

# Fremont-Winema National Forests

## 2011 Native Plant Material Accomplishments

A contract was awarded and funds obligated:

- 1,192 lbs. of excess *Elymus elymoides* seed (delivered)
- 600 lbs. of *Deschampsia cespitosa*
- 500 lbs. of *Festuca idahoensis*
- 500 lbs. of *Poa secunda*

Over 81 lbs. of seed from four native grasses were collected with help from Integral Youth Services.

- 36.0 lbs. *Deschampsia cespitosa*, uncleaned
- 3.0 lbs. *Festuca idahoensis*, uncleaned
- 9.5 lbs. *Poa secunda* uncleaned
- 32.5 lbs *Pseudoroegneria spicata*, uncleaned

Collections were also made for the following species of unknown weight on the eastside: *Deschampsia cespitosa*, *Elymus elymoides*, and *Elymus glaucus*.

All lots above will be multiplied on seed production contracts.

Partnership funding was used to produce and deliver:

- 3,900 hardwood seedlings of 7 different species (Fall 2010)
- 1,000 sedge plugs (Fall 2010)
- 5,000 hardwood seedlings and sedge plugs (to be split between Fall 2011 and 2012)
- 312 lbs. of *Poa secunda*

REACH, Inc. assisted in planting riparian shrubs and spreading native grass seed on 1 mile of the Fourmile Creek Restoration Project.

Forest supplied the Ruby Pipeline project with 3,216 lbs of native grass seed. A large portion of the 18 mile pipeline was reseeded in Fall 2010. The remainder will be seeded during the Fall of 2011.

Funds were also used to: locate and map new source populations; test, clean, and store native seeds; and develop and administer contracts and agreements.
