Pinto Valley Mine Infrastructure

Safety Spotlight:

OPERATIONAL LEADERSHIP

A good operational leader will:

TAKE CHARGE of assigned
resources

ASSESS SITUATION by gaining intel

MOTIVATE firefighters with a “can
do safely” attitude

DEMONSTRATE INITIATIVE by
taking action in the absence of
orders

COMMUNICATE by giving specific
instruction and asking for
feedback

SUPERVISE at the scene of action

See IRPG Page vi

INCIDENT OBJECTIVES	1. Incident Name Woodbury Fire	2. Date Prepared 06/24/2019	3. Time Prepared 2100 hrs
	4. Operational Period Tuesday June 25 th , 2019 DAY SHIFT 0600-2000 SWING SHIFT 1700 - 0200		
<p>The intent for the incident is to effectively utilize strategies and tactics that provide for firefighter and public safety first and foremost, which have a high probability of success. Objectives to be accomplished shall utilize risk based decisions that minimize unnecessary exposure for the purpose of implementing tasks associated with protecting priority values at risk.</p>			
6. General Control Objectives for the Incident (Include Alternatives)			
<ol style="list-style-type: none"> 1. Ensure firefighter, aviation and public safety through clear leader's intent with established work prioritization and implementation of fundamental firefighting principles utilizing thorough risk informed decisions. 2. Protect or minimize threats to identified values at risk including the Communities of Queen Valley Estates, Gold Canyon, Superior, Apache Junction, Roosevelt, Claypool, Miami, Globe, Ranches and Ranch Infrastructure, Lower Salt River Lake System Corridor, Arizona Trail, Tonto National Monument, Arizona Public Service and Salt River Project infrastructure, Arizona Department of Transportation infrastructure, and Pinto Valley Mine infrastructure.. 3. Maintain and develop partnerships and relationships with stakeholders, cooperators, community leaders, and local agencies through timely and accurate information. 4. Protect and minimize suppression and fire impacts to natural and cultural resources, Sonoran Desert Ecosystem, threatened and endangered species, Riparian waterways, Circle Stone Structure, Angel Basin Cliff Dwellings, Arizona Hedge Hog Cactus, Mexican Spotted Owls, Reavis Ranch, Gila Topminnow, Bald Eagles, and Golden Eagles. 5. Ensure timely incident information is provided to the public through area information outlets including the fires activity and smoke impacts. 6. Develop long term full suppression strategic planning incorporating management actions to protect critical values at risk. 			
7. Weather Forecast For Period			
Sunny High Temp: 95 - 97 Minimum RH: 6-9% Winds (20') SW 8 to 12 MPH afternoon gusts of 18 MPH LAL: 1 Haines: 5 Prob. Of Precipitation: 0%			
8. General Safety Message			
Use caution when traveling in communities, maintain safe distances, use headlights at all times. Hydrate, Hydrate, Hydrate.

FIRE WEATHER FORECAST

Forecast No. 13

Name of Fire: Woodbury Fire
Unit: Tonto National Forest
Time & Date Issued: 2015 MST 6/24/19

Prediction for: Day shift
Shift Date: 6/25/19 Tuesday
Signed: Mark Stubblefield, IMET

Weather Discussion: High pressure will bring a slow warming trend to the fire this week. Afternoon southwest winds will also increase through the week as a trough of low pressure moves into the Pacific Northwest. Mid-level moisture will bring partly cloudy conditions and a lower Haines Index on Wednesday.

.TODAY...

SKY WEATHER...Sunny.
MAX TEMP (3000 feet)... 95 to 98F
MIN RH (3000 feet)...6 to 9%
SLOPE/VALLEY WINDS (20 foot)...Downslope/valley winds 5 to 8 MPH becoming southwest 8 to 12 MPH by late morning with afternoon gusts to 18 MPH.
10000 FOOT WINDS...southwest 8 to 12 MPH.
LAL: 1
Haines Index: 5.

.TONIGHT...

SKY WEATHER...Mostly clear.
MIN TEMP: (3000 feet)...67 to 70F
MAX RH: (3000 feet)...26 to 29%
SLOPE/VALLEY WINDS (20 foot)...southwest 5 to 10 MPH becoming slope/down canyon 3 to 5 MPH by 2100.
10000 FOOT WINDS...southwest 12 to 18 MPH.
LAL:1.

Outlook for Wednesday...Partly cloudy. Max Temp (3000 feet)...94 to 96F. Min RH 9 to 12%. 20-ft Winds: downslope/down canyon 4 to 7 MPH...becoming southwest 17 to 21 MPH by mid-morning...afternoon gusts to 27 MPH. 10000 foot winds...Southwest 20 to 25 MPH. Haines Index: 2 LAL:1.

Observations on Monday:

Globe (3,902 feet) Min temp: 62F Max RH: 39% Max Temp: 95F Min RH 9%
Mill Ridge IRAWS 1 (3690 ft.; Lat/Lon: 33.671944/-111.241944) Max Temp 93F, Min RH 8%
Fish Creek IRAWS 2 (2,900 feet) Min temp: 73F Max RH: 21% Max Temp 96F Min RH 5%
Spring Creek IRAWS 3 (2400 feet) Min temp: 62F Max RH: 30% Max Temp 98F Min RH 6%

IRAWS frequency 163.350Hz Tone 001 Tone 0002 and 0003.

Woodbury Incident General Weather Outlook

For Planning Purposes Only, see the IAP for the Official Forecast

Forecast made Monday, June 24 - Incident Meteorologist (IMET) Mark Stubblefield

	Tue	Wed	Thu	Fri	Sat	Sun
	25-Jun	26-Jun	27-Jun	28-Jun	29-Jun	30-Jun
Clouds @ 1500 (%)	10	30	10	30	30	20
3000FT Max Temp (F)	96	95	94	96	99	97
Precip Chance (%)	0	0	0	0	0	0
LAL	1	1	1	1	1	1
Ridge Wind (mph)	12	22	25	25	12	8
Wind Direction*	SW	SW	SW	SW	SW	SW
Min Humidity (%)	7	10	8	7	7	9
Haines Index	5	2	5	4	4	5

KEY:

	Moderate Burning Conditions	Take Caution - Critical Burning Conditions	Extreme Burning Conditions
Clouds	> 31 %	15 to 30 %	< 15 %
Avg Max Temp	< 75 F	75 to 85 F	> 85 F
Precip Chance	> 49 %	15 to 49 %	< 15 %
LAL	< 3	3 to 4	> 5
Ridge Wind	< 10 mph	10 to 20 mph	> 20 mph
*Wind Direction	Criticality of wind direction highly dependent on burn operations and/or structures threatened		
Min Humidity	> 22 %	16 to 22 %	< 16 %
Haines Index	< 4	5	6

5 or more EXTREME blocks in a day equals the potential for a Critical Weather Day

Fire Behavior Forecast # 13

Name of Incident:

Woodbury

Administrative Unit:

AZ – TNF Tonto National Forest

Date & Time Issued: 06/24/2019 @2030

Operational Period: Day and Night 06/25-26/2019

FBAN: Steve Ziel

Signed:

Assumptions: *Our very persistent weather pattern that includes “hot and dry” conditions will continue for a while. Expect active fire behavior to occur between 1200-1900, then diminished activity after dark, with a diurnal wind pattern. The combination of very low RH, very high temperature, and ample dry fuels provides all the ingredients for areas of very active fire behavior. Canyons, draws, saddles, and confluences will produce localized wind effects, and direction changes. Dangerous rates of spread may occur on wind aligned steep slopes, and wind exposed flat lands. Possible column development by noon from areas of active fire behavior on higher portions of the fire. Interior unburned islands and fuel pockets will continue to produce fire activity with likely flare-ups.*

Weather Summary

.*See Fire Weather Forecast

Fire Behavior Summary

Fuels in the fire area range from a lowland Sonoran Desert ecosystem to continuous mountain shrub types. Cured **Grass (GR2)**, and **Grass/Shrub (GS2)** fuel models serve as the primary spread mechanism. Fuel types transition to continuous high load **Shrub (SH5)** with Pinyon-Juniper mix at higher elevations (4500'+). Fuel continuity and loading is highly variable across the landscape as determined by elevation, aspect, and topography. Rock barriers and cliffs are scattered across the landscape providing some fuel discontinuity.

Today’s fire behavior potential: *In areas where the fire is active – grass/shrub fuels may produce rapid rates of spread. Continuous heavy shrub fuels will produce high intensity fire behavior. Expect areas of sustained backing and aggressive upslope runs on steep slopes. Slope reversals may provide aggressive head fire runs and very rapid heat build-up. Expect short-range spotting in heavy fuels, roll-out fuels may result in rapid uphill spread in grassy fuels. Expect rapid consumption in grass, while heavy shrub fuels retain heat until consumed. Fuel continuity and loading will determine today’s fire behavior...if fuel is present, it will burn. All fuels are very dry and contain a lot of energy that is ready to release rapidly (local ERC above 90th percentile).*

Fuel Type	Rate of Spread	Flame Length		
Grass (GR2)	40-60 fpm (.6 mph)	2- 4 feet		
Grass/Shrub (GS2)	30-50 fpm (.5 mph)	6 – 8+ feet		
Shrub (SH5) *Heavy load on slopes (Optimum burn period conditions)	60-80 fpm (1mph)	10-15 Feet		

* Fine Dead fuel moisture of 1-2%, woody fuels 60-70%, expect 100% POI. Review IRPG pages 3 - 5

Specific Assignments:

Div. R – Monitor the complex canyon and ridge topography for localized wind effects that may affect any holding operations .
 Div T – Expect interior flare-ups in pockets and islands of unburned fuel with daytime heating. Assess depth and quality of burnout.
 Div. U & X – Monitor fire activity for flare ups, and potential fire spread in previously quiet areas .
 Div. Y – Assess potential for fire spread in the Miles Ranch and JK Mountain area. Monitor fire activity in W. Fk. Pinto Cr.
 Div. Z – Expect some interior clean-up burning and consumption. Monitor effectiveness of retardant as a holding line.

***All other Divisions, Groups, and IA Resources need to monitor fire activity for resource and fire movement.**

***Expect continued activity on NE side of fire as fire burns into pockets and islands of unburned fuels. Expect continued fire activity in upper Pine Cr. and Two Bar Ridge as fire chews across the slope in the Pinyon Mtn. area. Complex terrain and drainage features may produce challenging wind situations along Apache Lake and Fish Creek Peak areas.**

Air Operations: ** Potential morning smoke inversion on Lake Roosevelt and lowlands.

Safety

Potential for increased fire activity in several areas including some interior flare up’s...multiple areas of fire activity will require Lookouts, Communications, and Escape Routes and Safety Zones being established before engaging fire suppression (and throughout the operational period – watch for changing conditions).

Scattered folks.... scattered smokes. Provide positive communication on “which smoke is which” to ensure you are seeing the right smoke (they all look the same)...especially important when directing helicopter buckets. Expect surface fire heat build-ups to result in flare ups and rapid fire spread..

**Today’s Fire Behavior Forecast contains 718 words written for your situational awareness and discussion with your folks.*

DIVISION ASSIGNMENT LIST		Branch	Division/Group
Incident Name			ALPHA - PAPPA
WOODBURY FIRE		Operational Period	
		Date: 6-25-2019	Time: 0600-2000
Operations Personnel			
Operations Chief	Todd Abel / Rocky Gilbert	Branch Director	
Safety Officer	D. Muise / R. Copp / B. Malloy	Division/Group Supervisor	

Resources Assigned This Period

Strike Team/Task Force/ Resource Designator	Req#	Last Shift	Leader	# Persons	Drop Off Point /Time	Pick Up Point / Time
UNSTAFFED						

Work Assignments (Task and Purpose)

Task: Patrol and monitor from air and IA Group. Begin suppression repair tasks identified by READS.

Purpose: Monitor division for any hot spots or threats to line. Start with suppression repair goals on divisions that are inactive or unstaffed.

End State (Desired outcome and Time Frame)

Fire remains within containment line and suppression repair goals are met.

EMS Transport Time Risk Analysis

X	<2HRS GREEN	<3HRS YELLOW	<3HRS RED
---	-------------	--------------	-----------

Note

Special Instructions

READS check in/out with IA Group Supervisor when entering the area. Contact IA DIVS Mike King with any suppression repair needs.

Work Assignments (Task and Purpose)

Task: Responsible for IA in Woodbury Fire Area. Continue to monitor any fire activity on the north west portion of the fire. Patrol and monitor divisions Alpha -- Papa. Work closely with Lead READ Jason Williams to accomplish suppression repair objectives.

Purpose: Extinguish any new starts within the IMT response area. Start suppression repair goals on DIVS A-P which are inactive or unstaffed.

End State (Desired outcome and Time Frame)

New fire ignitions were extinguished and suppression repair goals were met.

EMS Transport Time Risk Analysis				Note

Work Assignments (Task and Purpose)								
Task: Keep fire south of Highway 88. Protect public and private infrastructure along the Hwy 88 corridor using suppression tactics to include firing operations as needed. Monitor fire progression, develop trigger points and identify checklines along Highway 88 corridor. Initiate firing operations as needed to protect values at risk.								
Purpose: Protect campgrounds, private property and infrastructure, power lines, ADOT maintenance yard, and businesses around Apache Lake along Highway 88 corridor.								
End State (Desired outcome and Time Frame)								
Fire was held south of Highway 88. Campgrounds, private property and infrastructure, power lines, ADOT maintenance yard, and businesses around Apache Lake along Highway 88 corridor were protected. Fire effects to Sonoran Desert ecosystem were protected.

Work Assignments (Task and Purpose)

Task: Keep fire south of Highway 188. Protect public and private infrastructure and Tonto National Monument along Hwy 188 and corridor using suppression tactics to include firing operations as needed.

Purpose: Implement the plan to protect values at risk along Highway 88 and Highway 188 corridor, Tonto National Monument, Theodore Roosevelt Dam, and private inholdings.

End State (Desired outcome and Time Frame)

Campgrounds, private property, infrastructure, power lines, Theodore Roosevelt Dam infrastructure, businesses, and Tonto National Monument were protected. Fire effects to Sonoran Desert ecosystem were protected.

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Woodbury Fire	June 25, 2019 Day 0600-2000 Swing 1700-0200
Major Hazards and Risks: <ul style="list-style-type: none">❖ <i>Driving</i> – According to statistics driving continues to be one of the greatest risks for serious injury. Slowing down greatly reduces that risk. Lights on, defensive-courteous driving also reduces risk. Multi-tasking like reading a map, eating or talking/texting on your cell phone all increase your risk.❖ <i>Weather and fuels</i> - Breezy, high temperatures and low humidity – Active fire behavior is possible, which will demand your focus on the job at hand and a good grasp of current and expected fire behavior. To maintain your Situational Awareness you need LCES in place prior to engagement in your assigned tasks and throughout the operational period.❖ <i>Hydration</i> – Essential for life and proper body function. Before working in the heat drink water or a sports drink. While working in the heat, drink one quart per hour. Mix in some sports drink or eat some fruit with your water. Eating bananas or oranges, or drinking orange or tomato juice will work well for electrolyte replacement. If your urine production drops or your urine is dark in color, you are dehydrated. DRINK FLUIDS OFTEN!	
Slips, Trips, and Falls: Take your time while traveling on foot. This is a common injury to firefighters as it's very easy to step in the wrong place or in the wrong way and sprain an ankle or knee.	
<p style="text-align: center;">Common Denominators of Fire Behavior on Tragedy Fires</p> <ol style="list-style-type: none">1. On deceptively quiet areas of large fires2. In relatively light fuels, such as grass, herbs, and light brush3. When there is an unexpected shift in wind direction or in wind speed.4. When fire responds to topographic conditions and runs uphill. <p style="text-align: center;">Does this describe portions of the Woodbury Fire?</p>	<p style="text-align: center;">REMEMBER THE BASICS</p> <ul style="list-style-type: none">◆ <i>10 STANDARD FIRE ORDERS</i>◆ <i>18 SITUATIONS THAT SHOUT WATCHOUT</i>◆ <i>L.C.E.S.=</i>◆ <i>Lookouts</i>◆ <i>Communications</i>◆ <i>Escape routes</i>◆ <i>Safety zones</i>

One minute medical about HYDRATION from your friends in the Medical Unit

Prior to Fireground Operations

- Drink at least 16 oz. of water, before going on the line.

During Fireground Operations

- Drink cool water, 34 oz. per hour. Those who are dehydrated must drink 8 oz. every 10 minutes or 50 oz. per hour.
- Drink 8-10 oz. every 10-15 minutes.
- If exercising longer than 90 minutes, drink 8-10 oz. of a sports drink (with no more than 8% carbohydrate) every 15-30 minutes.

After Fireground Operations

- If the fireground activity lasts for less than an hour, the body should have sufficient electrolyte and carbohydrate supplies to maintain optimal performance. Therefore, for short periods of exercise, water is just as good as sports drinks.
- If fireground activity lasts for more than an hour, use a sports drink with electrolytes and carbohydrates along with water to rehydrate the body.
- If no water was consumed during fireground operations, aggressively rehydrate at a rate of 16 oz. of fluid every 15-20 minutes.

During an Operational Period involving 2 hours of active firefighting you should consume 12, 16 oz bottles of water and 2 bottles of Gatorade. A firefighter could lose as much as 50 to 70 ounces in sweat in just 30-45 minutes of firefighting activity.

SAFETY TIP:

“You always have time to do things right after a mishap”.

SOCIAL MEDIA PROTOCOLS – PAUSE BEFORE YOU POST!!

Everybody has a cell phone these days and most people are on Facebook. While working on the fire, it may be tempting to take pictures and post to Facebook.

We realize a lot of you will take photos. However, do not take photos if it compromises your safety or the safety of your crew or interferes with the work you are expected to perform.

Do not take pictures of:

- fireline personnel not wearing full PPE
- identifiable structures (ie. addresses)
- burning / burned structures
- inmate crews
- accident or investigation scenes
- sensitive natural or cultural resources (or QR codes to maps that identify them)
- whiteboards/flipcharts/documents with passwords or internal contacts listed

Avoid posting about suppression tactics, evacuations, closures, cause of the fire, homes burned or other sensitive information unless it comes from an official fire source.

Human Resource Message

Stress and fatigue impact your emotional – as well as physical – well-being. This can negatively affect your interactions with others. Take action, don't ignore your stress.

STRESS RELIEVERS

- **Relaxation – break the stress cycle with frequent stress breaks throughout the day – stretch, take a walk, deep breathing**
- **Eat three nutritious meals a day and healthy snacks**
- **Stay in touch with team members and communicate**
- **Replenish, rest, get some down time**

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
