

Local Grown Natives for High Elevations

2009 Accomplishments

The Payette National Forest was funded to help develop sources of Native Plant Materials for high elevation rehabilitation of the Brundage ski resort.

Buffalo Berry in cooperation with the Payette National Forest identified 10 acres of high elevation ski slope that needed rehabilitation. Collection of native grasses, shrubs, and forbs occurred during the fall and spring of 2009.

This a year in October, after fall rains, about 150 container grown plants were planted at the top of two ski lifts. Planted species included:

- Mountain spirea
- Penstemon
- Silky Lupine
- Big sagebrush
- Gray Rabbit brush
- Phlox
- Pacific aster
- Shrubby cinquefoil

Year Awarded: 2009

Project completion: 2012

Report number: 1 of 3

Expenditures:

- FY09 funding \$37,500.
- FY09 spent \$9,500.
