topography for localized wind effects that may affect any firing operations .  
 Div T – Expect interior flare-ups in pockets and islands of unburned fuel with daytime heating. Assess depth and quality of burnout.  
 Div. U & X – Monitor fire activity for flare ups, and potential fire spread in previously quiet areas .  
 Div. Y – Assess potential for fire spread in the Miles Ranch and JK Mountain area. Monitor fire activity in W. Fk. Pinto Cr.  
 Div. Z – Expect some interior clean-up burning and consumption. Monitor effectiveness of retardant as a holding line.

**\*All other Divisions, Groups, and IA Resources need to monitor fire activity for resource and fire movement.**

**\*Expect continued activity on NE side of fire as fire burns into pockets and islands of unburned fuels. Expect continued fire activity in Pine Cr. for potential slope reversal spread onto Two Bar Ridge as fire chews across the slope. Complex terrain and drainage features may produce challenging wind situations along Apache Lake toward Fish Cr.**

**Air Operations: \*\* Potential morning smoke inversion on Lake Roosevelt and lowlands for the next couple early mornings.**

### Safety

**Not a day to drop your guard.....** Unexpected flare-ups are possible, multiple flare-ups may occur with unburned fuel pockets and a little wind. Multiple simultaneous flare-ups become critical without LCES. Plan ahead for actions to take; travel takes time!! Review the Watch Out Situations with your resources– can you mitigate?? Lined to unlined only takes one ember.

**At all times.....Keep informed on fire weather conditions and forecasts (read the Fire and Weather forecasts, observe weather changes throughout the day, listen to radio). Know what your fire is doing at all times (observe smoke, flames, direction, note changing conditions).**

**\*Today's Fire Behavior Forecast contains 720 words written for your situational awareness and discussion with your folks.**

<b>DIVISION ASSIGNMENT LIST</b>		Branch	Division/Group
<b>Incident Name</b>			<b>ALPHA - PAPP</b>
<b>WOODBURY FIRE</b>		<b>Operational Period</b>	
		Date: 6-24-2019	Time: 0600-2000
<b>Operations Chief</b>		<b>Operations Personnel</b>	
Todd Abel / Rocky Gilbert		Branch Director	
<b>Safety Officer</b>	R. Copp / B. Malloy	Division/Group Supervisor	

<b>Resources Assigned This Period</b>						
Strike Team/Task Force/ Resource Designator	Req#	Last Shift	Leader	# Persons	Drop Off Point /Time	Pick Up Point / Time
UNSTAFFED						

**Work Assignments** ( Task and Purpose)

**Task:** Patrol and monitor from air and IA Group. Begin suppression repair tasks identified by READS.

**Purpose:** Monitor division for any hot spots or threats to line. Start with suppression repair goals on divisions that are inactive or unstaffed.

**End State** ( Desired outcome and Time Frame)

Fire remains within containment line and suppression repair goals are met.

<b>EMS Transport Time Risk Analysis</b>			Note
X	<2HRS GREEN	<3HRS YELLOW	<3HRS RED

**Special Instructions**

READS check in/out with IA Group Supervisor when entering the area. Contact IA DIVS Mike King with any suppression repair needs.

# SAFETY MESSAGE

INCIDENT NAME: **WOODBURY FIRE**

OPERATIONAL PERIOD:

6/24/2019 Day/Night Operations

## MAJOR HAZARDS:

- DRIVING
- STRUCTURE PROTECTION/PREPERATION
- AVIATION OPERATIONS
- FIRE BEHAVIOR
- FIRING OPERATIONS
- UTV/ATV USE

*Mid-June through early July in the Southwest has historically been the peak of fire season, fire behavior potential, and associated risk of injury of death to fire management personnel. This has been proven over the years, with dozens of firefighter fatalities, injuries, entrapments and close calls within this timeframe.*

*It is critical to understand that firefighter fatalities on the Dude and Yarnell fires occurred during this mid-June to early July time frame and were associated with thunderstorm winds and/or collapsing convection columns.*

## Human Factor Watch Outs

Watching out for yourself, coworkers, subordinates and your boss is a primary responsibility for everyone involved in high risk activities. Watch outs are not just for the tactical environment. The Human Factor Watch Outs are designed to create an opportunity for you to take a tactical pause and re-evaluate your situation.

If any of the following occur:

- Your briefing was unclear.
- You are not getting answers to your questions.
- You are not getting clear acknowledgement of your message.
- You are encountering hazards that are not mentioned in your brief.
- Your team is not debriefing.
- Your tempo is too high to maintain command and control.

**Take moment to re-assess your situation. Think!**

## NARRATIVE:

### Decision Making

All humans are faced with making decisions. Some decisions have minimal consequence while others are momentous with serious consequences. None-the-less, the process by which we make decisions is the same. Our expectation of outcome is always a combination two things: the chances of a bad outcome and the amount of value we will receive (risk vs. reward). In fire suppression we might consider a high risk tactic, for instance helicopter rappelling, or the opportunity to place firefighters on a small fire with growth potential in inaccessible terrain. In some instances, the risk is worth the reward. Simplifying our decision process into these two analysis points allows us to feel good about the process of decision making but in reality we need to constantly work at correctly estimating both things. The fire community has created a number of aids to assist in this analysis like checklists, acronyms, orders, watch-outs, etc. but the ultimate responsibility is with the firefighter. A commitment to making safe decisions, fire line experience, discipline and constant diligence is critical to avoiding an injury or accident.

TEAM SAFETY OFFICERS:

Don Muisse SOF1, Russ Copp SOF1, Bruce Malloy SOF1

### **SOCIAL MEDIA PROTOCOLS – PAUSE BEFORE YOU POST!!**

Everybody has a cell phone these days and most people are on Facebook. While working on the fire, it may be tempting to take pictures and post to Facebook.

We realize a lot of you will take photos. However, do not take photos if it compromises your safety or the safety of your crew or interferes with the work you are expected to perform.

Do not take pictures of:

- fireline personnel not wearing full PPE
- identifiable structures (ie. addresses)
- burning / burned structures
- inmate crews
- accident or investigation scenes
- sensitive natural or cultural resources (or QR codes to maps that identify them)
- whiteboards/flipcharts/documents with passwords or internal contacts listed

Avoid posting about suppression tactics, evacuations, closures, cause of the fire, homes burned or other sensitive information unless it comes from an official fire source.

**Woodbury Fire**  
**Human Resource Message**  
**June 24, 2019**

**ATTITUDE**

It is more important than the past, than education, than money, than circumstances, than failures, than successes, than what other people think or say or do.

It is more important than appearance, giftedness or skill.

The remarkable thing is we have choice every day regarding the attitude we will embrace for that day.

We cannot change the inevitable.

The only thing we can do is play on the one string we have, and that is our attitude.

***“I am still determined to be cheerful and happy, in whatever situation I may be; for I have also learned from experience that the greater part of our happiness or misery depends upon our dispositions, and not upon our circumstances.”***        -Martha Washington-

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (**Verify correct frequency prior to starting report**)

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient as applicable (start with the most severe patient)*

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: **Considerations:** *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.*

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
