PROJECT:	**Evaluate BMP Software**	**CENTER:**	**SDTDC**
Number:	4E41L11	**PROGRAM LEADER:**	Alan Yamada
SPONSOR:	WO	**Project Leader:**	Ta-Ching Chang
Proposer:	John Bell		

PROJECT OBJECTIVES

Evaluate the Best Management Practice (BMP) decision support system prototype developed for road maintenance. Determine if the prototype would be a good tool for FS to pursue and further develop. Determine the cost to take the prototype to final development of a working BMP decision support system.

Changes to objectives: Other than the feasibility of BMP software decision support systems, also to find out if there is software that can be propagated with road BMP information.

SIGNIFICANT ACCOMPLISHMENTS

- BMP-NET prototype author Bill Hyman of Applied Research Associates, Inc. wrote a BMP DSS paper to compare his prototype with other systems.
- Contact Wright Water Engineering, Inc. and Tetra Tech, Inc. to solicit information.

Output:

Planned: A brief report of finding and recommendation will be prepared.

Actual:
