

# Stop the Spread: Clean your Tread!

Non-native invasive species threaten the health and sustainability of our North Woods: help stop the spread!

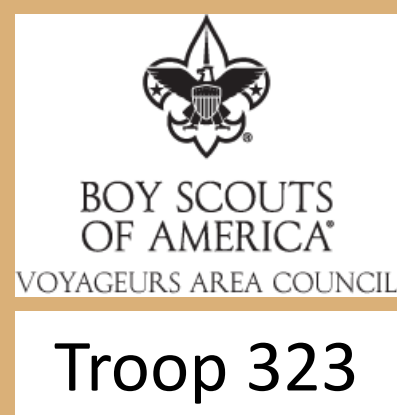

Please use the bicycle cleaning station before your ride:

- Lift bike & hang by the frame on hooks.
- Inspect frame, tires, chain & remove all plant material & debris.
- Use brush to clean dirt, mud, seeds from tires, pedals & frame.
- Use hand pump to remove seeds or dirt from derailleur & gears.
- Check & inflate tires, inspect bike for maintenance issues.
- Lift bike off cleaning station & enjoy your ride.
- Consider cleaning your bike after your ride too, to protect your next location.

Invasive Plant Hitchhikers. Clean ALL recreational equipment between outings.

## CLEAN TREAD PREVENTS THE SPREAD!
